I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND OCCUPATION.

A. My name is Melissa L. Ostrom. I am the Director of Financial Forecasting and Reporting for Xcel Energy Services Inc. (XES or the Service Company), which provides services to the Xcel Energy Inc. (XEI) operating companies including Northern States Power Company – Minnesota (NSPM or the Company).

Q. PLEASE SUMMARIZE YOUR QUALIFICATIONS AND EXPERIENCE.

A. I have eleven years of experience in various finance and accounting roles at Xcel Energy. I have been employed by XES since 2010. In my current role, I am responsible for oversight and management of the corporate operation and maintenance (O&M) and capital budget and forecast processes, providing O&M and capital budget finance support for the business areas and for maintaining internal managerial reporting tools and master data strategy and policies. Exhibit___(MLO-1), Schedule 1 summarizes my qualifications and experience.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to discuss the Company's budget governance process. I also discuss the financial systems we use and how they are used within this process. I provide an analysis comparing actual operations and maintantenance (O&M) expense and capital spend in our 2022 test year to historic budget and forecast years to demonstrate reasonable and accurate representations of our costs over time. Finally, I describe key drivers of variances in the comparisons between our 2022 test year O&M budget to historical actual and forecast amounts.

Q. HOW IS YOUR TESTIMONY ORGANIZED?

A. I present the remainder of my testimony in the following sections:

- Section II, *Budgeting and the Budget Governance Process*, explains our budgeting process for O&M costs and capital expenditures. The discussion identifies who is responsible for creation and approval of the budgets, details the steps in the process, the ongoing review and governance after budgets are established, and describes the financial systems that support this process.
- Section III, *Capital and O&M Budget Analyses*, presents the results of various analyses that compare actual to budget O&M and capital results, and that compare the 2022 budget to prior years.
- Section IV, *Conclusion*.

II. BUDGETING AND BUDGET GOVERNANCE PROCESS

Q. WHAT WILL THIS SECTION OF YOUR TESTIMONY ADDRESS?

A. In this section I:

- Provide an overview of our financial budgeting and budget governance process and identify roles and responsibilities;
- Describe Xcel Energy's O&M and capital budgeting process in detail, and discuss additional oversight required for certain capital projects.
- Discuss our ongoing financial review and oversight process once budgets are established.
- Explain the financial systems in place for our budgeting process, including information on our 2016 transition from the JD Edwards (JDE) General Ledger (GL) system to the SAP GL system.

A. Overview

Q. FOR WHAT PERIOD DOES XCEL ENERGY DEVELOP ITS BUDGETS?

A. Electric and gas utilities are long-term, capital intensive businesses. Every year, we prepare a five-year financial forecast that is used to anticipate the financial needs of each of the XEI operating utility subsidiaries, including NSPM. Key components of the five-year financial forecast are the O&M and capital expenditure five-year budgets for each of XEI's operating utility subsidiaries, including NSPM, as well as ongoing monthly total budget reviews and quarterly review of particularly large capital projects included in the five-year budgets.

Q. IF THE COMPANY DEVELOPS A FIVE-YEAR BUDGET EVERY YEAR, DOES THAT MEAN THAT BUDGETS FOR THE LATER YEARS IN THE PERIOD WILL EVOLVE OVER TIME?

A. Yes. When a five-year budget is created and approved, the first year budget is essentially locked in. However, budgets for the subsequent years two through five will be reevaluated in the next budgeting cycle, and will necessarily change in response to new developments and as business requirements change. As we get closer to when spending will occur, our budgets become more refined, based on more relevant information for the upcoming period, and forecasted expenditures are adjusted accordingly.

Q. IS THE BUDGETING AND BUDGET GOVERNANCE PROCESS THE SAME FOR O&M AND CAPITAL EXPENDITURES?

A. To a large extent, yes. Overall, the O&M and capital budgeting and review processes are the same, and unless specified otherwise, the process I describe in my testimony applies to both O&M and capital expenditures. However, there are certain additional considerations for capital project budgeting and oversight

which are identified throughout the next section of my testimony as well as by Company witness Ms. Laurie J. Wold, related to depreciation and remaining lives.

Q. CAN YOU FURTHER DISCUSS THE RELATIONSHIP BETWEEN CAPITAL AND O&M?

A. Yes. Capital investments are a key driver of O&M for the Company. For example, when Business Systems made a capital investment in its new SAP GL, it also changed the ongoing licensing and operations and maintenance costs to maintain the new system. Similarly, increasing our asset base with additional miles of mains or additional meters and services requires additional costs to maintain and operate the system. At the same time, some capital investments can reduce O&M costs over the long term, such as investing in a new technology to reduce manual efforts needed to complete work. Understanding this relationship between capital investments and O&M expense is critical in controlling overall costs that will be passed on to customers.

Q. PLEASE DESCRIBE HOW THE COMPANY HAS APPROACHED THE FUNDING OF KEY STRATEGIC PRIORITIES WHILE MAINTAINING BASE OPERATIONS AND MINIMIZING THE IMPACT ON CUSTOMER RATES.

A. As has always been the case, the capital planning process involves a bottom-up analysis of needs and priorities on the part of the business areas as they develop capital budgets for review and approval. In this process, achieving the balance of funding key strategic priorities, maintaining base operations, and minimizing impacts on customer rates is important. Once proposed, project expenditures – both capital and O&M – are identified and developed. They are then reviewed in the context of the Company's overall resources and discussed at planning meetings to determine how projects should be prioritized and which are

ultimately included in an approved budget. We also assess overall cost levels in relation to inflation, which provides a helpful benchmark for reasonable increases. This allows us to ensure the most important priorities are met while keeping overall costs at reasonable levels.

Q. HOW DOES YOUR DISCUSSION OF THE COMPANY'S OVERALL BUDGETING AND FINANCIAL GOVERNANCE PROCESS RELATE TO THE COMPANY'S REQUESTS IN THIS CASE?

A. We are requesting approval of a forecast test year for NSPM. Accordingly, my testimony in this case provides additional detail on how we make decisions at the overall corporate level about business area budgets and how we manage overall Company expenditures on an ongoing basis once budgets are set.

The business area witnesses in this case discuss in detail how they prioritize projects, develop budgets, and manage ongoing spending. They describe how they review and assess priorities and make necessary expenditure changes through trade-offs in spending – both within individual departments and between departments within their own business area on an ongoing basis. In my testimony, I discuss how this assessment and prioritization occurs at the corporate level between business areas, where there are generally more projects and work to be done than the Company has the capacity to fund. This overall prioritizing and balancing between business areas occurs both during the budgeting process and through ongoing monthly discussions. I describe the flexible and iterative nature of this process, as budgets are reviewed, refined, and reprioritized to meet overall operating company and customer needs, and respond to changing circumstances. This flexibility is necessary to manage our business.

1 **B. Groups Overseeing Budget Processes**

2 Q. WHICH GROUPS WITHIN XCEL ENERGY HAVE A ROLE IN THE COMPANY'S
3 BUDGETING AND BUDGET GOVERNANCE PROCESSES?

4 A. Various groups within finance, including my group, Financial Forecasting and
5 Reporting (FF&R), groups within each business area, and leadership at the
6 operating company and corporate levels all play a role in the budgeting and
7 budget governance process at Xcel Energy. At the corporate level, Xcel
8 Energy's Investment Review Committee (IRC), Financial Council, and Board
9 of Directors are responsible for various levels of review and approval of the
10 business area projects and budgets. In addition, the leadership and Boards of
11 Directors for the operating companies – including NSPM – also play a role in
12 review and approval of the business area budgets.

13

14 Q. PLEASE DESCRIBE AT A HIGH LEVEL THE ROLE OF THE FF&R GROUP IN THE
15 BUDGETING AND BUDGET GOVERNANCE PROCESS.

16 A. FF&R oversees and manages the creation of the five-year O&M budget and
17 capital expenditure budget that flow into Xcel Energy's five-year financial
18 forecast. FF&R facilitates Xcel Energy's capital and O&M budget development
19 process and provides guidance and training to business areas as they develop
20 their budgets. We also manage the process of rolling up the individual business
21 area budgets for review and approval at the operating company and corporate
22 levels. Once budgets are approved and finalized, we facilitate monthly budget
23 variance reviews.

Q. PLEASE DESCRIBE AT A HIGH LEVEL THE ROLE OF BUSINESS AREA PERSONNEL IN THE BUDGETING AND BUDGET GOVERNANCE PROCESS.

A. Each business area has a dedicated finance team to facilitate budget development and ongoing review. These finance teams work with the project teams and leadership within each business area to develop budgets consistent with the corporate guidance provided by FF&R.

Q. WHAT ARE THE RESPONSIBILITIES OF THE INVESTMENT REVIEW COMMITTEE IN THE BUDGETING AND BUDGET GOVERNANCE PROCESS?

A. The Xcel Energy's IRC is responsible for reviewing any new capital projects having capital expenditures greater than $10 million. The primary objectives of the IRC review are to:

- develop potential risk management and hedging strategies for large projects and assess alternatives;
- ensure optimal investment timing consistent with regulatory plans;
- evaluate cash flow returns relative to the cost of capital;
- assess key modeling and analysis assumptions and ensure that the business area has evaluated the associated operational risks;
- coordinate specific accounting and tax research;
- identify regulatory recovery paths; and
- determine financing requirements and balance sheet impacts.

Q. WHAT IS THE MEMBERSHIP OF THE IRC?

A. Members of the IRC include:

- Karen Hyde, Senior Vice President, Chief Risk, Audit and Compliance Officer;
- Melissa Ostrom, Director of Financial Forecasting and Reporting;
- Teresa Mogenson, Senior Vice President of Energy Supply;
- Paul Johnson, Vice President, Treasurer and Investor Relations;
- Christopher Haworth, Associate Vice President of Revenue Requirements; and
- Jonathan Adelman, Vice President, Strategy and Planning.

Q. WHAT ARE THE RESPONSIBILITIES OF THE FINANCIAL COUNCIL IN THE BUDGETING AND BUDGET GOVERNANCE PROCESS?

A. The Financial Council is responsible for reviewing the overall five-year O&M Budget and Capital Expenditure Budget for each of the operating utility subsidiaries. The Financial Council is also responsible for determining whether to approve proposed projects having capital expenditures greater than $20 million and including them in the five-year capital budget. Projects having capital expenditures greater than $50 million must also be presented to the Xcel Energy and NSPM Boards of Directors after approval by the Financial Council.

After budgets are established, the Financial Council is involved in the monthly O&M and capital expenditure reviews of current year spending and in monitoring the financial performance of NSPM (and the other XEI utility operating subsidiaries) and Xcel Energy during the course of the year.

Q. WHO ARE THE MEMBERS OF THE FINANCIAL COUNCIL?

A. The Financial Council is chaired by Brian Van Abel, Executive Vice President and Chief Financial Officer, and consists of the following senior executives:

- Bob Frenzel, Chief Executive Officer of XEI;
- Brett Carter, Executive Vice President and Chief Customer and Innovation Officer;
- Tim O'Connor, Executive Vice President and Chief Generation Officer;
- Amanda Rome, Executive Vice President and General Counsel;
- Darla Figoli, Executive Vice President, Human Resources and Employee Services, and Chief Human Resources Officer;
- Alice Jackson, President and Chief Executive Officer, Public Service Company of Colorado;
- Mark Stoering, President and Chief Executive Officer, Northern States Power Company – Wisconsin;
- David Hudson, President and Chief Executive Officer, Southwestern Public Service Company; and
- Christopher Clark, President and Chief Executive Officer Northern States Power Company – Minnesota.

Q. WHAT ARE THE RESPONSIBILITIES OF THE Xcel Energy AND NSPM BOARDS OF DIRECTORS?

A. The Xcel Energy and NSPM Boards of Directors are responsible for reviewing the five-year capital budget and approving the first year of that budget. They are also responsible for reviewing and approving all capital projects with total forecasted spend greater than $50 million.

C. Budgeting Process for O&M and Capital Expenditures

Q. WHAT ARE THE MAJOR STEPS OF THE ANNUAL FINANCIAL BUDGET PROCESS?

A. While I have separated the budgeting process into discrete steps for discussion purposes, I note that each of the first four steps encompasses multiple activities. The work completed during these phases is fluid and the process is iterative, involving as much back-and-forth discussion as necessary – between FF&R, business area personnel, and corporate and operating company leadership – to ensure that the final approved O&M and capital budgets provide a reasonable estimate of the costs that will be incurred to provide customers with clean, safe, and reliable electric service. The steps in the process are:

1) Financial Planning and Guidance Development;
2) Business Area Budget Development;
3) Financial Council and Operating Company Review and Approval;
4) Xcel Energy and NSPM Boards of Directors Approval; and
5) Ongoing Financial Governance

1. Financial Planning and Guidance Development

Q. WHY DOES THE FINANCIAL COUNCIL DEVELOP SPENDING GUIDANCE FOR EACH BUSINESS AREA?

A. In any budget process, there is typically more demand for O&M and capital budget dollars than there is financial capacity to fund. Therefore, the Company provides financial guidance to the business areas to set expectations for that area, making it clear that they will be expected to justify and explain any significant deviations from the guidance as part of the review and approval process.

Q. HOW IS THE FINANCIAL GUIDANCE DEVELOPED?

A. The starting point for developing the financial guidance is the most recent five-year financial forecast. Specifically, for the 2022 - 2026 budgets, the starting point is the most recent five-year (2022 - 2025) forecast. Beginning each February, the Financial Council reviews this information, considering Xcel Energy's business plans and a number of other factors. Of particular importance in this review are known and expected changes to business area O&M and capital plans as well as the five-year capital spending levels, which will drive the amount of financing needs. After considering this information and emergent business area needs, the Financial Council establishes financial guidance for the new five-year O&M and capital budgets.

Q. WHAT ELSE DOES THE FINANCIAL COUNCIL FACTOR IN WHEN DETERMINING INITIAL BUSINESS AREA FINANCIAL GUIDANCE?

A. The Financial Council also looks at any new legislation or regulatory requirements that may impact spending in the next five years. For example, the Company considered the impacts of COVID-19 on 2020 and 2021 when developing financial guidance for 2022-2026, as I discuss in more detail below. The Financial Council also assesses the current portfolio of projects and how any expected changes will impact customer rates. In addition to reviewing changes related to new requirements or that are necessary to maintain or improve reliability, safety, and satisfaction of regulatory requirements, the Financial Council assesses where there may be opportunities to mitigate risk or to work toward meeting state policy goals or advance priorities our customers or regulators have communicated.

Q. HOW DOES THE COMPANY ENSURE THAT EACH BUSINESS AREA UNDERSTANDS THE SPENDING GUIDANCE AND FOLLOWS CONSISTENT PROCEDURES TO DEVELOP A BUDGET?

A. Each five-year budgeting cycle is initiated with a meeting where business areas, operating companies, and finance collaborate to align on initiatives and priorities that should be included in the next budget. The meeting includes discussions on corporate strategy and other key initiatives in addition to a financial overview to guide the planning and budgeting process. Business areas and the operating companies are encouraged to share with the broad group specific priorities, unique opportunities, or challenges they are facing. After the meeting, each business area and operating company also meets to discuss the financial information, challenges, opportunities, and priorities in detail. Finance then begins its work with each business area to build a budget that takes the outcomes of these discussions into consideration.

2. Business Area Budget Development

Q. PLEASE DESCRIBE WHAT OCCURS DURING THE BUSINESS AREA BUDGET DEVELOPMENT PHASE.

A. Managers within each business area, in conjunction with managers from business area finance, develop their budgets for each of the next five years. The schedule during this phase is designed to provide sufficient time for building the O&M and capital budgets, as well as allowing for internal reviews and checkpoints before the budgets are submitted for senior management review. During this phase, each business area assesses its operating needs and identifies potential capital projects. The scope, cost, and timing of these projects are evaluated and prioritized within the business area by operating company, resulting in an aggregate projection of recommended capital expenditures for

each of the next five years. At the same time, the business areas forecast their labor, material, equipment, and other needs to build a projection of the O&M levels needed to support their area over the next five years. The business area's O&M and capital budgets are then consolidated by the corporate finance team along with preliminary information necessary to estimate the overall financial forecast and all this information is presented for internal review prior to the presentation to the Financial Council later in the fall.

Q. WHO IS RESPONSIBLE FOR PREPARING THE O&M AND CAPITAL EXPENDITURE BUDGETS FOR EACH BUSINESS AREA?

A. Because each business area is different, the specific roles and functions of the business area personnel involved in the process vary between business areas. In general, the assigned business area finance representative works with identified employees in each business area to compile the budget, including gathering the required data and development of supporting assumptions. The information is consolidated and reviewed at various levels within the functional areas, and then reviewed and approved by the senior business area executive before budgets are submitted to corporate finance for consolidation and further review processes.

Q. WHAT IS THE BASIS FOR EACH BUSINESS AREA'S O&M BUDGETS?

A. The budget is built from the bottom up by individual components, such as employee labor, contract labor, consulting costs, and materials expense while also considering, along the way, the spending guidance I previously discussed. However, each business area determines the most accurate method of establishing costs for each budget category it manages. In the example of labor, current salary and headcount data is fed from our payroll system to our budgeting system. Planned headcount additions or reductions over the five year

period are incorporated into the budget system based on current workforce plans; projected merit increases are applied by the corporate budgeting group based on assumptions provided and approved by Human Resources. In a separate example of materials, a business area may decide that the best way to accurately assess likely future spend is to apply an inflationary assumption to the trending of prior years' spend. Thus business areas are able to use judgment to determine the most appropriate means for developing budgets for each category of spend.

Q. ARE BUSINESS AREA CAPITAL EXPENDITURE BUDGETS DEVELOPED BASED ON THE SAME ANALYSIS AS O&M BUDGETS?

A. No, due to the nature of capital work, capital expenditure budgets are developed using a different approach than O&M. The capital expenditure budget is a listing of specific projects and routine project construction work. Many large projects in the business areas are planned and completed over multiple calendar years. To capture total budgeted capital expenditures for these multi-year projects, each business area develops the capital budget for each project from a starting Construction Work In Progress (CWIP) balance, where applicable, and forecasts future capital expenditures for the current "bridge" year (the remainder of the current year in which the budget is prepared) and for the next five years.

Capital expenditure budgets also identify specific in-service dates or, in the case of routine projects, apply a defined closing pattern, such as those included in the electric distribution budget, which defines and applies in-service dates. Once the five-year capital expenditure budget has been approved by the Financial Council (as described below), the Company performs all of the plant-related accounting activities needed to develop the cost of service analysis for the test year. This information includes moving capital expenditures from CWIP to Plant In-Service as projects are completed, calculating deferred taxes and depreciation expense, and other related costs. Company witness Ms. Wold describes this process in more detail in her Direct Testimony.

Q. CAN YOU EXPLAIN MORE ABOUT ROUTINE PROJECTS AND HOW THEIR OVERSIGHT IS HANDLED?

A. Routine projects, also referred to as programs, are defined as those that are part of the normal course of business and occur each year. Examples of routine projects in the gas distribution area include the purchase of meters and transformers, and replacement of distribution main, or annual refresh projects in Business Systems that replace computing devices on a planned schedule. These types of transactions occur each year, with the only variables typically being the number and cost of units being purchased or replaced.

These routine project categories are included as part of the annual capital budget review process and the monthly forecast review process discussed in the following sections of my testimony. Upon completion of the five-year capital expenditure budget, the IRC receives a full report of the capital program spend, including program descriptions and budget assumptions. IRC has discretion to escalate any of the programs included in this report to FC for their additional

review. Variances in planned purchase or activity levels are reviewed and approved as part of that process.

Q. PLEASE DESCRIBE THE BUSINESS AREA REVIEW PROCESS AND HOW IT RELATES TO THE OVERALL BUDGETING PROCESS.

A. Business area management reviews the developing budgets several times during the budget cycle. These reviews may consider:

- the analysis of long-term trends;
- discussion of what costs should be reduced based on process efficiencies or changing business requirements;
- identification of cost pressures and business risks;
- emerging regulatory requirements; and
- alignment with strategic objectives.

Each business area completes iterative reviews of its budget prior to finalizing the budget that is submitted to the Financial Council for approval. These reviews are intended to ensure that the budget is a reasonable and representative forecast of costs for the budget period and that cost components are well understood in preparation for the review meetings with the Financial Council. During this process, the business area meets on an as-needed basis with the operating company presidents, senior financial executives, and senior operations leadership to discuss the preliminary budgets. The purpose of these meetings is to help prioritize projects within the area, as well as across the Company, and to understand how these preliminary budgets compare to the financial and spending guidance I previously discussed. Emergent cost pressures are discussed, along with how these preliminary budgets align with the regulatory priorities of each operating company and the Company's ability

to finance the work. This process is designed to be iterative, giving each group ample opportunity to provide input into the budgets that are proposed to the Operating Company Presidents and the Financial Council.

3. Operating Company and Financial Council Review and Approval

Q. DOES OPERATING COMPANY LEADERSHIP ALSO REVIEW THE PROPOSED BUDGETS AS THEY ARE BEING DEVELOPED?

A. Yes. As I mention above, business areas meet on an as-needed basis with operating company presidents and others to discuss preliminary budgets. Additionally, after the business areas have finalized their proposed budgets, business area leadership meets with the operating company president to present their finalized recommendations for the pending budget cycle. Each operating company president is responsible for reviewing the budgets for his or her operating company across all business areas and has the opportunity to recommend changes to the budgets before they are presented to Financial Council.

Because budget guidance is also developed on an operating company basis, the operating company president has a foundation on which to evaluate business area budgets that are either above or below the budget guidance, and can evaluate the reasons for each business area coming in over or under this guidance. Based on needs within the operating company, its president may request changes either within a business area budget or across the business areas.

Q. WHAT FACTORS DOES OPERATING COMPANY LEADERSHIP AND LATER THE IRC AND FINANCIAL COUNCIL CONSIDER AS THEY ARE REVIEWING THE PROPOSED BUDGETS?

A. These reviews take into consideration rate and customer impacts, cost pressures, emergent issues, priorities presented by the business areas, and areas of strategic and business risk to our stakeholders. They also consider regulatory requirements and operational needs at the state level, the financial position of the operating company, and key strategic decisions that need to be made in the near future. These overall reviews of expenditures at the corporate level are conducted to balance needs across business areas and develop and approve budgets necessary to support an appropriate portfolio of projects from an operating company perspective, and the work necessary to continue to provide safe reliable service to customers.

Q. WHAT OCCURS AFTER THE OPERATING COMPANY LEADERSHIP REVIEWS THE BUDGETS?

A. After incorporating any modifications by the operating company presidents, the O&M and capital expenditure budgets are presented to the IRC and the Financial Council.

Q. WHAT OCCURS AFTER REVIEW OF A PROJECT BY THE IRC?

A. For projects having capital expenditures greater than $10 million but less than $20 million, the IRC may approve the project, seek more information, or request that the business area re-evaluate certain assumptions before the project is included in the Company's budget. For example, the IRC may request additional information regarding such questions as how the business area is optimizing spending and in-service plans, how proposals compare to business

area priorities, what alternatives were considered, how proposals are consistent with overall business strategy, and risk issues. For projects having capital expenditures greater than $20 million, after review by the IRC, a project will either be recommended for presentation to the Financial Council for approval or the business area will be asked to re-evaluate various assumptions before proceeding in the budget governance process. In addition, the IRC reviews projects with variances of more than 15 percent or 20 percent (depending on the size of the project) from their original approval.

Q. IF A PROJECT OF THE STATED THRESHOLDS IS APPROVED BY THE IRC, WHAT PROCESS DOES THE FINANCIAL COUNCIL UNDERTAKE IN ITS REVIEW?

A. The same iterative process used up to this point is repeated at the Financial Council, meaning additional research and analysis may be required and/or budget adjustments made. At the conclusion of the Financial Council review sessions, the business areas make any resulting adjustments, the budgets are considered final, and the final budgets are presented to the Boards of Directors for approval.

4. Xcel Energy and NSPM Boards of Directors Approval

Q. PLEASE DESCRIBE THE APPROVAL OF BUDGETS BY THE Xcel Energy AND NSPM BOARDS OF DIRECTORS.

A. After Financial Council review and approval, the five-year capital budget is presented to the Xcel Energy Board of Directors. This review is focused around the upcoming year, as well as major changes compared to the previous year's five-year budget. The Board of Directors also reviews and determines whether to approve any new projects with total project spend in excess of $50 million,

and any previously-approved project that is seeking re-approval because of significant changes to overall spend.

As part of a separate process, the NSPM Board of Directors approves the upcoming year's total capital budget, all new projects greater than $50 million, and the upcoming year's O&M budget. Because members of NSPM's Board of Directors also hold seats on the Financial Council, they also review and approve the full five-year O&M and capital budgets as part of that separate process. Thus the NSPM Board of Directors has multiple opportunities to review, question, and ultimately approve the Company's budget.

D. Ongoing Financial Governance

Q. WHAT OCCURS AFTER THE FINANCIAL COUNCIL AND Xcel Energy BOARD OF DIRECTORS APPROVE THE ANNUAL BUDGET?

A. The ongoing financial governance process consists of monthly monitoring of Xcel Energy's and the operating companies' performance in comparison to the budget at Monthly Performance Review Meetings, previously referred to as Financial Performance Team Meetings. After the Financial Council approves the five-year budget for each of the utility operating companies, it is locked down to prevent further changes. This facilitates the monitoring and update processes during the first budget year (the year following the year in which the budget is prepared) to reflect changes in business conditions and operations that were not anticipated at the time the budget was approved.

Once the next financial year begins, the FF&R team compares actual results to the O&M and capital budgets by business area and by Operating Company, and

requires the business areas to explain variances and update their forecasts as appropriate.

This ongoing financial governance process allows us to continue to monitor our business plans and financial forecasts. For example, a business area may face cost increases or new projects not anticipated at the time the budget was created, or may need to reduce, delay, or accelerate spending in response to unforeseen or changed circumstances. The monthly forecasting process allows us to evaluate whether an increase above original budget levels for a business area is needed, to consider such changes in the context of overall Company needs and demands, and then to properly reflect any necessary and appropriate changes in our business plans and forecasts. Monthly O&M and capital variances and updated year-end forecasts are reviewed monthly with the Financial Council as well as Operating Company leadership.

Q. WHAT OCCURS AT THE MONTHLY PERFORMANCE REVIEW MEETINGS?

A. Each business area finance representative discusses variances between actual and budgeted expenditures and whether the variances are timing-related. The business area representative will also discuss any unplanned items that have arisen and whether they can be absorbed, or if they will require an adjustment to the year-end forecast. Each business area is responsible for managing to their original budget as approved, so when unforeseen costs increases or decreases occur, the business area makes every attempt to absorb these within their budget by reprioritizing other work. If they are unable to do so, the business area brings forward the requested forecast change through the Monthly Performance Review meetings. Variances and updated forecasts are reviewed monthly with the Financial Council.

Q. ARE THERE ANY IMPROVEMENTS YOU WISH TO NOTE REGARDING THE BUDGETING AND GOVERNANCE PROCESSES THAT THE COMPANY HAS IMPLEMENTED OVER THE PAST FEW YEARS?

A. Yes, we have continued to refine our budgeting and governance processes so that there is an enhanced focus on O&M in general, and on the connection between capital investment and O&M expenses. We have further refined our review processes around larger projects, including by enhancing our focus on how to fund key strategic priorities and keep base operations reliable while minimizing the impact on customer rates. Finally, beginning in 2019 we enhanced the Financial Performance Team meetings, which involved a brief review of monthly results for all business areas in one meeting, and replaced them with business area specific Monthly Performance Review meetings during which each business area finance team provides discussion and driver analysis for business area O&M and capital results. The information gathered during each meeting is also shared with the Financial Council and Operating Company leadership teams.

E. Financial Systems

Q. PLEASE DESCRIBE THE FINANCIAL SYSTEMS USED BY XCEL ENERGY TO DEVELOP ITS BUDGETS AND FORECASTS.

A. Xcel Energy uses several financial systems as part of its budgeting and forecasting process. O&M and capital budget data is initially input into our corporate O&M and capital financial forecasting tool, Financial Management System (FMS). This allows budget managers in every business area to enter projected monthly O&M and capital expenditures for the next five-year period. Monthly O&M data is then transferred to SAP where various budget allocations

are performed. SAP is also used for our general ledger and work and asset management system.

Monthly capital budget data in FMS is also loaded into our PowerPlan system. PowerPlan is used by Capital Asset Accounting to maintain actual and budget capital expenditure data along with actual and budget in-service dates for determining plant in-service. Allowance for Funds Used During Construction (AFUDC) and depreciation expense associated with all budgeted capital project work orders are calculated within PowerPlan. PowerPlan is then used to generate the projected plant and CWIP balances for the thirteen-month roll forward for the forecast test year.

Q. PLEASE DESCRIBE ANY CHANGES THAT THE COMPANY HAS MADE TO ITS FINANCIAL SYSTEMS SINCE ITS RATE CASE FILED IN 2009?

A. Since the Company's last gas rate case (Docket No. G002/GR-09-1153), the Company has made changes to its financial systems through the implementation of our Productivity Through Technology (PTT) initiative. The PTT initiative included replacement of the Company's GL system and implementation of a new Work and Asset Management (WAM) system, both of which were discussed in depth in our 2016 test year electric rate case (Docket No. E002/GR-15-826). The new SAP GL system was placed in service at the end of 2015. The GL serves as a foundation for implementation of the WAM system, which was placed in service in phases through the fourth quarter of 2017.

Q. PLEASE DESCRIBE THE OTHER FINANCIAL SYSTEMS USED BY XCEL ENERGY TO DEVELOP ITS BUDGETS AND FORECASTS.

A. Xcel Energy uses several financial systems as part of its budgeting and forecasting process. O&M and capital budget data is initially input into our corporate O&M and capital financial forecasting tool, Financial Management System (FMS). This allows budget managers in every business area to enter projected monthly O&M and capital expenditures for the next five-year period. Monthly O&M data is then transferred to SAP where various budget allocations are performed.

Monthly capital budget data in FMS is also loaded into our PowerPlan system. PowerPlan is used by Capital Asset Accounting to maintain actual and budget capital expenditure data along with actual and budget in-service dates for determining plant in-service. Allowance for Funds Used During Construction (AFUDC) and depreciation expense associated with all budgeted capital project work orders are calculated within PowerPlan. PowerPlan is then used to generate the projected plant and CWIP balances for the thirteen-month roll forward for the forecast test year.

Q. PLEASE DESCRIBE HOW THE SAP GL SYSTEM ACCOMPLISHES UTILITY REPORTING REQUIREMENTS.

A. The majority of all business costs are either incurred directly by the Company or billed to the Company from XES. Regardless of the transaction origination, each transaction is coded and posted to the SAP GL system with the information necessary to identify the operating company or affiliate that incurred the cost, as well as the operating company or affiliate that is responsible for the cost. Additionally, each transaction is identified with the utility, the

functional group, and the type of cost. The SAP GL system uses these transaction details to report the information by FERC account, as required by state and federal regulators.

Company witness Mr. Ross Baumgarten discusses further how the transition to SAP accounting and reporting is reflected in the Company's Cost Assignment and Allocation Manual (CAAM).

Q. HOW HAS THE SAP GL AND WAM IMPLEMENTATION CHANGED THE WAY THE COMPANY IS PRESENTING FINANCIAL BUDGETING DATA?

A. There are two main ways the SAP GL system is different from the JDE GL system. First, the SAP GL system replaces the old JDE Generally Accepted Accounting Principles (GAAP)-based "object accounts" with GAAP-based "cost elements." Second, with WAM implemented, we have an additional dimension that can be used to track and analyze data, known as Work Breakdown Structures (WBS). This second change provides the Company with an additional way to analyze data that provides insight into the types of activities that each business area in the Company undertakes.

Q. PLEASE EXPLAIN THE CHANGE FROM "OBJECT ACCOUNTS" TO GAAP-BASED "COST ELEMENTS."

A. The primary difference is that GAAP O&M and capital accounts were referred to as "object accounts" in the JDE GL system, whereas they are referred to as "cost elements" in the SAP GL system. Some of the cost elements are comparable, but most are different or new when compared to the JDE GL. This is largely a function of changing to a more streamlined and simplified chart of accounts.

Under the old JDE GL system, there were also separate sets of object accounts for O&M and capital costs. Within the SAP GL system, O&M and capital share the same cost elements and the type of cost is distinguished using other reporting attributes. This does change how our cost elements are mapped to FERC accounts, as I describe below.

Q. HAVE THERE BEEN ANY CHANGES IN THE WAY THE COMPANY PRESENTS ITS FINANCIAL DATA WITH RESPECT TO THE NEW WBSS THAT ARE PART OF THE SAP GL SYSTEM?

A. Yes. The SAP GL system facilitates the tracking of work activities using WBS to drive productivity improvements. Through the WBSs in SAP, we are able to budget, track, and analyze financial data by various activities such as "Electric Locates" in addition to being able to analyze data using FERC accounts, GAAP-based cost elements, and business areas within the Company's organizational hierarchy. This additional way of analyzing data helps support cost-management efforts of the Company.

Q. WITH THIS CHANGE IN FINANCIAL SYSTEMS, IS THE COMPANY ABLE TO PROVIDE AN AUDIT TRAIL MAP?

A. Yes. With my testimony, I am providing the Audit Trail map that allows review of expenses and tracking from "cost element" to FERC account as Exhibit___(MLO-1), Schedule 2 to my Direct Testimony.

Q. PLEASE EXPLAIN THE AUDIT TRAIL MAP.

A. The Audit Trail map provides a breakdown of 2021 O&M costs by cost category and GAAP cost element. It also includes the information by FERC account and grouping. Finally, it provides the business area, sub-area, and cost

center where the cost originated, along with the applicable business area witness to support that cost. Along with this information, the Audit Trail map includes summaries showing the following:

- Total 2022 O&M by FERC account
- Total 2022 O&M by GAAP cost element
- 2022 GAAP-based cost element O&M by Business Area

This data can then be filtered, and also support the expenses presented in Company witness Benjamin C. Halama's revenue requirements study. The data by business areas on the audit trail map may be slightly different than data shown in witness testimony. This is primarily due to minor differences in the way that costs are assigned to a business area in GAAP and FERC reporting. In total across all business areas, there is no difference.

Q. HAS THE MOVE TO THE SAP GL IMPACTED ANY OTHER BUDGET DOCUMENTATION THAT THE COMPANY PROVIDES IN ITS RATE CASES?

A. To a certain extent, yes. The outputs of the SAP GL in Volumes 5 and 6 of this case are slightly different in appearance from the JDE GL, which was used to provide the Company's budget documentation in Volumes 5, 6A, and 6B in past rate cases. In our current case, the Company has worked to provide all budget documentation that parties have previously found helpful in prior gas rate case filings or in more recent electric rate case filings, including some that is no longer required, although the reports themselves will appear somewhat different than in prior cases given this systems change.

F. Summary

Q. OVERALL, WHY DOES XCEL ENERGY PLACE SUCH AN EMPHASIS ON THE BUDGET PROCESS?

A. The budgeting process must produce a reasonable and representative reflection of the O&M and capital expenditures we expect to make because we use the resulting budgets both for financial management purposes and for development of test year costs. As a result, our budgets are essential to maintaining the utility operating companies' credibility with customers, regulators, and the investment community. That, in turn, requires each of the utility Operating Companies, including NSPM, to have in place a budget process that is transparent, understandable, and that reasonably reflects O&M and capital expenditures during the budget period.

Q. DOES BUDGET ACCURACY MEAN THAT ACTUAL RESULTS WILL ALWAYS MATCH BUDGETS?

A. No. The O&M and capital budgets are intended to reflect a reasonable and representative prediction of costs to be incurred by each business area to allow the utility Operating Companies to deliver services to their customers. Budget accuracy does not mean that every budgeted dollar is spent in exactly the same way that it was forecast to be spent, because circumstances will inevitably arise that will require deviations, both upward and downward, from planned levels. Likewise, it is not uncommon for actual capital expenditures to deviate from their budgeted levels for individual projects. Deviations from budget such as these do not mean that the budget was not reasonable and accurate.

What is important is that, overall, the budgets reflect a reasonable and representative prediction of costs to be incurred and that will allow the utility

operating companies to deliver safe and reliable services to their customers. The ongoing monitoring of actual expenditures and analysis of variances to budgeted levels discussed previously, help maintain an appropriate business area focus on expenditures, and facilitate any necessary adjustments to respond to changing circumstances.

III. CAPITAL AND O&M BUDGET ANALYSES

Q. PLEASE DESCRIBE THE BUDGET ANALYSES THE COMPANY HAS COMPLETED TO SUPPORT ITS TEST YEAR RATE REQUEST.

A. The Company has performed analysis of the budget proposed in the test year to various prior comparison periods. For capital investments, the Company has compared its actual to budget capital performance for 2018 through 2020. For O&M, we have also compared actual to budget performance for this same three-year period, and completed analyses comparing our overall 2022 test year O&M budget to actual and forecasted costs for various periods. As shown below in Table 1, these analyses and their supporting details can be found in this Application and my testimony as follows:

Table 1

Testimony Section	Analysis	Other Information
III.A	NSPM Total Company capital budget expenditures to actual costs for the previous three years, including the most recent fiscal year forecast (2018-2020).	Table 2 below.
III.B.1	NSPM Total Company and NSPM Gas O&M budget to actual costs for the previous three years, including the most recent fiscal year forecast (2018 - 2020).	Tables 3 and 4 below; Volume 6, Budget Documentation, Supplemental Reports Tab.
III.B.2	NSPM Gas 2022 test year O&M budget to 2020 actuals.	Volume 5, Budget Summary, Summary Reports Tab; Volume 6, Budget Documentation, Variance Explanations Tab
III.B.3	NSPM Gas 2022 test year O&M budget to 2021 forecast.	Exhibit___(MLO-1), Schedule 3
III.B.4	Inflation Analysis	Volume 5, IHS Markit Guideline Analysis

Q. PLEASE PROVIDE AN OVERVIEW OF YOUR CONCLUSIONS ABOUT THE 2022 TEST YEAR BUDGET, BASED ON THESE ANALYSES.

A. We believe that these analyses show that our 2022 test year budget is a reasonable and representative estimate of the costs to be incurred to provide our customers with reliable electric service. The overall analysis illustrates that our test year budget is consistent with historical costs with adjustments for major cost drivers, which are described through the various period-to-period analyses. As these analyses demonstrate, although we work to manage within our budgets by re-prioritizinag initiatives to absorb unforeseen cost increases, we exceed these budgets when additional investments are needed or unplanned work is required to provide reliable service to our customers. Where budgets exceed actuals and such deviation is within the Company's control, we learn and

adjust to better-prepare our budgets for the following year. Company witness Mr. Halama further discusses how our budget information supports our test year request, from a revenue requirement perspective.

Q. DOES THE COMPANY PROVIDE ANY OTHER ANALYSES WITH ADDITIONAL INFORMATION IN THIS RATE CASE?

A. Yes. Volume 6, Budget Documentation provides a comparison of NSPM 2020 actuals to the 2022 budget by FERC account with variance explanations. I also note that Company witness Mr. Halama discusses the drivers between the 2010 test year used in our last gas rate case and the 2022 test year used in the current rate case. In Volume 3, Required Information, we provide various historical comparisons of our FERC Form 1 and general ledger accounts.

Q. IS THE INFORMATION THE COMPANY PROVIDES IN VOLUMES 5 AND 6 REQUIRED BY MINN. STAT. § 216B.16?

A. No. The requirements for the information contained in Volumes 5 and 6 originated as a result of the general rate case the Company filed in 1989 (Docket No. E002/GR-89-865). After the Commission decision in that case, the Company and the Department of Commerce worked together to ensure the Company's budgets conformed to Commission requirements and the Company agreed with the Department to provide certain information with its initial rate case filing in the subsequent rate case based on the Company's financial and accounting systems in place at the time (Docket No. E002/GR-91-1). The Commission then ordered, in that same case, that certain additional budget information be filed in future rate case initial filings, including:

- A Data Resource Institute (DRI) index or comparable industry standard.

- Budget documentation by corporate areas (currently refered to as business areas)
- Translation reports linking cost elements with cost activities – including an audit trail.
- Bridge schedules showing all adjustments used in moving from unadjusted budget to rate case numbers.
- Summaries of all applicable budgets by FERC subaccounts.
- Monthly accountings and year-end and summary reports.

Q. HAS THE WAY THE COMPANY PROVIDES THIS INFORMATION CHANGED OVER TIME?

A. Yes. Many of these requests are nearly 20 years old and have been updated over time in our electric and gas rate cases. In the electric rate case the Company filed in 2005 (Docket No. E002/GR-05-1428), the Company updated certain information into a new format and provided a compliance matrix to track information back to the requirements of the 1991 case. In that case, the Company provided a new format as the Budget Summary and Correspondence (which included an executive summary, organization charts, allocation methods, variance explantions, budget schedules, budget process, summary reports, and budget instructions) and Budget Documentation (which included specific information by business unit). In its order in that case, the Commission directed the Company to continue to provide this information in our next general rate case. We provided budget information in this format in our last gas rate case, Docket No. G002/GR-09-1153 and do so again here, consistent with our electric rate case filings, since our budget processes are the same for both our electric and gas utilities.

The next major change occurred as a result of the electric rate case the Company filed in 2010 (Docket No. E002/GR-10-971), when the Commission ordered the Company to file, with its prior budget documentation, the FPT reports which compared budget to actual comparisons and variance explanations at the organizational level. Certain minor volume reorganizing occurred in subsequent electric rate cases. Additionally, in our 2019 electric rate case filing (Docket No. E002/GR-19-564), the Department recommended that information that had been previously made "available for inspection by other parties upon request," consistent with the Commission's order in Docket No. E002/GR-92-1185, should be electronically filed before the Commission finds Company's initial filing to be substantially complete. The Company has continued to attempt to meet these requirements that date back to 2010 and even 1991.

Q. ARE THERE ANY OF THESE REQUIREMENTS THAT ARE OUTDATED TO THE EXTENT THAT ALTERNATE OR REPLACEMENT INFORMATION MAY BE MORE APPROPRIATE TO AN EVALUATION OF THE COMPANY'S BUDGETING PROCESS AND ADEQUACY OF BUDGET DOCUMENTATION?

A. Yes. There are two requirements within the budget documentation that I request be discontinued: the O&M budget narratives and the capital substitution/contingent fund process and reports, provided in Volume 5 of this filing. As I describe further below, both of these documents are outdated and the budget information presented within each can be found elsewhere in the Company's filings with the Commission.

Q. WHY SHOULD O&M BUDGET NARRATIVES NO LONGER BE REQUIRED AS PART OF VOLUME 5 OF THE BUDGET DOCUMENTATION?

A. The O&M budget narratives were developed to describe the key budgeting assumptions that drive O&M costs overall. These topics are also covered within the O&M section of the testimony of each of the business area witnesses. Rather than include this same information separately and duplicatively within the budget narratives, the Company requests that the Commission eliminate the requirement for the narrative documents for all business area costs that are supported by an individual witness within this case. For those costs not directly discussed by an individual witness, such as some of the shared service organizations, the Company proposes to add a section in future rate case filings to the budget witness testimony to support these costs and any drivers from historical actuals to the requested forecast test year period.

Q. WHY DOES THE COMPANY REQUEST THAT THE CAPITAL SUBSTITUTION/CONTINGENT FUND PROCESS AND REPORTS ORIGINALLY ORDERED TO BE PROVIDED NEARLY 20 YEARS AGO NO LONGER BE REQUIRED AS PART OF VOLUME 5 OF THE BUDGET DOCUMENTATION?

A. The requirements for capital substitution/contingent fund process and reports, provided in Volume 5 of this filing, refers to a corporate process that no longer exists in the requested format. Further, the Company provides similar information, sufficient in detail in the monthly performance review packages included in Volume 6, to evaluate these capital substitutions and contingent fund processes and reports. This analysis provides support for the accuracy of budgets and the reallocation of funds through projects that are added, modified, or removed from the budget throughout the year. Additionally, Direct Testimony presented by the various business area witnesses includes a

description of their business area process for identifying projects and reallocating funds as needed when emergent work arises. Therefore, for subsequent rate case filings, I ask that the Commission no longer require that the Company include "month-by-month accounting of all transactions in the contingent funds and a year-end summary report of project substitution within each contingent fund by project type and project benefit" as a separate requirement (currently provided in Volume 5), as this information is already included in other reports provided in Volume 6.

A. Capital Budget Analysis

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS ABOUT THE 2022 TEST YEAR CAPITAL BUDGET, BASED ON YOUR ANALYSIS.

A. Table 2 below shows that on average over the past three years, our actual capital spending has trailed budgets by approximately (14) percent for the total NSPM Company. This total variance is being heavily influenced by a $700 million variance in 2019 related to wind project timing, the reasons for which were beyond the Company's control. If the wind project timing variances are removed, the Company's actual spending has only varied from the budgets by less than 2.0 percent. This demonstrates that our capital budgets are a reasonable estimate of the capital spending necessary to provide our customers with reliable service.

Table 2

NSPM Total Company Actual versus Budget Capital Expenditures ($millions)

Year	Budget Amount	Actual Amount	$ Variance	% Variance
2020	$2,043	$1,954	($89)	-4.36%
2019	$2,133	$1,471	($662)	-31.03%
2018	$1,374	$1,334	($40)	-2.93%
2018-2020 Total	**$5,550**	**$4,758**	**($791)**	**-14.3%**

Q. CAN YOU PROVIDE ADDITIONAL EXPLANATION FOR THE VARIANCES IN 2019?

A. Yes. Approximately $700 million of underruns in 2019 was related to the timing of payments on new wind farms, including Crowned Ridge, Jeffers, Community Wind North, Blazing Star I and II, and Freeborn. The wind payment timing changes were the result of permitting delays and in-service date changes.

B. O&M Budget Analyses

1. Budget to Actual Costs for Previous Three Years (2018-2020)

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS ABOUT THE COMPANY'S O&M BUDGETS OVER THE LAST THREE FISCAL YEARS, BASED ON YOUR ANALYSES.

A. Our analyses demonstrate that our O&M budgets, which over the past three years have varied by less than one percent from actual results for the Total NSPM Company, are a reasonable estimate of the costs to be incurred to provide our customers with reliable gas service. As shown in Table 3, the variance in 2020 is the largest variance noted at approximately 2 percent underrun to budget, which is due largely to the Company's response to financial uncertainty introduced by the COVID-19 public health emergency. As shown in Table 4, the results from the past three years for the NSPM Gas Utility show a three year total variance to budget of over 4 percent. The higher percentage

for the gas utility as compared to the total company results is a result of both the smaller base spend in the gas utility as well as discrete operational drivers in 2019 and 2020. In 2019, the overrun to budget was primarily driven by incremental costs associated with gas emergency response in 2019, which was determined to be an important area for investment above current budget levels to maintain adequate emergency response capabilities. In 2018, the largest contributor to the variance was a one-time write-off of costs associated with former Manufactured Gas Plant sites as well as incremental gas emergency response costs. These conclusions are illustrated by Tables 3 and 4, below.

Table 3

NSPM Total Company Actual versus Budget O&M ($millions)

Year	Budget Amount	Actual Amount	$ Variance	% Variance
2020	$1,217	$1,191	($26)	-2.1%
2019	$1,194	$1,203	$9	0.7%
2018	$1,205	$1,223	$18	1.5%
Three-Year Total	$3,616	$3,617	$1	0.0%

Table 4

NSPM Gas Utility Actual versus Budget O&M ($millions)

Year	Budget Amount	Actual Amount	$ Variance	% Variance
2020	$94	$90	($4)	-4.7%
2019	$88	$94	$6	6.5%
2018	$87	$97	$10	11.4%
Three-Year Total	$270	$281	$11	4.2%

2. Test Year Budget to Most Recent Year of Actuals (2020 to 2022)

Q. WHERE DO YOU PROVIDE AN ANALYSIS OF 2020 ACTUALS TO THE 2022 TEST YEAR BUDGET?

A. This analysis is contained in the Variances Explanations tab in Volume 6 of this filing. We provide this analysis in each rate case filing, including the current case.

Q. PLEASE DISCUSS THE PURPOSE OF THIS ANALYSIS.

A. This analysis provides additional information regarding year to year FERC account variances similar to that identified in Order Point 47 of the Commission's September 3, 2013 Order in our 2013 electric rate case (Docket No. E002/GR-12-961) and provided in Volume 3, Required Information. While this was ordered by the Commission in the Company's electric rate case, we have provided this information in this gas rate case as well. This information is part of the analysis the FF&R group performs in its review of the preliminary budgets. The analysis compares NSPM gas utility's O&M cost structure between the most recent complete fiscal year (2020) and the 2022 test year budget on a FERC account basis. It also provides explanations of the major

drivers of the cost increases / decreases for those areas that are changing by ±5 percent and ±$500,000.00.

Q. WHAT ARE THE RESULTS OF THIS ANALYSIS?

A. This analysis shows that NSPM gas utility's costs increase by $7.4 million, or 8.2 percent, between 2020 and the 2022 budget. This works out to an annual increase of approximately 4.0 percent. The largest driver of this increase is Distribution expenses have increased $5.1 million, or approximately 68 percent of the change, due to increased costs and volumes associated with locate activities ($1.5 million in FERC 874), and increased labor, contract labor, and materials costs associated with gas emergency response and compliance-related activities ($2.2 million, primarily in FERC 874 and 892). These cost increases are further discussed in the Direct Testimony of Ms. Joni Zich. Additional areas contributing to the increase include Manufactured Gas Plant Expenses and Administrative and General. These drivers are described in more detail below.

Q. WHAT HAS THE COMPANY EXPERIENCED FROM A BUDGET AND VARIANCE PERSPECTIVE IN LIGHT OF THE COVID-19 PUBLIC HEALTH EMERGENCY IN 2020?

A. As the Commission has acknowledged in other dockets related to rates and ratemaking involving analysis of spend in 2020, due to the impacts of COVID-19 public health emergency on our operations in 2020, our 2020 results alone may not provide appropriate guidance on the on-going cost of utility operations, expenses, or reasonableness of budgeting processes. In response to the unprecedented impact that the COVID-19 public health emergency has had on our communities, customers, and operations in 2020, business areas took swift actions to adjust operations to keep employees and the community safe as well

as to maintain financial flexibility as the Company faced uncertainties about the depth and duration of the impacts of COVID-19 on our operations. As a result, comparisons to the 2020 forecast may not reflect on-going operating cost levels due to the work modifications implemented in 2020.

Q. PLEASE PROVIDE MORE INFORMATION ABOUT THE VARIANCES BETWEEN 2020 AND 2022.

A. There are three primary areas contributing to the overall increase in costs between 2020 and 2022. First, as described above, the increased costs related to gas distribution expenses contributes almost 70 percent of the increase and is primarily related to the gas locates, gas emergency response, and compliance-related activities.

The second largest driver is Administrative and General expenses, which are expected to increase $1.2 million, or 4.6 percent between 2020 to 2022.

Approximately $0.6 million is driven by Business Systems spending in FERC 921 related primarily to increased investments to replace aging infrastructure, to address cyber security threats and requirements, to enhance the capabilities of the business, and to support enhancements to the customer experience (addressed in the Direct Testimony of Company witness Mr. Michael Remington). Other drivers of the increase include two years of employee compensation merit increases, which flow through a number of different FERC accounts, including account 920. Company witness Ms. Ruth Lowenthal discusses employee compensation in detail in her Direct Testimony.

Third, Manufactured Gas Production Expenses are expected to increase $1 million for anticipated remediation costs related to Manufactured Gas Plants. These costs are further discussed by Company witness Ms. Zich.

3. Test Year Budget to Current Year Forecast (2021 Forecast to 2022)

Q. PLEASE DISCUSS THE PURPOSE OF THE 2021 FORECAST TO 2022 TEST YEAR COMPARISON.

A. This analysis provides a comparison of the 2022 budget to forecasted O&M costs for the current year (2021), which shows how costs change between 2021 and the 2022 test year and helps identify major incremental cost drivers for the test year. This analysis also helps us to see how these cost changes align across the FERC chart of accounts. Exhibit___(MLO-1), Schedule 3 provides further detail.

Q. PLEASE DISCUSS THE RESULTS OF YOUR ANALYSIS OF THE 2021 FORECAST TO 2022 BUDGET.

A. This analysis shows that NSPM gas utility's costs increase by $7.2 million, or 7.9 percent between 2021 and 2022. The largest individual driver of increasing O&M between 2021 and the 2022 budget is Distribution expenses, which are increasing by $3.9 million, or 9.2 percent driven by increased costs primarily related to the gas locates, gas emergency response, and compliance-related activities.

The second largest driver is Administrative and General expenses, which are expected to increase $2.7 million, or 11.2 percent between 2021 to 2022, which is driven primarily by Business Systems spending to replace aging infrastructure, to address cyber security threats and requirements, to enhance the capabilities

of the business, and to support customer experience projects (addressed in the Direct Testimony of Company witness Mr. Michael Remington) as well as employee compensation merit increases, which flow through a number of different FERC accounts, including account 920. Company witness Ms. Ruth Lowenthal discusses employee compensation in detail in her Direct Testimony.

Lastly, Manufactured Gas Production Expenses are expected to increase $1 million for anticipated remediation costs related to Manufactured Gas Plants. These costs are further discussed by Company witness Ms. Joni Zich.

4. Market Inflation Analysis (2020 Actuals to 2022)

Q. HAS THE COMPANY COMPLETED ANY INFLATION ANALYSIS RELATED TO ITS TEST YEAR BUDGET?

A. Yes. Consistent with prior Commission direction, the Company has historically, for nearly two decades, provided an inflation analysis comparing the Company's test year to the most recent year of actual expenses inflated according to an industry standard.

Q. HOW DID THE COMPANY PREVIOUSLY PROVIDE THIS INFORMATION FOR REVIEW?

A. In the past, this analysis has been provided to the Department and the OAG informally on the day of filing of the Company's initial case and made available for review by other parties if requested, as the Commission directed in the Company's 1992 electric rate case order (Docket No. E002/GR-92-1185) and accepted in subsequent rate cases. The Department has, however, now requested that the Company file this information with its initial case for

completeness purposes. The Company therefore provides this information in Volume 5 of our rate case filing.

Q. PLEASE EXPLAIN THIS ANALYSIS.

A. This analysis provides a comparison of the 2022 budget to 2020 actuals escalated using IHS Markit Insights factors, which shows how the proposed 2022 budget deviates from inflation impacts. The analysis, which is provided in Volume 5 in detail, shows that the 2022 budget is consistent with escalated levels, with a $1.4 variance in total. The increase is driven by similar cost factors as discussed in the 2020 actual to 2022 budget analysis above. The largest driver of the increase is Distribution Expenses, which has increased $2 million due primarily to increased costs associated with damage prevention. Additional areas contributing to the increase include Manufactured Gas Production Expenses ($1 million) offset by reductions in Customer Accounts Expenses and Administrative and General Expenses. These drivers are described in more detail within Volume 5.

IV. CONCLUSION

Q. PLEASE SUMMARIZE YOUR TESTIMONY

A. Our budgeting processes are designed to ensure that the Company's capital and O&M budgets provide reasonable and representative forecasts of the costs necessary to provide safe and reliable service to our customers. Our processes emphasize the importance of accuracy, facilitate business area accountability, and ensure executive involvement and oversight. After budgets are established, the Company's ongoing financial governance process allows us to continue to monitor our business plans and financial forecasts. This ongoing monitoring

1 provides flexibility and facilitates any necessary adjustments to spending to
2 respond to changing circumstances. Finally, our budgeting variance analyses
3 demonstrate our robust overall governance and budget management.
4
5 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
6 A. Yes, it does.

Statement of Qualifications

Melissa L. Ostrom

PROFESSIONAL EXPERIENCE

XCEL ENERGY

DIRECTOR FINANCIAL FORECASTING AND REPORTING 2020-present

- Responsible for the O&M and capital budget, forecast and analysis process, preparation of standardized internal management reports and master data policies, rules and standards for the Finance organization
- Oversee and provide direction on long range financial forecast and financial strategies

DIRECTOR REPORTING AND FINANCIAL DATA GOVERNANCE 2019-2020

- Responsible for the production and distribution of standardized internal management reports, the execution and sustainment of master data policies, rules and standards for the Finance organization

DIRECTOR CAPITAL ASSET ACCOUNTING 2016-2018

- Responsible for overall capital asset accounting policies, the day-to-day maintenance of accounting and tax records for capital assets, and the related reporting and regulatory requirements for Xcel Energy and its subsidiaries
- Provide expert testimony on topics of capital assets, depreciation, deferred tax accounting, including impacts of federal tax reform, and asset sales in various Xcel Energy jurisdictions

MANAGER CAPITAL ASSET ACCOUNTING 2013-2016

MANAGER, BUDGETING & FORECASTING FOR ENERGY SUPPLY 2012-2013

SENIOR ACCOUNTING ANALYST 2010-2012

DELOITTE & TOUCHE, LLP

AUDIT & ASSURANCE SENIOR ANALYST 2009-2010

AUDIT & ASSURANCE ANALYST 2007-2009

EDUCATION/PROFESSIONAL LICENSES

University of Wisconsin - B.A. Degree, Major-Accounting
University of Wisconsin – Master of Accountancy Degree
Certified Public Accountant, Inactive
