

LED REBATE GUIDE

INFORMATION SHEET
**COLORADO | MINNESOTA
 NEW MEXICO | SOUTH DAKOTA**

Updated September, 2022

To qualify for a rebate, these LED products must be found on or comparable to the DesignLights Consortium's (DLC) Qualified Product and/or ENERGY STAR® lists. Rebates are also available for non-DLC and non-ENERGY STAR products with a 25% reduced rebate. The DLC eligible product definitions can be found at designlights.org/solid-state-lighting/qualification-requirements/product-eligibility/.

Use the charts below to match Xcel Energy rebates with the product categories that are listed on the DLC QPL or ENERGY STAR website.

Eligible for prescriptive rebates or instant rebates

XCEL ENERGY REBATE	STATE(S)	DLC OR ENERGY STAR ELIGIBLE PRODUCTS
Outdoor category		
LED wall pack fixture – exterior and parking garage	CO, MN, NM, SD	Outdoor full-cutoff wall-mounted area luminaires or outdoor non-cutoff and semi-cutoff wall-mounted area luminaires
LED parking garage fixtures	CO, MN, NM, SD	Parking garage luminaires
Exterior LED canopy fixtures	CO, MN, NM, SD	Fuel pump canopy luminaires
LED area and street lighting**	CO, MN, NM, SD	Outdoor pole/arm-mounted area, roadway luminaires, and bollards.
Indoor category		
LED downlight fixtures*	CO, MN, NM, SD	Downlight - recessed, surface mount or pendant mount
LED exit signs	CO, MN, NM, SD	LED exit signs do not need to follow the DLC requirement until further notice.
LED Screw-in and pin-based lamps*	CO (instant rebates), MN (instant & prescriptive rebates), SD (prescriptive), NM (prescriptive)	LED A-lamp LED PAR 16, 20, 30, 38 LED R20, 30, 40 LED BR30, 40, ER30, 40 LED MR16 lamp LED Decorative (B, BA, BT, C, DC, F, G, P, S, ST, T)
LED replacements for HID lamps	CO (instant rebates), MN, NM, SD	Mogul screw-base replacements for HID lamps for high/low-bay luminaires (internal driver/UL type B) E26*** and E39 lamps that are Energy Star listed will receive the DLC rebate Replacement lamps for parking garage luminaires (type B)
Refrigerated LED case lighting 5- and 6-foot doors	CO, MN, NM, SD	Vertical refrigerated case luminaires
LED high/low bay fixture	CO, MN, NM	High-bay luminaires for commercial and industrial buildings High-bay aisle luminaires for commercial and industrial buildings Low-bay luminaires for commercial and industrial buildings
LED troffer fixture	CO, MN, NM	2x2 Luminaires for ambient lighting of interior commercial spaces 1x4 Luminaires for ambient lighting of interior commercial spaces 2x4 Luminaires for ambient lighting of interior commercial spaces
LED ambient fixtures	CO, MN, NM	Direct linear ambient luminaires
Stairwell fixture	CO, MN, NM, SD	Stairwell and passageway luminaires

* This equipment is qualified through ENERGY STAR

** Customers in MN must be on an A34 Street Light Rate to qualify. New construction street lighting includes: Outdoor Pole/Arm-Mounted Decorative Luminaire.

*** E26 lamps that are Energy Star listed receive the DLC rebate only in MN. In CO E26 lamps receive the non-DLC rebate amount.

BUSINESS LIGHTING EFFICIENCY

**COLORADO | MINNESOTA
NEW MEXICO | SOUTH DAKOTA**

Eligible for prescriptive rebates or instant rebates

XCEL ENERGY REBATE	STATE(S)	DLC ELIGIBLE PRODUCTS
Indoor category		
LED linear tubes	CO	2', 4', 8' - instant
	MN	2', 3', 4', 8' - retrofit
	NM	4' - retrofit
	SD	2', 4', 8' - retrofit
<ul style="list-style-type: none"> • Replacement lamps ("plug and play") (UL type A) • External driver lamp-style retrofit kits (UL type C) • Dual mode internal driver (UL type A or B) • Internal driver/line voltage Lamp-style retrofit kits (UL type B) 		
LED PL Lamps	CO (instant rebates), MN, NM	Two-pin and four pin-base Type A and Type B replacement lamps for CFLs
Indoor Agriculture category		
LED grow lights	CO, MN	See rebate application for qualifying details.

Eligible for prescriptive rebates

XCEL ENERGY REBATE	STATE(S)	DLC OR ENERGY STAR ELIGIBLE PRODUCTS
Indoor retrofit kit category		
LED retrofit kit for downlights*	CO (instant rebates), MN (instant & prescriptive rebates), SD (prescriptive), NM (prescriptive)	Downlight - solid state retrofit kit
Retrofit kit for high/low bay fixture	CO, MN	Retrofit Kits High-Bay Luminaires/High-Bay Aisle Luminaires/Low-Bay Luminaires for Commercial and Industrial Buildings
Retrofit kit for LED direct linear ambient fixtures	CO, MN	Retrofit kits for direct linear ambient luminaries
Retrofit kit for LED troffers	CO, MN, NM	Linear-style retrofit kits for 2x2, 1x4, and 2x4 luminaires for ambient lighting of interior commercial spaces

Eligible for controls rebates

XCEL ENERGY REBATE	STATE(S)	DLC ELIGIBLE PRODUCTS
Standalone Indoor category		
Occupancy sensor	CO, MN, NM, SD	See rebate application for qualifying details.
Daylighting (photocell) sensor		
Occupancy and daylighting (photocell) sensor		
High-end trim	CO, MN	
Networked Indoor category		
Networked lighting controls	CO, MN, NM, SD	See rebate application for qualifying details.

* This equipment is qualified through ENERGY STAR

Eligible for custom efficiency rebates, not prescriptive

XCEL ENERGY REBATE	STATE(S)	DLC ELIGIBLE PRODUCTS
Outdoor category		
Custom rebate	CO, MN, NM, SD	Landscape/accent flood and spot luminaires Architectural flood and spot luminaires Mogul screw-base replacements for HID lamps for outdoor pole/arm-mounted area and roadway luminaires (internal driver/type B and external driver/type C) Mogul screw-base replacements for HID lamps for outdoor full-cutoff wall-mounted area luminaires (internal driver/type B and external driver/type C) Mogul screw-base replacements for HID lamps for outdoor decorative luminaires (internal driver/type B and external driver/type C) Mogul screw-base replacements for HID lamps for fuel pump canopy luminaires (internal driver/type B and external driver/type C) Mogul screw-base replacements for HID lamps for parking garage luminaires (external driver/type C)

Eligible for custom efficiency rebates, not prescriptive

XCEL ENERGY REBATE	STATE(S)	DLC ELIGIBLE PRODUCTS
Indoor category		
Custom rebate	CO, MN, NM, SD	Wall-wash luminaires Track or mono-point directional luminaires Horizontal refrigerated case luminaires Display case luminaires Linear ambient luminaires with indirect component

Indoor and outdoor retrofit kit and linear replacement lamp categories			
Custom rebate	Outdoor retrofit kit category	CO, MN, NM, SD	Retrofit kits for outdoor pole/arm-mounted area and roadway luminaires
			Retrofit kits for outdoor pole/arm-mounted decorative luminaires
			Retrofit kits for large outdoor pole/arm-mounted area and roadway luminaires
			Retrofit kits for outdoor wall-mounted area luminaires
			Retrofit kits for parking garage luminaires
			Retrofit kits for fuel pump canopy luminaires
	SD	Retrofit kits for high bays Retrofit kits for troffers	

Product eligibility definitions

ELIGIBLE LUMINAIRES

- **Outdoor pole/arm-mounted area and roadway luminaires.** Typical street lights, parking lot lights. May be cobra-head shaped, shoe-box, etc.
- **Outdoor full-cutoff wall-mounted area luminaires.** Typically walkway or security lights, affixed to building wall. May be box-shaped. These products produce no uplight.
- **Outdoor non-cutoff and semi-cutoff wall-mounted area luminaires.** Typically walkway or security lights, affixed to building wall. Commonly known as “wall packs” and may be box-shaped. The products produce a non-negligible amount of uplight. Products in this group are meant to be fixed in place and provide general illumination, not directional light.
- **Bollards.** Architectural outdoor lighting fixtures comprising short, upright ground-mounted units, typically giving off light from the top or the sides, and used to illuminate walkways, steps, or pathways.
- **Parking garage luminaires.** Ceiling-mounted luminaires for use outdoors or in locations open to elements in multi-deck garages.
- **Fuel pump canopy luminaires.** Ceiling-mounted luminaires for use outdoors or in locations open to elements in gas station canopies.
- **Stairwell/passageway luminaires.** Corner- or surface-mounted luminaires that provide lighting in stairwells and passageways. Luminaires must meet one of the following conditions: include integral controls, operate off of remote sensors where remote sensor is packaged together with the luminaire under a single model number, or be designed to operate off of remote sensors, where the

BUSINESS LIGHTING EFFICIENCY

COLORADO | MINNESOTA
NEW MEXICO | SOUTH DAKOTA

luminaire and sensors are sold separately, but the luminaire has features enabling communication with a remote sensor. Controls must assure the luminaire reverts to lower-power, lower-light output state when there are no occupants in the vicinity.

- **Vertical refrigerated case luminaires.** Strip lights in refrigerator cases, vertically mounted along refrigerator case door mullions. Category covers only complete luminaires, with all necessary components. Replacement lamps are not currently eligible under this category.
- **1x4, 2x2, and 2x4 luminaires for ambient lighting of interior commercial spaces.** Common recessed, suspended, or surface-mounted fixtures intended to provide ambient lighting in settings such as office spaces, schools, retail stores, and other commercial environments. Products submitted in these categories must meet the stated form factors with a tolerance of ± 4 inches.
- **Direct linear ambient luminaires.** Suspended- or surface-mounted luminaires or recessed luminaires, no wider than 12", designed to provide direct lighting in indoor spaces. Products may be designed to be installed end-to-end to create long chains, and may be described as direct, indirect, semi-direct, semi-indirect, or general ambient, depending on intended lighting distribution. Utilitarian "strip" style fixtures are also eligible under this category. Products intended for cove lighting are not currently eligible under this category.
- **High-bay luminaires for commercial and industrial buildings.** Pendant, recessed, or surface-mounted fixtures specific for indoor high ceiling spaces (intended for ceilings $\geq 25'$).
- **Low-bay luminaires for commercial and industrial buildings.** Pendant, recessed, or surface-mounted fixtures specific for indoor ceiling spaces (intended for $< 25'$).
- **High-bay aisle luminaires for commercial and industrial buildings.** Pendant or surface-mounted fixtures specific for indoor high ceiling spaces (intended for ceilings $\geq 25'$), in locations that require lighting of aisles.
- **Downlight luminaires.** A small direct-lighting unit that directs the light downward and can be recessed, surface mounted or suspended.

ELIGIBLE RETROFIT KITS

- **Troffer retrofit kits with integrated style for 2x2, 1x4, and 2x4 luminaires for ambient lighting of interior commercial spaces.** Troffer retrofit kits that replace all reflectors and optical systems of the existing luminaire, effectively creating a completely new luminaire.
- **Troffer retrofit kits with linear style for 2x2, 1x4, and 2x4 luminaires for ambient lighting of interior commercial spaces.** Tube-shaped or strip-style retrofit kits for troffers. Products in this category do not replace the optical systems of the existing luminaire, and leave the basic form of the existing luminaire intact.
- **Retrofit kits for high-bay luminaires for commercial and industrial buildings.** Integrated-style kits that replace all reflectors and optical systems of existing luminaires. Not screw-in "lamps" intended as HID replacements.
- **Retrofit kits for low-bay luminaires for commercial and industrial buildings.** Integrated-style kits that replace all reflectors and optical systems of existing luminaires. Not screw-in "lamps" intended as HID replacements.
- **Retrofit kits for downlights** A type of luminaire intended to install into an existing downlight, replacing the existing light source and related electrical components, typically employing an ANSI standard lamp base, either integral or connected to the downlight retrofit by wire leads, and is a retrofit kit classified or certified to UL 1598C.
- **Retrofit kits for direct linear ambient luminaries.** Retrofit kits for "strip" luminaires and other types of linear ambient luminaires. Do not employ existing lamp holders or "pin" bases.

ELIGIBLE MOGUL (E39 AND E40) SCREW-BASE REPLACEMENT LAMPS

- **Mogul screw-base replacements for HID lamps for parking garage luminaires (internal driver/type B).** LED replacement lamps for HID lamps which require the existing HID ballast to be bypassed and the lamp holder to be wired with line voltage, used in parking garage luminaires. Only mogul-base (E39 and E40) products are eligible. Lamps are only considered qualified in the end-uses they are listed in.
- **Mogul screw-base replacements for HID lamps for high-bay luminaires (internal driver/type B).** LED replacement lamps for HID lamps which require the existing HID ballast to be bypassed and the lamp holder to be wired with line voltage, used in high-bay luminaires. Only mogul-base (E39 and E40) products are eligible. Lamps are only considered qualified in the end-uses they are listed in.
- **Mogul screw-base replacements for HID lamps for low-bay luminaires (internal driver/type B).** LED replacement lamps for HID lamps which require the existing HID ballast to be bypassed and the lamp holder to be wired with line voltage, used in low-bay luminaires. Only mogul-base (E39 and E40) products are eligible. Lamps are only considered qualified in the end-uses they are listed in.

ELIGIBLE LINEAR REPLACEMENT LAMPS

- **Linear replacement lamps ("plug and play") (UL type A). Four- and two-foot "tubes" designed to replace four- or two-foot fluorescent lamps, respectively.** Products in this category employ lamp holders to connect to the fixture being retrofitted and are designed to be "plug and play" replacements for fluorescent lamps. That is, products in this category can operate off an existing fluorescent ballast, and do not require mechanical or electrical changes to the fixture. Note that due to testing considerations, at this time only products that can operate off electronic instant start ballasts are eligible. Replacement lamps designed to operate off existing magnetic ballasts, or off other types of electronic ballasts, are not eligible. Please note reference to UL type is derived from UL 1993, 4th edition, 2012-12-04 Section SA6.13.1. (See Linear Replacement Lamps page for more detail on testing requirements).

BUSINESS LIGHTING EFFICIENCY**COLORADO | MINNESOTA
NEW MEXICO | SOUTH DAKOTA**

- **Internal-driver/line voltage linear lamp-style retrofit kits (UL Type B). Four- and two-foot “tubes” designed to replace four- or two-foot fluorescent lamps, respectively.** Products in this category employ lamp holders to connect to the fixture being retrofitted, but do not operate off the existing fluorescent ballast. These products require rewiring of the existing fixture to bypass the ballast and send line voltage directly to the lamp holders. Please note reference to UL type is derived from UL 1993, 4th edition, 2012-12-04 Section SA6.13.1. (See Linear Replacement Lamps page for more detail on testing requirements) NOTE** Internally-driven lamps that can operate either off a fluorescent ballast or off line-voltage will be denoted as “Dual Mode” on the QPL. Products must be tested under worst-case operating condition.
- **External-driver linear lamp-style retrofit kits (UL type C). Four- and two-foot “tubes” designed to replace four- or two-foot fluorescent lamps, respectively.** Products in this category employ lamp holders to connect to the fixture being retrofitted, do not operate off the existing fluorescent ballast, and require rewiring of the existing fixture to replace the ballast with an external driver. The lamp holders are then wired to receive only the low-voltage electricity that is supplied by that external driver. Note that due to testing considerations, only one- or two-lamp four-foot lamp systems, or one- and three-lamp two-foot lamp systems are eligible. Development of provisions for systems with alternative numbers of lamps operating off single drivers is under consideration. Please note reference to UL type is derived from UL 1993, 4th edition, 2012-12-04 Section SA6.13.1. (See Linear Replacement Lamps page for more detail on testing requirements).
- **Dual mode internal driver linear replacement lamps (UL type A and type B).** Four- and two-foot “tubes” designed to replace four- or two-foot fluorescent lamps, respectively. Products in this category have the ability to operate off the existing fluorescent ballast and also have the ability to operate off of line voltage if the troffer is rewired to bypass the ballast. These products connect to the troffer using standard pin-base connections to the lamp holders. Note that at this time only products that can operate off electronic instant start ballasts are eligible. Products that are designed to operate off magnetic or non-instant start electronic ballasts are not eligible. Please note reference to UL type is derived from UL 1993, 4th edition, 2012-12-04 Section SA6.13.1. (See Linear Replacement Lamps page for more detail on testing requirements).

ELIGIBLE TWO PIN AND FOUR PIN-BASE REPLACEMENT LAMPS FOR CFLS

- **Two pin and four pin-base replacement lamps for CFLs (“plug and play”) (UL type A).** G24q- and GX24q-base LED lamps, designed to replace compact fluorescent lamps (CFLs). Products in this category employ the G24q (4-pin) lamp holder (“socket”) to connect to the fixture being retrofitted, and are designed to be “plug and play” replacements for the fluorescent lamps. That is, products in this category are intended to operate directly off the existing CFL ballast, and do not require mechanical or electrical changes to the fixture to “bypass” the existing ballast. Questions?

Please contact an energy efficiency specialist at **855-839-8862** for more information. To learn more about our Lighting Efficiency and Custom Efficiency programs, visit xcelenergy.com/Business.

Lighting Efficiency Program FAQs

Our Lighting Efficiency program offers flexible rebate options to provide our customers with greater control in selecting energy-efficient lighting technologies. Here are answers to some questions we typically receive.

1. **Question:** Does the new fixture have to be DLC or ENERGY STAR listed?
Answer: For the CO, MN and NM Lighting programs, any non-DLC- or non-ENERGY STAR listed equipment can now be rebated prescriptively, provided there is a current prescriptive rebate, and receive 75% of the DLC or ENERGY STAR rebate level. However, the South Dakota Lighting program only offers rebates for DLC and ENERGY STAR listed fixtures and bulbs.
2. **Question:** Can I remove whatever technology I want?
Answer: No. The removed technology rules remain unchanged. The lighting upgrade which you earn a rebate for needs to result in a reduction in wattage. Check the rebate application for the types of existing equipment which can be replaced/ upgraded with rebate-eligible technologies.
3. **Question:** Can I install any wattage I want?
Answer: No. The installed fixture wattage still needs to be within the prescriptive wattage ranges listed on the rebate application form.
4. **Question:** Can I apply for a prescriptive rebate for a project that was previously preapproved through your Custom Efficiency program?
Answer: Yes. If the previously preapproved project is still within the 2-year preapproval window, you can now apply for a prescriptive rebate, assuming that it meets the new prescriptive guidelines. You can decide whether to earn a rebate through Custom Efficiency or prescriptive offering.
5. **Question:** Do I still have to indicate the wattage of the removed technology on the application form?
Answer: Yes. We still need it for our records, but the wattage will not preclude you from receiving a rebate.

BUSINESS LIGHTING EFFICIENCY

COLORADO | MINNESOTA
NEW MEXICO | SOUTH DAKOTA

- 6. Question:** Do your one-for-one installation rules still apply for the prescriptive program?
Answer: Our requirements have changed. Non one-for-one projects may be submitted through the prescriptive program, however, projects where the baseline fixtures are reduced by 50 percent or more are not qualified for lighting retrofit rebates but can be considered through new construction lighting if applicable.
- 7. Question:** On non-DLC and ENERGY STAR equipment, will we be able to earn a rebate for non-DLC listed fixtures under different categories? For example, can a DLC canopy fixture be rebated as a parking garage fixture?
Answer: No, customers will earn a rebate for the equipment installed, for this example, the canopy fixture. This canopy fixture can be installed in a parking garage, but will earn the LED Canopy fixture rebate level not the parking garage fixture rebate level.
- 8. Question:** On non-DLC and non- ENERGY STAR equipment, how do you define the rebate category the non-DLC fixture qualifies for?
Answer: Non-DLC and non- ENERGY STAR products must meet the DLC or ENERGY STAR product eligibility category definition that is listed with each rebate category section on the rebate application to qualify for a prescriptive rebate.
Product eligibility definitions can be found at designlights.org/solid-state-lighting/qualification-requirements/product-eligibility/ or within this document, the LED Rebate Guide. Xcel Energy is not using DLC or ENERGY STAR technical requirements to qualify products. Technical requirements are the actual performance metrics (i.e. minimum light output (lm)) verses the product eligibility definition which is a written product description.
- 9. Question:** On non-DLC and non-ENERGY STAR equipment, can customers earn a prescriptive rebate for a fixture that is DLC listed under a primary use category that is currently custom but the specification sheet lists the fixture as a fixture type that is prescriptive? For example, can an LED area light that is only DLC listed as a flood light luminaire be rebated as an area light?
Answer: No, flood lights cannot earn area light rebates. Flood light luminaires or retrofit kits for exterior applications only qualify as a Custom product category and cannot earn a prescriptive rebate. Please reference page 2 of this document for a complete listing of DLC eligible products that are available only through Custom Efficiency.
- 10. Question:** On non-DLC and non-ENERGY STAR equipment, do the changes apply to the CO and MN Business LED Instant Rebate program?
Answer: The non- DLC and non-ENERGY STAR equipment changes apply to the Business LED Instant rebate program started January 1, 2018.
- 11. Question:** On non-DLC and non-ENERGY STAR equipment, do the changes apply to the New Construction prescriptive rebates?
Answer: Yes, the non-DLC and non-ENERGY STAR equipment changes also apply to New Construction prescriptive rebates, with the exception of the South Dakota Lighting program. Please see the rebate application for additional details.
- 12. Question:** Starting January 1, 2018, do products that are not listed on DLC QPL 4.0 earn a non-DLC rebate?
Answer: Yes. As of January 1, 2018 all products that are not listed on the DLC QPL 4.0 will be eligible for the non-DLC rebate level at 75% of the DLC listed rebate level.

Have other questions? Please contact your account manager or an energy efficiency specialist at 855-839-8862. For more information about our Lighting Efficiency Rebate program, visit xcelenergy.com/LightingEfficiency.
