

YOU HAVE THE POWER TO SAVE

With the Flex Pricing Pilot, My Account gives you more helpful insights about your energy use and your bill.

Want to see how much energy you used between 3 and 8 p.m. last Wednesday? You can do that. Want more detail? You can see your energy use down to five-minute increments, like between 3:05 and 3:10 p.m. Want to see how that energy use affected your bill? Yep, you can see that, too. Your energy use information is available to view in My Account after 24 hours by clicking on the “My Energy” button.

Find the best place to start saving

Based on patterns in your energy use and information you share about your home, My Account can estimate which appliances make up your monthly bill. For example, if you know that kitchen appliances make up most of your electric bill, you know that making a few changes to your kitchen routine is your biggest opportunity to save money.

More information means more power to save with Flex Pricing.

Get started at [MyAccount.xcelenergy.com](https://myaccount.xcelenergy.com) and click on the “My Energy” button. Find tips to save in every room at xcelenergy.com/FlexPricing.
