

December 2013

## Don't Miss Out on Earning a Bonus Rebate and Gaining Energy Savings

### BONUS PROMOTION

Complete your Efficiency Controls project and get up to a 30% bonus rebate!

If you've prequalified for or are considering a Minnesota Efficiency Controls project, you may be eligible to receive a 30% bonus rebate and save even more on your energy efficient improvement project.

### When you take advantage of our Efficiency Controls program, you can:

- Offset the cost of the new building control equipment by earning rebates.
- Integrate equipment monitoring and control.
- Centralize building system operations.
- Enhance occupant comfort and increase customer satisfaction.
- Reduce energy use and improve your bottom line.

### Act soon!

- Earn rebates to boost the return on your investment. The more energy your Efficiency Controls project saves, the higher your rebate amount can be. Plus earn a potential rebate bonus and save more:  
**30% bonus** — implement and complete your project and submit your invoices **December 1, 2013 through June 30, 2014.**
- This offer is only available to Xcel Energy Minnesota electric or gas customers. Invoices must be dated after August 1, 2013 to qualify for a bonus. The 30% bonus is determined by the date invoices are received by your Xcel Energy account manager or energy efficiency specialist. Standard program rules apply; see application on **xcelenergy.com** for details.

### Questions?

For more information, contact your Xcel Energy account representative, account manager or call an energy efficiency specialist at **1-800-481-4700**.
