

# Compressed Air

## 2010 COMPRESSED AIR STUDY PROVIDER LIST

Compressed Air Efficiency offers a comprehensive analysis of your demand and supply side air needs and examines for leaks, waste, configuration and equipment. We also offer incentives to offset study costs.

Contact: Tom Schlaeger

The participating contractors herein have agreed to execute studies as detailed by our program. The "Top Study Providers" have earned this title by actively participating in Department of Energy training sessions and bringing a high volume of customers through the compressed air program. The other "Study Providers" listed also are qualified to conduct studies. However, these companies need to complete at least three Xcel Energy funded studies per year and meet other program requirements. For more information on the management of this list, please contact Brian Hammarsten, Xcel Energy Trade Relations Manager, at 612-330-7769.

Participating contractors are not employees or agents of Xcel Energy. This list does not constitute an endorsement of these compressed air contractors, nor does it certify or guarantee the quality of work performed, nor does it exclude potentially qualified contractors.
