

COMMERCIAL REFRIGERATION EFFICIENCY PROGRAM

INFORMATION SHEET
COLORADO

COOL DOWN YOUR REFRIGERATION ENERGY COSTS

A well-operating refrigeration system is key to the success of your business. It keeps food fresh, beverages chilled and customers happy. It's also likely to be one of the highest energy costs for your business. Xcel Energy's Commercial Refrigeration Efficiency program is designed to help stretch your energy dollar, while also ensuring the highest quality in products and services.

THREE SIMPLE STEPS TO SAVING

1. Sign up for a free refrigeration energy assessment

An energy advisor will conduct a no-obligation, on-site review of your refrigeration systems and provide recommendations on how you can reduce your monthly energy costs.

2. Receive free installation of energy-saving products

During your assessment, you will receive energy-saving products, such as screw-in LEDs for walk-in freezers and coolers, pre-rinse spray valves and aerators, along with a coil cleaning brush and informational sheet on coil maintenance—all at no cost to you.

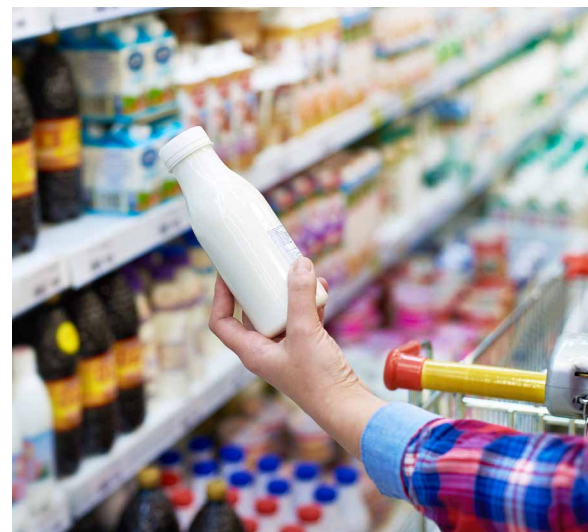

3. Install qualifying refrigeration equipment and apply for rebates*

Want to install recommended energy-saving refrigeration equipment? Contact a trade partner to start the project, and we can help you complete your rebate paperwork!

Which energy-saving projects qualify for rebates?

- Anti-sweat heater controls
- Demand-controlled kitchen ventilation
- ENERGY STAR® commercial dishwashers
- Electronically commutated fan motors for reach-in cases
- Electronically commutated fan motors for walk-in freezers or coolers
- LED display-case lighting
- Replace cases with anti-sweat heaters with no-heat case doors
- Installation of new efficient reach-in cases with doors
- Retrofit of open multi-deck cooler cases with solid glass doors

*While it is recommended, you are not required to complete an energy assessment before applying for rebates.

WHY SHOULD I PARTICIPATE?

Enhance the appearance of your business.

Improve comfort and safety.

Extend your equipment life.

Reduce maintenance issues.

Speed up your return on investment through valuable rebates.

Does my business qualify?

The Xcel Energy Commercial Refrigeration Efficiency program is available to customers with a valid Xcel Energy commercial account in our Colorado electric service territory. Call **877.287.2250** to verify your eligibility.

Three simple ways to get started

1. Schedule your free energy assessment and direct install. Call the program team at **877.287.2250** or email **xcelcre@clearesult.com**.
2. Find more information on eligible rebates or a trade partner at **xcelenergy.com/CommFridge**.
3. Get started on your own! Work directly with your trade partner or visit **xcelenergy.com/CommFridge** to find the rebate application.
