GLOSSARY OF ACRONYMS AND DEFINED TERMS

<u>Acronym/Defined Term</u>	<u>Meaning</u>
ADIT	Accumulated Deferred Income Taxes
Commission	Public Utility Commission of Texas
ERISA	Employee Retirement Income Security Act
EROA	Expected Return on Assets
FAS	Statement of Financial Accounting Standard
FERC	Federal Energy Regulatory Commission
GAAP	Generally Accepted Accounting Principles
HSA	Health Savings Account
IBNR	Incurred But Not Reported
IRC	Internal Revenue Code
LTD	Long-Term Disability
NCE	New Century Energies
O&M	Operation and Maintenance
PBGC	Pension Benefit Guaranty Corporation
PBO	Pension Benefit Obligation
PURA	Public Utility Regulatory Act
SPS	Southwestern Public Service Company, a New Mexico corporation
Test Year	April 1, 2018 through March 31, 2019
WACC	Weighted Average Cost of Capital
Xcel Energy	Xcel Energy Inc.
XES	Xcel Energy Services Inc.

LIST OF ATTACHMENTS

<u>Attachment</u>	<u>Description</u>
RRS-RR-1	Calculation of Deferred Pension and OPEB Balances (<i>Filename: RRS-RR-1.xls</i>)
RRS-RR-2	2018 Actuarial Report Excerpts (<i>Non-native format</i>)
RRS-RR-3	2019 Actuarial Report Excerpts (<i>Non-native format</i>)
RRS-RR-4	Calculation of Actuarially Determined Pension and Benefit Amounts (<i>Filename: RRS-RR-4.xls</i>)
RRS-RR-5	Calculation of Active Health and Welfare Amounts (<i>Filename: RRS-RR-5.xlsx</i>)
RRS-RR-6	Average Balances of Qualified and Non-Qualified Pension Fund Amounts (<i>Filename: RRS-RR-6.xls</i>)
RRS-RR-7	Development of Qualified Pension Asset Balance (<i>Filename: RRS-RR-7.xlsx</i>)

**DIRECT TESTIMONY
OF
RICHARD R. SCHRUBBE**

1 **I. WITNESS IDENTIFICATION AND QUALIFICATIONS**

2 **Q. Please state your name and business address.**

3 A. My name is Richard R. Schrubbe. My business address is 401 Nicollet Mall,
4 Minneapolis, Minnesota 55401.

5 **Q. On whose behalf are you testifying in this proceeding?**

6 A. I am filing testimony on behalf of Southwestern Public Service Company, a New
7 Mexico corporation (“SPS”), which is a wholly-owned electric utility subsidiary
8 of Xcel Energy Inc. (“Xcel Energy”).

9 **Q. By whom are you employed and in what position?**

10 A. I am employed by Xcel Energy Services Inc. (“XES”), the service company
11 subsidiary of Xcel Energy, as Area Vice-President of Financial Analysis and
12 Planning.

13 **Q. Please briefly outline your responsibilities as Area Vice-President of**
14 **Financial Analysis and Planning.**

15 A. My responsibilities include the oversight and management of the Business Area
16 Finance group, which includes Energy Supply, Transmission, Distribution, Gas
17 Engineering & Operations, and Corporate Services. Within that group, I oversee
18 budget planning, reporting, and analysis. I am also responsible for the accounting
19 for all employee benefits programs, playing a liaison role with the Human
20 Resources department, external actuaries, and senior management with benefit
21 fiduciary roles for Xcel Energy and its subsidiaries. I am also responsible for

1 coordinating the benefits operation and maintenance (“O&M”) and capital
2 budgeting and forecasting processes, as well as the monthly analysis of actual
3 results against these budgets and forecasts.

4 **Q. Please describe your educational background.**

5 A. I received a Bachelor of Science degree, with a major in finance, from Marquette
6 University in 1996.

7 **Q. Please describe your professional experience.**

8 A. From 2000 to 2005, I was employed by the DoALL Company, first as a Staff
9 Accountant, later as Assistant Controller, and then as Corporate Controller. From
10 2005 to 2007, I was employed by Wilsons Leather as a Financial Analyst. In
11 2007, I joined XES as a Consultant. I became the Manager of Corporate
12 Accounting in 2010 and the Director of Corporate and Benefits Accounting in
13 2013. Additionally, in 2014, I was assigned responsibilities associated with the
14 oversight of the administration of XES, including accounting, billing, allocations,
15 policies and procedures, service agreements, internal audits, external audits, and
16 external reporting to state and federal regulatory agencies. In 2016, I was
17 promoted to my current position.

18 **Q. Have you testified or filed testimony previously before any regulatory
19 authorities?**

20 A. Yes. I submitted pre-filed direct testimony on SPS’s behalf to the Public Utility
21 Commission of Texas (“Commission”) in Docket Nos. 43695, 45524, and 47527
22 on pension and other post-employment benefit expenses, active health care
23 expenses, and the proper treatment of a prepaid pension asset, among other issues.

1 I have also testified before the New Mexico Public Regulation Commission, the
2 Colorado Public Utilities Commission, and the Minnesota Public Utilities
3 Commission on pension and benefit issues.

1 **II. ASSIGNMENT AND SUMMARY OF TESTIMONY**

2 **Q. What is your assignment in this proceeding?**

3 A. My testimony addresses five topics related to SPS’s employee pensions and other
4 non-cash benefits:

- 5 1. I support SPS’s request to recover its reasonable and necessary expenses
6 for qualified pension calculated under Statement of Financial Accounting
7 Standard (“FAS”) 87,¹ retiree medical costs calculated under FAS 106,
8 and self-insured long-term disability (“LTD”) costs calculated under FAS
9 112;
- 10 2. I support SPS’s request to recover its active health and welfare costs,
11 which include costs incurred for active health care, miscellaneous benefits,
12 life insurance, and third-party-insured LTD benefits;
- 13 3. I support SPS’s request to recover the reasonable and necessary costs
14 incurred for workers’ compensation benefits;
- 15 4. I support SPS’s request to recover other reasonable and necessary benefits,
16 such as the 401(k) match, certain benefit-related consulting costs, and
17 deferred compensation;
- 18 5. I support the amount of pension and other post-employment benefit
19 (“OPEB”) expense to be used as the baseline on a going-forward basis for
20 purposes of the tracker established under section 36.065 of the Public
21 Utility Regulatory Act (“PURA”), and I quantify the current deferred
22 balance to be amortized;² and
- 23 6. I quantify SPS’s prepaid pension asset and support the request to continue
24 including that prepaid pension asset in rate base and to earn a return on it
25 at SPS’s Weighted Average Cost of Capital (“WACC”).

26 In addition, I sponsor or co-sponsor the following schedules in SPS’s Rate Filing
27 Package: Schedules B-2, B-2.1, G-2.0, G-2.1, G-2.2 and G-2.3.

¹ In 2009, FAS 87 was renamed Accounting Standards Codification 715-30, but for the sake of convenience I will refer to it in this testimony as “FAS 87.” I will also refer to the other accounting standards by their former FAS designations.

² PURA is codified in Title II of the Texas Utilities Code. See Tex. Utils. Code Ann. §§ 11.001-66.016.

1 Schedule B-2 lists the monthly balance of each accumulated provision
2 account (i.e., injuries and damages, property insurance, etc.), the amount accrued
3 each month, and the amount charged off each month during the Test Year. In
4 addition, Schedule B-2 provides the same information on an annual basis for the
5 prior three years. Schedule B-2.1 provides the information requested on Schedule
6 B-2 on a Texas retail basis only. I co-sponsor these schedules with SPS witness
7 Arthur P. Freitas.

8 The G-2 series of schedules provides general employee benefit
9 information with specific information on pension expense provided in Schedule
10 G-2.1, postretirement benefits other than pension expense provided in Schedule
11 G-2.2, and administration fees provided in Schedule G-2.3. I co-sponsor
12 Schedule G-2 with SPS witness Michael T. Knoll. The Rate Filing Package
13 requires that each of these schedules be updated 45 days after the initial filing.

14 **Q. Please summarize your testimony and recommendations.**

15 A. I support SPS's request for recovery of pension and other post-employment and
16 retirement benefits expense. I recommend that SPS be authorized to recover
17 \$10,211,527 of pension and other post-employment benefits expense. That
18 amount is composed of \$9,815,224 of qualified pension expense, \$(31,271) of
19 FAS 106 retiree medical expense, and \$14,192 of FAS 112 self-insured LTD
20 expense. SPS is not requesting recovery of non-qualified pension expense.

21 I also support SPS's request to recover its reasonable and necessary active
22 health and welfare costs, and I recommend that SPS be authorized to recover
23 \$15,958,584 for active health and welfare costs. That amount is composed of

1 \$14,455,628 of active health care costs, \$609,712 of third-party-insured LTD
2 costs, \$152,145 of life insurance costs, and \$741,099 of miscellaneous benefit
3 costs.

4 I further support SPS's request to recover third-party-insured workers'
5 compensation costs, and I recommend that SPS be authorized to recover \$811,724
6 of third-party-insured workers' compensation costs. I also recommend that SPS
7 be authorized to recover \$3,437,221 of other pension and benefit-related costs,
8 which include 401(k) matching expense, consulting expense, and deferred
9 compensation.

10 I next support SPS's request to establish a baseline for pension and OPEB
11 expense on a going-forward basis under PURA § 36.065, and I recommend that
12 the Commission set that baseline at \$9,815,224 for qualified pension and
13 \$(31,271) for OPEB (both total company). For prior periods, the amount to be
14 amortized as a result of the pension and OPEB baseline deferrals is \$1,574,975.

15 Finally, I recommend that SPS continue to be allowed to include its
16 prepaid pension asset in rate base in accordance with the standard ratemaking
17 treatment of prepayments and Commission precedent. Customers earn a return on
18 the prepaid pension asset in the form of reduced annual pension cost, and
19 therefore it is appropriate for SPS to earn a return on the asset as well. SPS's
20 thirteen-month average net prepaid pension asset balance as of March 31, 2019
21 was \$153,177,668. SPS requests that it be allowed to include the prepaid pension
22 asset in rate base and to earn a return on that asset at SPS's WACC, consistent
23 with Commission precedent.

1 **Q. Is any other SPS witness addressing compensation or benefit issues?**

2 A. Yes. Mr. Knoll discusses the cash compensation paid by SPS and the overall
3 reasonableness of Xcel Energy's Total Rewards Package, which consists of both
4 the cash and non-cash components of the compensation and benefits offered to
5 SPS and XES employees.

6 **Q. Were Attachments RRS-RR-1 and RRS-RR-4 through RRS-RR-7 prepared**
7 **by you or under your direct supervision and control?**

8 A. Yes.

9 **Q. Are Attachments RRS-RR-2 and RRS-RR-3 true and correct copies of the**
10 **documents that you have represented them to be?**

11 A. Yes.

1 **III. PENSION AND BENEFITS OVERVIEW**

2 **Q. Please summarize the pension and other benefits that SPS offers to its eligible**
3 **employees.**

4 A. In addition to the cash compensation discussed by Mr. Knoll, SPS offers the
5 following non-cash benefits to its employees:

- 6 • Pension and other post-employment and retirement benefits, which
7 include:
 - 8 ○ a defined-benefit qualified pension plan that provides eligible
9 employees with a defined benefit amount upon retirement;
 - 10 ○ a non-qualified pension restoration benefit that allows SPS to attract
11 and retain employees who would otherwise be disadvantaged by the
12 restrictions imposed under the qualified pension plan;
 - 13 ○ a retiree medical plan available to certain retired employees; and
 - 14 ○ LTD benefits;
- 15 • Active health and welfare benefits, which include medical, dental,
16 pharmaceutical, vision, life insurance, and other miscellaneous benefits;
- 17 • Workers' compensation benefits, including both self-insured and
18 third-party-insured benefits; and
- 19 • Other types of benefits, including a 401(k) defined contribution plan and
20 certain types of deferred compensation.

21 As I mentioned previously, SPS is not requesting recovery of its non-qualified
22 pension expense in this case.

23 **Q. What is the requested amount for each of the elements of non-cash**
24 **compensation offered by SPS?**

25 A. Table RRS-RR-1 sets forth the total company amounts of the pension and benefit
26 costs that SPS seeks to recover in rates. Column B represents the per book
27 amount for each element of expense during the Test Year, which is the twelve-
28 month period from April 1, 2018 through March 31, 2019. Column C shows the
29 known and measurable adjustments to the Test Year amounts. Column D

1 contains the total company amounts for the Test Year for each element of expense
 2 that is included in the cost of service in this case.

3 **Table RRS-RR-1**

A	B	C	D
Benefit	Test Year (12 months ended March 31, 2019)	Known and Measurable Adjustment	Test Year Amount (Total Company)
Qualified Pension	\$10,989,781	\$(1,174,557)	\$9,815,224
Non-Qualified Pension	\$470,671	\$(57,290)	\$413,381
Remove Non-Qualified Pension	-	\$(413,381)	\$(413,381)
FAS 106 Retiree Medical	\$(122,475)	\$91,204	\$(31,271)
FAS 112 Long-Term Disability (Self-Insured)	\$3,071	\$11,121	\$14,192
Active Health Care ³	\$14,590,175	4(134,546)	\$14,455,628
Long-Term Disability (Third-Party-Insured)	\$609,712	-	\$609,712
Life Insurance	\$152,145	-	\$152,145
Miscellaneous Benefit Programs and Costs	\$741,099	-	\$741,099
401(k) Match	\$3,105,887	\$92,250	\$3,198,137
Miscellaneous Retirement- Related Costs	\$239,084	-	\$239,084
Workers Compensation (Third-Party-Insured)	\$811,724	-	\$811,724
Total Pension and Benefits Expense	\$31,590,875	\$(1,585,199)	\$30,005,676

³ The per book amount for active health care in the cost of service is \$14,590,175. That amount is an estimate, and it must be adjusted to reflect health care claims that were incurred near the end of the Test Year but not reported until after the Test Year. After adding the IBNR amount, which is \$(465,387), and the known and measurable adjustment of \$330,841 that is discussed on page 34 of my testimony, the Test Year amount is \$14,455,628.

- 1 **Q. Is SPS seeking to recover any other amounts related to pension and benefits?**
- 2 A. Yes. SPS also seeks Commission approval to continue including a prepaid
- 3 pension asset in rate base and to earn a return on that asset at SPS's WACC,
- 4 consistent with the Commission's treatment of SPS's prepaid pension asset in
- 5 Docket No. 43695.

1 level of pay and years of service. Under a defined benefit pension plan, the
2 promised pensions are a commitment by SPS.

3 **Q. Do accounting rules and laws determine the cost for SPS's pension plan?**

4 A. Yes. As I noted earlier, SPS accounts for the cost of its pension plan under the
5 rules set forth in FAS 87, which prescribes the rules that companies must follow
6 in determining whether their pension costs comply with GAAP. However, FAS
7 87 does not dictate how a company must fund the plan. The funding of the plan is
8 determined based upon prudent business practices, with constraints imposed by
9 the requirements of the Pension Protection Act of 2006, the Employee Retirement
10 Income Security Act ("ERISA"), and the Internal Revenue Code ("IRC"):

- 11 • There are minimum required contributions;
- 12 • There are maximum contributions that can be deducted for tax purposes;
13 and
- 14 • SPS has a fiduciary responsibility to prudently protect the interests of the
15 plan participants and beneficiaries.

16 The minimum and maximum funding rules set forth under the Pension Protection
17 Act, ERISA, and the IRC are different from the methodology used under FAS 87
18 to determine pension cost. Over the long run, the cumulative employer
19 contributions made to a plan should equal the cumulative recognized pension
20 expense calculated under FAS 87, but in the short and intermediate runs there can
21 be significant differences.

22 **Q. How is pension cost determined under FAS 87?**

23 A. Under FAS 87, pension cost is composed of the following:

- 24 1. the value of pension benefits that employees will earn during the current
25 year (service cost);

- 1 2. increases in the present value of the pension benefits that plan participants
2 have earned in previous years (interest cost);
- 3 3. investment earnings on the pension plan assets that are expected to be
4 earned during the year (expected return on assets (“EROA”));
- 5 4. recognition of costs (or income) resulting from experience that differs
6 from the assumptions (amortization of unrecognized gains and losses); and
- 7 5. recognition of the cost of benefit changes the plan sponsor provides for
8 service the employees have already performed (amortization of
9 unrecognized prior service cost).

10 **Q. Taking each of these five components in order, how is the service cost**
11 **component calculated?**

12 A. The service cost component recognized in a period is the actuarial present value
13 of benefits attributed by the pension benefit formula to current employees’ service
14 during that period. Actuarial assumptions are used to reflect the time value of
15 money (the discount rate) and the probability of payment (assumptions as to
16 mortality, turnover, early retirement, and so forth).

17 **Q. Next, how is the interest cost component calculated?**

18 A. The interest cost component recognized in a fiscal year is determined as the
19 increase in the projected benefit obligation (“PBO”) due to the passage of time.
20 Measuring the PBO as a present value requires accrual of an interest cost at a rate
21 equal to the assumed discount rate. Essentially, the interest cost identifies the
22 time value of money by recognizing that anticipated pension benefit payments are
23 one year closer to being paid from the pension plan.

24 **Q. How is the third component, EROA, calculated?**

25 A. The EROA is determined based on the expected long-term rate of return on plan
26 assets and the market-related value of plan assets. The market-related value of

1 plan assets for SPS is a calculated value that recognizes changes in the fair value
2 in a systematic and rational manner over five years.

3 **Q. With regard to the fourth component, what are the unrecognized gains and**
4 **losses?**

5 A. Unrecognized gains and losses are the asset gains and losses or the liability gains
6 and losses from prior periods. In effect, those asset or liability gains and losses
7 arise when the experience in a prior period differed from what was expected.

8 **Q. Please explain the distinction between asset gains and losses and liability**
9 **gains and losses.**

10 A. Asset gains and losses arise when the actual returns on the pension trust assets in
11 prior years are greater than or lesser than the EROA. Suppose, for example, that
12 the plan has an expected return of 7% on its pension trust assets, which total
13 \$1 billion. The EROA for that year would be \$70 million. If the actual return in
14 that year is 9%, the asset gain will be \$20 million. Of course, the opposite can
15 also occur. If the EROA is 7% and the actual return on the assets is 5%, the plan
16 suffers a \$20 million asset loss.

17 Liability gains and losses arise when the other components of pension cost
18 differ from expectations. Those components include such things as the discount
19 rate, the expected number of retirements, mortality rates, and wage increases. For
20 example, if SPS assumes a 4% discount rate at the beginning of the year but the
21 actual discount rate measured at year end for the next year turns out to be 5%;
22 SPS will have a liability gain because the higher discount rate reduces the amount
23 SPS must set aside to satisfy future pension liabilities.

1 **Q. Is the distinction between asset gains and losses and liability gains and losses**
2 **important?**

3 A. Yes. The distinction is important because, as I will discuss in more detail below,
4 the asset gains and losses are phased in over time, whereas the liability gains and
5 losses are not. Asset gains and losses are phased into an amortization “pool,” for
6 lack of a better term, over a five-year period. Liability gains and losses are not
7 phased in, but instead are placed into the amortization pool in a single year.
8 Because gains and losses may reflect refinements in estimates as well as real
9 changes in economic values, and because some gains in one period may be offset
10 by losses in another or vice versa, FAS 87 does not require recognition of gains
11 and losses as a component of net pension cost in the period in which they arise.

12 **Q. Please describe what you mean by the term “phase-in” of gains or losses.**

13 A. The term “phase-in” is used to describe the process of moving asset gains or
14 losses into an amortization pool. Under FAS 87, the asset gains or losses are
15 incorporated into the calculation of pension cost over a period of five years.
16 Thus, 20% of a gain or loss is phased into the amortization pool during the first
17 year after the gain or loss occurs, another 20% is phased into the amortization
18 pool during the second year after the gain or loss occurs, and so forth until the
19 fifth year, when the full amount of the gain or loss is phased-in. Unlike asset
20 gains or losses, liability gains and losses are not phased in, as I mentioned earlier.
21 The portion of gains and losses that enter the amortization pool are then amortized
22 over a specific period of years if they satisfy the criteria I discuss below.

1 **Q. Why does SPS phase-in asset gains and losses and then amortize them over**
2 **the average years to retirement of active employees?**

3 A. When SPS moved to FAS 87 accounting in 1987, it elected to phase-in asset gains
4 and losses and to amortize these gains and losses over a period not to exceed the
5 average remaining service life (average years to retirement) of employees. The
6 purpose of the election was to reduce financial statement volatility in individual
7 accounting periods by ensuring that gains and losses are spread out over time, and
8 that they are not recognized in just the period that they occur. This phase-in and
9 amortization approach reduces volatility in recognized cost by smoothing gains
10 and losses over the longest allowed duration.

11 **Q. Why are asset gains and losses phased-in but not liability gains and losses?**

12 A. The assumptions used to establish pension liability (e.g., mortality rates, discount
13 rates, etc.) typically do not vary greatly from year to year, and therefore the
14 drafters of FAS 87 did not consider it necessary to require the phase-in of liability
15 gains and losses. In contrast, the market returns on pension fund assets can vary
16 greatly from year to year, as evidenced by the dramatic difference between the
17 EROA and the actual returns that SPS experienced on its pension fund assets in
18 2008. Because of the effects that such volatility would have on businesses'
19 income statements, the drafters of FAS 87 decided that it was appropriate to
20 phase-in market gains and losses.

21 **Q. How are unrecognized gains and losses amortized?**

22 A. SPS aggregates its current year's gains or losses with the prior years' gains or
23 losses to calculate a net unamortized gain or loss. That net unamortized gain or

1 loss is then compared to the present value of the PBO and to the market-related
2 value of the assets in the pension trust. If the net unamortized gain or loss is
3 outside a 10% corridor – that is, if it is more than 10% of the greater of the PBO
4 or the market-related value of the trust assets – SPS must amortize that net gain or
5 loss. If amortization of the unrecognized gains or losses is required, the
6 amortization amount is equal to the amount of the unrecognized gain or loss in
7 excess of the corridor divided by the average remaining future service of the
8 active participants in the plan. For SPS’s bargaining employees this is
9 approximately 15 years, and for SPS’s non-bargaining employees it is
10 approximately 10 years.

11 **Q. Returning to the five elements of FAS 87 pension cost, what is the fifth**
12 **element – unrecognized prior service cost?**

13 A. Unrecognized prior service cost results from pension plan amendments that
14 change benefits based on services rendered in prior periods. FAS 87 does not
15 generally require the cost of providing such retroactive benefits (prior service
16 cost) to be included in net periodic pension cost entirely in the year of the
17 amendment but instead provides for recognition over the future years.

18 **Q. How is unrecognized prior service cost amortized?**

19 A. Unrecognized prior service cost is amortized in the same manner as unrecognized
20 gains and losses, with the exception of the 10% corridor.

21 **Q. Please summarize the calculation that is required to be used under FAS 87 to**
22 **quantify annual pension cost**

23 A. Annual pension cost is quantified using the following calculation:

1		Current service cost
2	+	Interest cost
3	-	EROA
4	+/-	Loss (gain) due to difference between expected and actual experience of
5		plan assets or liabilities from prior periods
6	+/-	<u>Amortization of unfunded prior service cost</u>
7	=	Annual pension cost

8 **Q. Is the annual pension cost produced by this formula always a positive**
9 **number?**

10 A. No. In some years, the negative amounts in the calculation (i.e., the EROA and
11 the gains resulting from the difference between expected and actual experience
12 from prior periods) can be larger than the positive amounts. When that happens,
13 the annual pension cost is actually negative. And if that occurs in a rate case test
14 year, the annual pension cost included in the cost of service may be a negative
15 number, which reduces the overall cost of service. But even when the annual
16 pension cost is negative, shareholders are still providing the capital to fund the
17 prepaid pension asset.

18 **Q. What amount of expense did SPS incur during the Test Year for qualified**
19 **pension expense?**

20 A. SPS incurred \$10,989,781 for qualified pension expense.

21 **Q. Is SPS proposing to make any known and measurable changes to the**
22 **qualified pension expense for events occurring after the end of the Test**
23 **Year?**

24 A. Yes. SPS is requesting a known and measurable adjustment of \$(1,174,557) for
25 qualified pension expense. This known and measurable is based on the 2019

1 calendar year qualified pension expense included in the Attachment RRS-RR-3
2 actuarial report.

3 **Q. What amount of qualified pension expense is SPS requesting in the cost of**
4 **service?**

5 A. SPS is requesting approval of \$9,815,224 of qualified pension expense. Mr.
6 Freitas has included the qualified pension expense in his cost of service.

7 **Q. Have you provided the numbers and assumptions that SPS used to determine**
8 **its qualified pension expense amount in the cost of service?**

9 A. Yes. Attachment RRS-RR-4 contains the calculation of the total company
10 qualified pension expense amounts included in the cost of service.⁴ Attachments
11 RRS-RR-2 and RRS-RR-3 contain the source documents for those calculations.

12 **B. Retiree Medical Expense**

13 **Q. How are retiree medical costs determined?**

14 A. Retiree medical costs are determined under FAS 106, Employers' Accounting for
15 Post-Retirement Benefits Other Than Pensions. The components and calculation
16 are identical to FAS 87, with one exception: the pension asset gains and losses
17 are phased into the loss amortization calculation by 20% each year, whereas
18 retiree medical asset gains and losses are not.

19 **Q. Please describe SPS's retiree medical plan and the plan expenses.**

20 A. SPS's plan consists primarily of retiree medical benefits, but it also includes
21 retiree life and dental insurance. SPS eliminated those benefits for all active non-

⁴ SPS's actuary, Willis Towers Watson, calculates the pension and benefit amounts on a total company basis. Thus, the amounts in Attachments RRS-RR-2 through RRS-RR-7 are presented on a total company basis.

1 bargaining employees more than ten years ago, and SPS bargaining employees
2 hired on or after January 1, 2012 are no longer eligible to receive retiree medical
3 benefits. Thus, the current expense for retiree medical benefits is a legacy of the
4 prior programs.

5 **Q. What amount of expense did SPS incur during the Test Year for retiree**
6 **medical expense?**

7 A. SPS incurred \$(122,475) for retiree medical expense.

8 **Q. Is SPS proposing to make any known and measurable changes to the retiree**
9 **medical expense for events occurring after the end of the Test Year?**

10 A. Yes. SPS is requesting a known and measurable adjustment of \$91,204 for retiree
11 medical expense. This known and measurable is based on the 2019 calendar year
12 retiree medical expense include in the Attachment RRS-RR-3 actuarial report.

13 **Q. What amount of retiree medical expense is SPS requesting in the cost of**
14 **service?**

15 A. SPS is requesting approval of \$(31,271) in retiree medical expense. Mr. Freitas
16 has included that amount of retiree medical credit in his cost of service.

17 **Q. Have you provided the numbers and assumptions that SPS used to determine**
18 **its retiree medical expense amounts?**

19 A. Yes. Attachment RRS-RR-4 contains the calculations of the retiree medical
20 expense amounts. Attachments RRS-RR-2 and RRS-RR-3 contain the source
21 documents for those amounts.

1 **C. Self-Insured Long-Term Disability**

2 **Q. Please describe LTD in more detail and explain how it is accounted for.**

3 A. The LTD costs are attributable to benefits provided by SPS to former or inactive
4 employees after employment but before retirement. The LTD plan provides
5 employees with income protection by paying a portion of an employee's income
6 while he or she is disabled by a covered physical or mental impairment.

7 SPS has two types of LTD – a self-insured benefit and a third-party-
8 insured benefit. In a third-party-insured plan, which I will discuss in more detail
9 later in this testimony, SPS purchases an insurance plan from an outside insurance
10 provider that assumes the risk. In a self-insured plan, SPS provides the benefits to
11 the covered individuals and therefore effectively acts as the insurer. For the self-
12 insured piece, SPS is required to accrue for LTD costs under FAS 112,
13 Employers' Accounting for Post-Employment Benefits. The FAS 112 accrual
14 represents the expected disability benefit payments for employees that are not
15 expected to return to work.

16 **Q. Which groups of employees are covered under the self-insured plan and
17 which groups are covered under the third-party-insured plan?**

18 A. Within the LTD benefit, all employees disabled before January 1, 2008 are
19 covered under the self-insured plan, and all employees disabled on and after
20 January 1, 2008 are covered under a third-party-insured plan.

21 **Q. What amount of expense did SPS incur during the Test Year for self-insured
22 LTD expense?**

23 A. SPS incurred \$3,071 for self-insured LTD expense.

1 **Q. Is SPS proposing to make any known and measurable changes to the self-**
2 **insured LTD expense for events occurring after the end of the Test Year?**

3 A. Yes. SPS is requesting a known and measurable adjustment of \$11,121 for
4 self-insured LTD expense. This known and measurable is based on the 2019
5 calendar year self-insured LTD expense included in the Attachment RRS-RR-3
6 actuarial report.

7 **Q. What amount of self-insured LTD expense is SPS requesting in the cost of**
8 **service?**

9 A. SPS is requesting approval of \$14,192 of self-insured LTD expense. Mr. Freitas
10 has included that amount of self-insured LTD expense in the cost of service.

11 **Q. Have you provided the numbers and assumptions that SPS used to determine**
12 **its self-insured LTD benefits expense amounts in the Test Year?**

13 A. Yes. Attachment RRS-RR-4 contains the calculations of the self-insured LTD
14 benefits expense amounts. Attachments RRS-RR-2 and RRS-RR-3 contain the
15 source documents for those calculations.

16 **D. Reasonableness of SPS's Pension and Other Post-Employment**
17 **and Retirement Benefits Expense**

18 **Q. Are the amounts of SPS's pension and other post-employment and**
19 **retirement benefits expense reasonable?**

20 A. Yes. SPS follows a well-established, objective, and verifiable process to
21 determine the assumptions used within the actuarial calculations that yield the
22 pension and other post-employment and retirement benefits expense amounts.
23 The assumptions and the actuarially calculated total cost amounts are reflected in

1 my Attachment RRS-RR-4. In addition, the reasonableness of Xcel Energy's
2 Total Rewards Program design, which includes pension and other
3 post-employment and retirement benefits, is discussed in the direct testimony of
4 Mr. Knoll.

IV. HEALTH AND WELFARE COSTS

Q. What topics do you discuss in this section of your testimony?

A. I discuss four types of active health and welfare costs: (1) active health care costs; (2) third-party-insured LTD costs; (3) life insurance costs; and (4) miscellaneous benefit costs.

A. Active Health Care

Q. What types of costs are included in active health care?

A. Active health care costs are all costs associated with providing health care coverage to employees. Those costs include medical, pharmacy, dental and vision claims, administrative fees, employee withholdings, pharmacy rebates, Health Savings Account (“HSA”) contributions, transitional reinsurance fees, trustee fees, and interest income.

Q. What amount of active health care expense is SPS seeking to include in the cost of service?

A. SPS is requesting approval of \$14,455,628 for active health care expense. Mr. Freitas has included that amount of active health care expense in the cost of service.

Q. Does the Test Year amount match the per book amount of active health care costs?

A. No. The per book numbers for active health care amounts include estimates because there is generally an average lag of approximately 30 days between when health care is provided and when SPS receives a bill for that care.⁵ Therefore, the

⁵ The difference between the estimated amount and the actual amount is generally not material enough to restate SPS’s GAAP books when the actual amount becomes known.

1 actual amount of active health care expense was not available at the time SPS
2 recorded its per book amount at the end of March 2019. Because SPS needs to
3 close its books before it receives all of those health care claims, it takes the actual
4 amounts recorded through a certain point in the year and estimates the additional
5 amount that will be incurred but not reported by the end of the year, which is the
6 Incurred But Not Reported (“IBNR”) reserve. During the following year, SPS
7 receives the actual amounts attributable to care provided in the last part of the
8 prior year, and at that time it trues up the IBNR estimate to the actual incurred
9 expense.

10 **Q. Is SPS proposing to make any known and measurable changes to the active**
11 **health care expense for events occurring after the end of the Test Year?**

12 A. Yes. SPS is requesting an increase of \$330,841 for active health care expense.

13 **Q. Please discuss the process that SPS undertook to determine the Active Health**
14 **Care amounts for 2019.**

15 A. SPS first took the Test Year per book amounts after making the IBNR reserve
16 adjustments described above and then applied three known and measurable
17 adjustments to arrive at the 2019 active health care amount:

- 18 1. SPS applied a 5.50% increase to the 2018 incurred medical amount, which
19 increased costs by \$392,667.
- 20 2. SPS applied a 12.60% increase to the 2018 incurred pharmacy amount,
21 which increased costs by \$178,559.
- 22 3. SPS switched medical providers in 2019, which resulted in lower
23 administrative fees. As a result, the Test Year medical administrative fees
24 were reduced by \$240,385.

25 The three adjustments result in a net increase of \$330,841 to the overall amount.

1 **Q. What amount of active health care expense is SPS requesting in the cost of**
2 **service?**

3 A. SPS is requesting approval of \$14,455,628 of active health care expense. Mr.
4 Freitas has included that amount of active health care expense in the cost of
5 service.

6 **B. Third-Party-Insured Long-Term Disability**

7 **Q. Please describe the third-party-insured LTD costs that SPS incurs.**

8 A. As explained earlier, SPS offers long-term disability coverage that provides
9 benefits to former or inactive employees after employment but before retirement.
10 The LTD plan provides employees with income protection by paying a portion of
11 an employee's income while he or she is disabled by a covered physical or mental
12 impairment. In a third-party-insured plan, SPS purchases an insurance plan from
13 an outside insurance provider that assumes the risk, and the cost of the third-
14 party-insured piece is simply the cost of the insurance premium incurred each
15 year along with any other miscellaneous costs.

16 **Q. What groups of employees are covered under the third-party-insured**
17 **benefit?**

18 A. As noted earlier, all employees disabled on and after January 1, 2008 are covered
19 under the third-party-insured plan.

20 **Q. What amount of third-party-insured LTD benefit expense is SPS seeking to**
21 **recover?**

22 A. SPS is requesting approval of \$609,712 of third-party-insured LTD expense for
23 the Test Year. Mr. Freitas has included that amount of third-party-insured LTD
24 benefits expense in the cost of service.

1 **C. Life Insurance**

2 **Q. Please describe the life insurance cost that SPS incurs.**

3 A. The life insurance category consists of life insurance premiums and offsetting
4 employee life insurance withholdings. Life insurance is provided to
5 non-bargaining employees at 100% of base pay and to SPS bargaining employees
6 at 50% of base pay. Employees also have the option to purchase additional life
7 insurance.

8 **Q. What amount of expense did SPS incur during the Test Year for life
9 insurance benefits?**

10 A. SPS is requesting approval of \$152,145 of life insurance expense for the Test
11 Year. Mr. Freitas has included that amount of life insurance expense in the cost
12 of service.

13 **D. Miscellaneous Benefits**

14 **Q. What types of miscellaneous benefit programs does SPS offer to its
15 employees?**

16 A. The types of costs included in the miscellaneous benefit programs and costs
17 category are:

- 18 • Tuition reimbursement,
- 19 • Employee Assistance Program costs,
- 20 • Wellness program costs,
- 21 • Costs incurred by the HR Service Center to answer employee retirement
22 or benefit questions,
- 23 • Health and welfare plan actuarial and audit fees,
- 24 • Administrative fees for short-term and long-term disability plans, and

1 • Administrative fees for employee flexible spending and HSAs.

2 **Q. What amount of expense did SPS incur during the Test Year for**
3 **miscellaneous benefits?**

4 A. SPS incurred \$741,099 of miscellaneous benefit expense for the Test Year. Mr.
5 Freitas has included that amount of miscellaneous benefits expense in the cost of
6 service.

7 **E. Reasonableness of Health and Welfare Costs**

8 **Q. Are the amounts of SPS's health and welfare expense reasonable?**

9 A. Yes. It is appropriate for the cost of service to include these benefits because they
10 reflect a reasonable and necessary level of expense. As Mr. Knoll explains in
11 more detail, Xcel Energy's compensation plans and benefits are required for Xcel
12 Energy and its subsidiaries to attract, retain, and motivate employees needed to
13 perform the work necessary to provide quality services for SPS customers.
14 Without these benefits, SPS and XES would have to pay significantly higher
15 current compensation to attract employees.

1 **V. WORKERS' COMPENSATION COSTS**

2 **Q. Is SPS seeking recovery of the costs associated with workers' compensation**
3 **benefits?**

4 A. Yes. SPS is seeking recovery of third-party-insured workers' compensation
5 benefits.

6 **Q. Please briefly describe SPS's third-party-insured workers' compensation**
7 **program.**

8 A. For employees who are injured on or after August 1, 2001, all workers
9 compensation benefits are covered under an insured program. The only cost to
10 Xcel Energy for this benefit cost is the insurance premium. In a third-party-
11 insured plan, SPS purchases an insurance plan from an outside insurance provider
12 that assumes the risk, and the cost of the third-party-insured piece is simply the
13 cost of the insurance premium incurred each year along with any other
14 miscellaneous costs.

15 **Q. How are third-party-insured workers' compensation amounts determined?**

16 A. The costs are calculated by actuaries of the vendor from whom SPS purchases the
17 insurance. The actuaries presumably base the costs on company-specific
18 historical loss data and payroll to determine exposure related to the policy period.

19 **Q. What amount of expense is SPS seeking to recover for third-party-insured**
20 **workers' compensation benefits?**

21 A. SPS is requesting approval of \$811,724 of third-party-insured workers'
22 compensation expense. Mr. Freitas has included that amount of third-party-
23 insured workers' compensation expense in the cost of service.

1 **Q. Is it reasonable for the cost of service to include third-party-insured workers'**
2 **compensation costs incurred by SPS?**

3 A. Yes. It is appropriate for the cost of service to include these benefits because they
4 reflect a reasonable and necessary level of expense. Xcel Energy's workers'
5 compensation plans and benefits are required for Xcel Energy and its subsidiaries
6 to attract, retain, and motivate employees needed to perform the work necessary
7 to provide quality services for SPS customers. Without these benefits, SPS and
8 XES would have to pay significantly higher current compensation to attract
9 employees.

VI. OTHER BENEFIT COSTS

Q. Is SPS seeking recovery of any retirement benefits in addition to the ones discussed earlier?

A. Yes. SPS is seeking recovery of 401(k) match costs and miscellaneous retirement-related costs.

A. 401(k) Match

Q. Please briefly describe SPS’s 401(k) match plan.

A. SPS’s retirement income plan is based on a combination of a defined benefit pension plan and a 401(k) plan, which is a defined contribution plan. Unlike some defined benefit pension plans, SPS’s defined benefit pension plan is not intended to provide an employee’s total retirement income. Rather, the defined benefit pension plan and 401(k) plan are designed so that the two plans in combination provide retirement income to SPS and XES employees.

Q. How are the 401(k) match costs determined?

A. The 401(k) plan is a defined contribution plan to which employees must contribute in order to obtain employer matching. It is based on the amount that employees contribute as a percentage of their salary with a maximum match of 4%. For the majority of SPS’s workforce, the employee must contribute 8% of eligible income for SPS to contribute the maximum company match of 4% of eligible income. The remaining employees, who are in the Traditional Plan, receive a maximum match of \$1,400.

Q. What amount of expense did SPS incur during the Test Year for 401(k) match benefits?

A. SPS incurred \$3,105,887 for 401(k) benefits.

1 **Q. Is SPS proposing to make any known and measurable changes to the 401(k)**
2 **expense for events occurring after the end of the Test Year?**

3 A. Yes. SPS is requesting a known and measurable adjustment of \$92,250 for
4 401(k) benefit expense. Because the 401(k) match is based on the amount that
5 employees contribute as a percentage of their salary, escalation factors of 3% and
6 2.8% have been applied to non-bargaining and bargaining employees,
7 respectively. For justification of the merit increase, please refer to Mr. Knoll's
8 direct testimony.

9 **Q. What is the amount of 401(k) Match expense included in the cost of service?**

10 A. After including the known and measurable adjustment mentioned above, the
11 401(k) Match expense requested by SPS is \$3,198,137. Mr. Freitas has included
12 the 401(k) Match expense in the cost of service.

13 **B. Miscellaneous Retirement-Related Costs**

14 **Q. What costs are included in miscellaneous retirement-related costs?**

15 A. This category includes costs such as 401(k) plan administration fees,
16 compensation consulting and survey costs, retirement plan actuarial and audit
17 fees, and a small amount for the deferred compensation plan.

18 **Q. What amount of expense did SPS incur during the Test Year for**
19 **miscellaneous retirement-related costs?**

20 A. SPS incurred \$239,084 for miscellaneous retirement-related costs. Mr. Freitas
21 has included the miscellaneous retirement-related expense in the cost of service.

1 **C. Reasonableness of Other Benefit Costs**

2 **Q. Is it reasonable for the cost of service to include the 401(k) match and**
3 **miscellaneous retirement-related costs incurred by SPS?**

4 A. Yes. It is appropriate for the cost of service to include these benefits because they
5 reflect a reasonable and necessary level of expense. Xcel Energy's compensation
6 plans and benefits are required for Xcel Energy and its subsidiaries to attract,
7 retain, and motivate employees needed to perform the work necessary to provide
8 quality services for SPS customers. Without these benefits, SPS and XES would
9 have to pay significantly higher current compensation to attract employees.

1 **VII. PENSION AND OPEB RESERVE ACCOUNT**

2 **Q. Does SPS defer pension and OPEB expense amounts that differ from the**
3 **levels of pension and OPEB amounts included in base rates?**

4 A. Yes. PURA § 36.065(b) allows a utility to establish a reserve account to record
5 the difference between the annual amount of pension and OPEB expense
6 approved in the utility’s last general rate case and the annual amount of pension
7 and OPEB expense that the utility actually incurs. If the amount of pension and
8 OPEB expense in the utility’s approved rates is greater than the actual expense,
9 the utility will have a surplus in its reserve account. If the amount of pension and
10 OPEB expense in the utility’s approved rates is less than the actual expense, the
11 utility will have a shortage in its reserve account.

12 **Q How is the reserve account treated for ratemaking purposes?**

13 A. PURA § 36.065 states that if a reserve account for pension and OPEB expense is
14 established, the Commission:

15 at a subsequent general rate proceeding shall:

- 16 (1) review the amounts recorded to the reserve account to determine
17 whether the amounts are reasonable expenses;
- 18 (2) determine whether the reserve account has a surplus or shortage
19 under Subsection (c); and
- 20 (3) subtract any surplus from or add any shortage to the electric
21 utility’s rate base with the surplus or shortage amortized over a
22 reasonable time.

23 **Q. Did the Commission establish baselines for the pension and OPEB tracker in**
24 **SPS’s last rate case?**

25 A. Yes. In Docket No. 47527, the parties agreed to a baseline amount of
26 \$13,378,566 (total company) for qualified pension expense, with a Texas retail

1 amount of \$7,830,475. The parties agreed to a OPEB expense baseline of
2 \$(351,985) (total company), with the Texas retail amount being \$(206,017).⁶

3 **Q. What is the total amount of pension and OPEB costs related to the tracker**
4 **that SPS is requesting to recover in this case?**

5 A. As noted earlier in my testimony, SPS is proposing to amortize the pension and
6 OPEB regulatory liability balance of \$1,574,975 for the Texas retail jurisdiction.

7 That amount is the net of two balances:

- 8 • The first amount represents the unamortized balance of the pension and
9 OPEB amounts deferred from prior cases, which is \$(276,798) as of
10 March 31, 2019. That amount reflects accruals in excess of the agreed-
11 upon baselines set in Docket Nos. 38147, 40824 and 42004.
- 12 • The second amount represents the total deferrals for July 1, 2017 through
13 March 31, 2019, which total \$1,851,773.

14 Mr. Freitas has reflected the \$1,574,975 of net deferred pension and OPEB
15 expense in the cost of service study he presents. The deferred amounts appear
16 under FERC Account 92603. See Attachment RRS-RR-1 for a summary of how
17 this amount was calculated.

18 **Q. How did SPS calculate the unamortized balance of the pension and OPEB**
19 **amounts deferred from prior cases?**

20 A. SPS calculated the unamortized balance of pension and OPEB amounts deferred
21 from prior cases by the following steps:

- 22 • In Docket No. 47527, the parties agreed that SPS would be allowed to
23 recover a deferred pension and OPEB expense balance of \$(664,316) over
24 a period of 24 months beginning on February 1, 2018, which yields a
25 monthly amount of \$76,730. $(\$664,316) / 24 = \$27,680$.

⁶ Docket No. 45524, *Application of Southwestern Public Service Company for Authority to Change Rates*, Unopposed Stipulation at 6 and Attachment D.

- 1 • As of March 31, 2019, ten months worth of amortized costs will remain
2 unrecovered.
- 3 • Multiplying 10 months by \$(27,679.83) per month equals an unamortized
4 balance of \$(276,798). The calculation appears on my Attachment
5 RRS-RR-5.

6 **Q. How did SPS calculate the deferral amount to be amortized?**

7 A. For the period from July 1, 2017 through January 22, 2018, SPS compared the
8 actual amounts of pension and OPEB expense to the baseline expense amounts set
9 in Docket No. 45524. For the period from January 23, 2018 to March 31, 2019,
10 SPS compared the actual amounts of pension and OPEB expense to the baseline
11 amounts established in Docket No. 47527.

12 **Q. What is the total of the deferral amounts that SPS is asking to recover?**

13 A. The table below shows the unamortized amounts for prior periods and the amount
14 of deferrals requested in this case:

15 **Table RRS-RR-2**

Pension and OPEB Deferrals	
Pension and OPEB expense deferred from prior cases	\$(276,798)
Pension and OPEB expense deferred from July 1, 2017 to March 31, 2019	<u>1,851,773</u>
Total Net Pension and OPEB Deferrals	1,574,975

16 **Q. How does SPS propose to treat the amount in the reserve account?**

17 A. SPS proposes to amortize the accrued amount over a one-year period and to
18 reimburse the full amount to customers over that period. I have supplied the
19 accrued balance excess amount to Mr. Freitas, and he has reflected it in the cost of
20 service calculation.

1 **Q. Are the amounts of pension and OPEB expense recorded in the reserve**
2 **account reasonable?**

3 A. Yes. The pension and OPEB expense amounts are reasonable for the reasons
4 discussed earlier in connection with the forward-looking pension and OPEB
5 expense. SPS's pension plans are administered prudently and in accordance with
6 GAAP, and the amounts contributed are consistent with the actuarial projections
7 that are based on third-party projections and assumptions.

1 **VIII. SPS'S PREPAID PENSION ASSET**

2 **Q. What topic do you discuss in this section of your testimony?**

3 A. I describe SPS's prepaid pension asset and explain that it should be included in
4 rate base. It should also earn a return at SPS's WACC.

5 **Q. Has the Commission addressed this issue in prior cases?**

6 A. Yes. As I noted earlier, in Docket No. 43695, the Commission approved SPS's
7 request to include the prepaid pension asset in rate base and to earn a return on
8 that asset at SPS's WACC.

9 **Q. What is a prepaid pension asset?**

10 A. A prepaid pension asset represents the difference between: (1) the cumulative
11 actuarially determined net periodic pension cost calculated in accordance with
12 FAS 87; and (2) the cumulative cash amounts contributed to the pension trust
13 fund.

14 **Q. Please provide an example of how the difference arises.**

15 A. Suppose that the pension plan has been in existence for five years, and that the
16 cash contribution to the pension trust for each of five years has been \$100 million,
17 whereas the pension cost calculated in accordance with FAS 87 has been \$90
18 million in each of those five years. Table RRS-RR-3 shows how the excess of
19 cash contributions each year creates a cumulative prepaid pension asset:

1

Table RRS-RR-3 (amounts in millions)

Year	Pension Contribution	Pension Cost	Cumulative Prepaid Pension Asset
1	\$100	\$90	\$10
2	\$100	\$90	\$20
3	\$100	\$90	\$30
4	\$100	\$90	\$40
5	\$100	\$90	\$50
Total	\$500	\$450	\$50

2

At the end of the five year period, the utility has cumulative cash contributions of

3

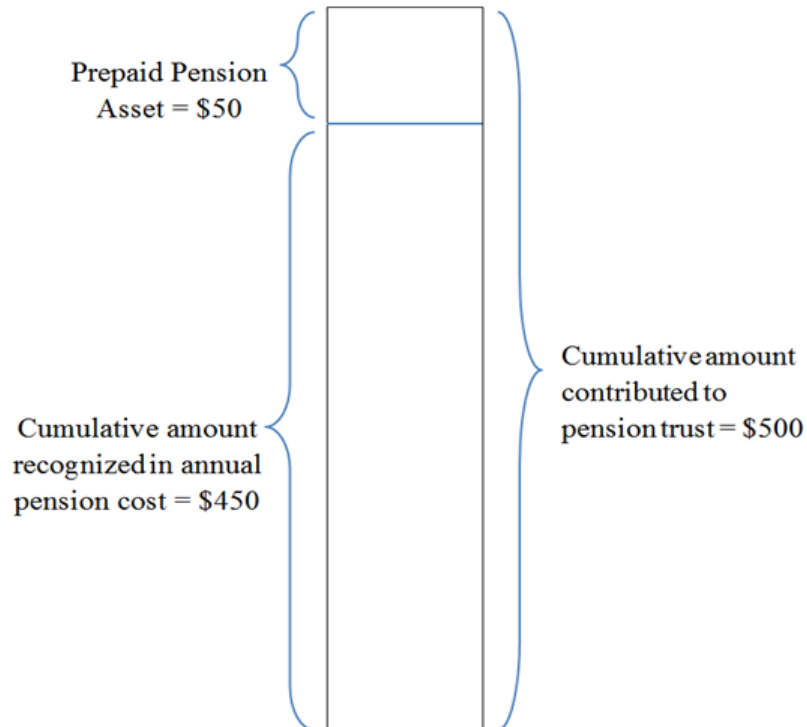

\$500 million and cumulative pension cost of \$450 million, which produces a

4

prepaid pension asset of \$50 million, as shown in Figure RRS-1:

5

Figure RRS-RR-1

1 **Q. Why are the contributions and cost different in any given year?**

2 A. As I explained earlier in my discussion of qualified pension expense, the cost
3 calculation is governed by FAS 87, but the contributions are driven by federal law
4 requirements under ERISA, the IRC, and the Pension Protection Act. Although
5 the cost and contribution calculations both use accrual methodologies, the
6 assumptions, attribution methods, and periods of time over which the costs are
7 required to be recognized are different and thus can often result in different
8 annual amounts.

9 **Q. Can the utility withdraw the prepaid pension asset and use it to fund capital
10 requirements or to pay for O&M expense?**

11 A. No. Federal law prohibits the withdrawal of any amounts from the pension trust
12 fund except for the payment of benefits and plan expenses. After the
13 contributions are made, they are essentially locked away.

14 **Q. Does SPS currently have a prepaid pension asset?**

15 A. Yes. The thirteen-month average of the net prepaid pension asset balance as of
16 March 31, 2019 was \$153,177,668.⁷

17 **Q. Is SPS seeking to include that prepaid pension asset in rate base?**

18 A. Yes. SPS is requesting Commission approval to include the prepaid pension asset
19 in rate base and to earn a return on that portion of the rate base at the WACC that
20 SPS has proposed in this case, which is 7.68%.

⁷ The net prepaid pension asset that appears in the cost of service is \$153,177,668. That is the net of the prepaid qualified pension asset of \$153,633,570 and the non-qualified pension unfunded liability of \$455,903.

1 **Q. Do you recommend that the Commission include the prepaid pension asset in**
2 **rate base?**

3 A. Yes. The standard ratemaking practice is for prepayments to earn a return at the
4 utility's WACC. For example, Texas retail customers effectively earn a return on
5 the Accumulated Deferred Income Tax ("ADIT") balance included in the cost of
6 service at SPS's WACC because that ADIT balance is removed from rate base,
7 meaning customers are not paying a return on the portion of rate base equal to the
8 ADIT balance. Moreover, it is reasonable and equitable to include the prepaid
9 pension asset in rate base and for SPS to earn a return on it because customers are
10 also earning a return on the prepaid pension asset.

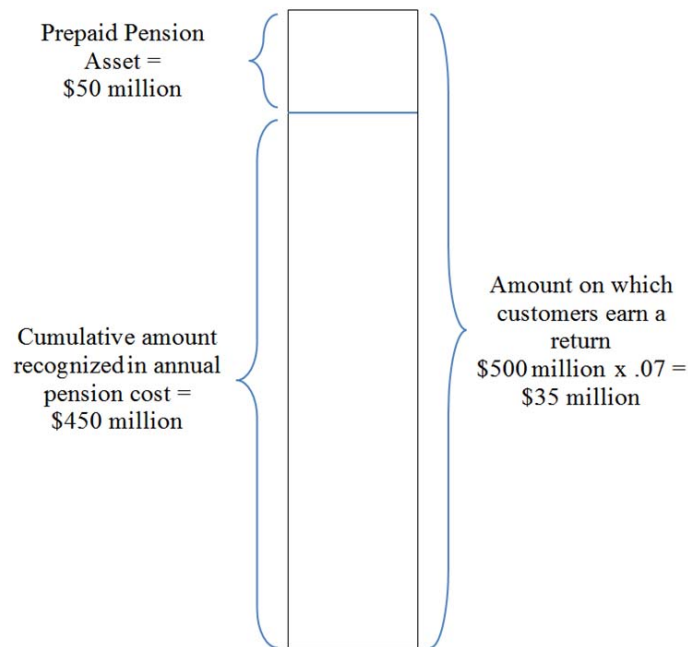

11 **Q. Please explain what you mean when you state that customers are also earning**
12 **a return on the prepaid pension asset.**

13 A. As I explained in a prior section of my testimony, one of the components of the
14 annual pension expense calculation is the return that the pension trusts are
15 expected to earn on the assets in the trust. Suppose, for example, that a pension
16 trust has assets of \$500 million and is expected to earn a return of 7% in the
17 current year. Under those assumptions, \$35 million would be included in the
18 annual pension cost calculation as the EROA. As I explained in a prior section,
19 the EROA is subtracted from the service cost and other elements of the annual
20 pension cost. Therefore, in this example, the return on the pension trusts would
21 reduce annual pension cost by \$35 million.

1 **Q. Does the pension trust fund balance that is multiplied by the EROA include**
2 **the prepaid pension asset?**

3 A. Yes. As shown in Figure RRS-RR-2, customers receive the benefit of the
4 earnings on the entire amount of assets in the pension trust, not just the amount
5 that has been recognized in annual pension cost.

6 **Figure RRS-RR-2⁸**

7 That means all of the assets in the pension trust, including the assets that comprise
8 the prepaid pension asset, are used and useful to SPS's Texas retail customers.

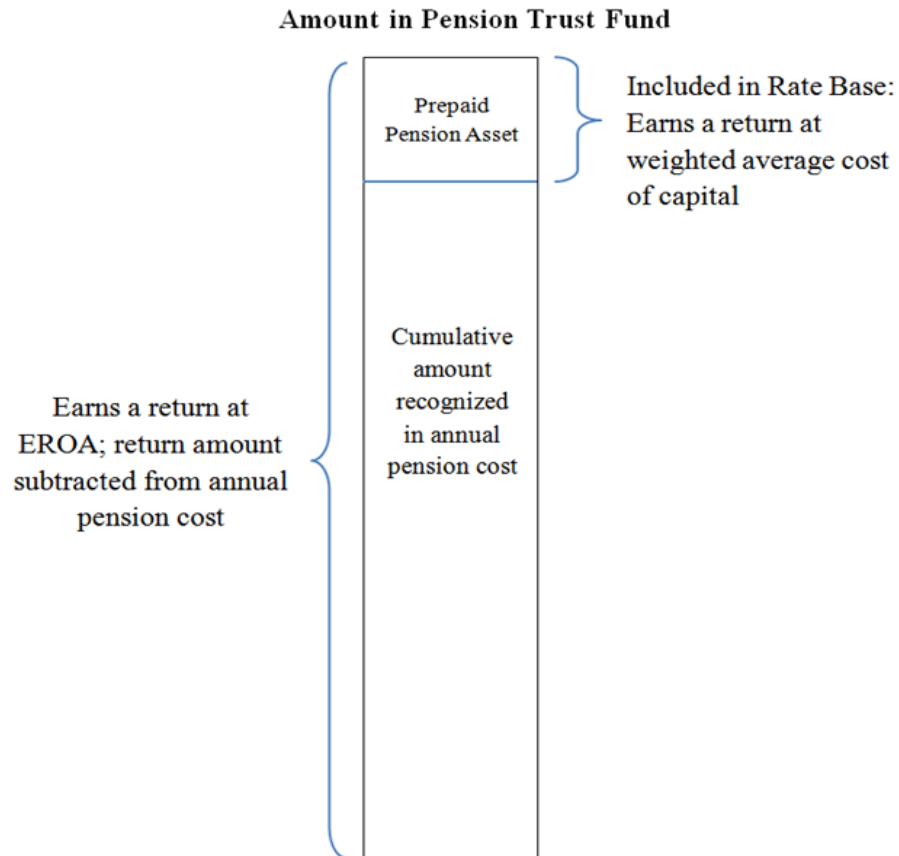

9 **Q. Does the fact that customers are receiving a return on the prepaid pension**
10 **asset portion of the trust funds justify including the prepaid pension asset in**
11 **rate base and allowing SPS to earn a return on it?**

12 A. Yes. As demonstrated in Figure RRS-RR-3 (next page), including the prepaid
13 pension asset in rate base provides a return to the utility, and that return offsets the

⁸ The amounts in this figure are just examples that have been simplified for ease of understanding.

1 reduction in the revenue requirement that results from the earnings on the prepaid
2 pension asset included in the annual pension cost. With an exception I will
3 discuss below, the return on the prepaid pension asset portion of rate base is
4 simply the mirror image of the return that customers receive as a result of
5 earnings on the prepaid pension asset.

6 **Figure RRS-RR-3**

7 Thus, if customers receive the benefit of the earnings on the prepaid pension
8 asset, it is appropriate for SPS to receive a return on the prepaid pension asset
9 portion of rate base. Conversely, if SPS does not receive a return on the prepaid
10 pension asset portion of rate base, customers should not receive the benefit of the
11 earnings on the prepaid pension asset.

1 **Q. Please turn now from the hypothetical examples you have been discussing to**
 2 **SPS’s actual prepaid pension asset. How much are SPS’s Texas retail**
 3 **customers saving in annual pension cost as a result of the prepaid pension**
 4 **asset?**

5 A. As Table RRS-RR-4 shows, SPS’s customers are saving \$10,410,771 in annual
 6 pension costs as a result of the prepaid pension asset.

7 **Table RRS-RR-4**

Pension Plan	Date	Prepaid Pension Asset 13-Month Average	EROA	Cost Reduction from Prepaid Pension Asset
NCE Non-Bargaining	3/31/2018 to 3/31/2019	\$27,003,044	6.90%	\$1,863,210
SPS Bargaining	3/31/2018 to 3/31/2019	\$126,630,526	6.75%	\$8,547,561
Total		\$153,633,570		\$10,410,771

8 **Q. Please explain SPS’s request regarding its prepaid pension asset.**

9 A. SPS is requesting that the prepaid pension asset of \$153,633,570 be included in
 10 rate base to provide a corresponding return to shareholders. Otherwise, the
 11 qualified prepaid pension asset is solely generating a return for customers through
 12 lower pension expense. The prepaid pension asset represents assets that are
 13 delivering a direct benefit to customers because the investment income on those
 14 assets lowers the pension expense under FAS 87. It is therefore appropriate to
 15 include the prepaid pension asset in rate base. The calculation to support the
 16 prepaid pension asset thirteen-month average can be found in my Attachment
 17 RRS-RR-6, and the cumulative qualified prepaid pension asset balance since the
 18 adoption of FAS 87 can be found in my Attachment RRS-RR-7.

1 **Q. Is SPS’s requested WACC on the prepaid pension asset in this case higher**
2 **than the EROA on the prepaid pension asset?**

3 A. Yes. In this case, SPS’s requested WACC is 7.68% and the weighted average of
4 the 2019 forecasted EROA for the SPS Bargaining Plan and the New Century
5 Energies (“NCE”)⁹ Non-Bargaining Plan 2019 is 6.78%.¹⁰

6 **Q. Why should SPS be allowed a return on the prepaid pension asset based on**
7 **the WACC if the ratepayers are only receiving a reduction in cost based on**
8 **the lower EROA on the prepaid pension asset?**

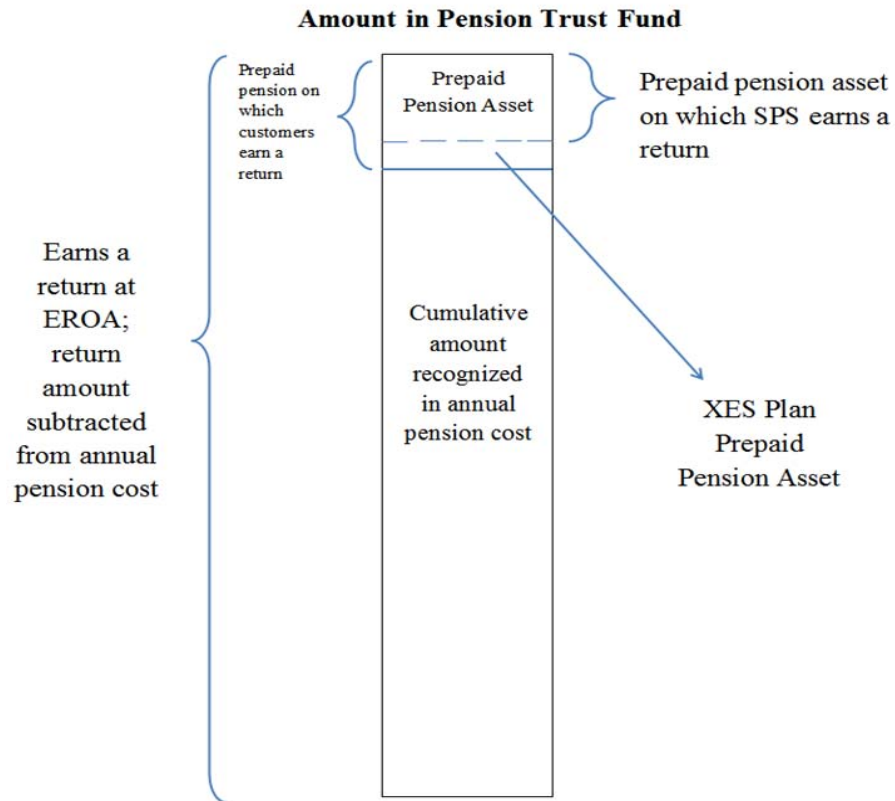

9 A. There are two reasons. First, although the simplified example in Figure
10 RRS-RR-3 shows an equivalent prepaid pension asset balance on which
11 customers and the utility are earning a return, the amounts are not equal insofar as
12 SPS is concerned. SPS’s annual pension cost includes costs for three different
13 pension plans – the SPS Bargaining Plan, the NCE Non-Bargaining Plan, and the
14 XES Plan. All three of those plans have prepaid pension assets, and customers
15 earn a return on all three plans. However, SPS does not include the XES Plan
16 portion of the prepaid pension asset in rate base because that asset belongs to
17 XES, not to SPS. Therefore, SPS’s customers are receiving a return on the XES
18 Plan portion of the prepaid pension asset, but they do not pay a return on that
19 asset. To reflect SPS’s actual circumstances, it is necessary to modify the figure

⁹ NCE refers to New Century Energies, Inc., which merged with Northern States Power Company in 2000 to create Xcel Energy.

¹⁰ The EROA for the SPS Bargaining Plan is 6.75%, and the EROA for the NCE Non-Bargaining Plan is 6.90%. The weighted average of those amounts is 6.78%.

1 as reflected in Figure RRS-RR-4 to show the actual amount on which SPS earns a
2 return as part of rate base:

3 **Figure RRS-RR-4**

4 As this figure shows, customers earn a return on a larger prepaid pension asset
5 balance than SPS does.

6 **Q. What was SPS's portion of the 13-month average of the XES Plan prepaid**
7 **pension asset as of March 31, 2019?**

8 A. The Texas retail portion of the 13-month average XES Plan prepaid pension asset
9 was approximately \$17.0 million as of March 31, 2019. With an EROA of 7.10%
10 for the XES Plan, SPS's Texas customers receive \$1.2 million of return on an
11 asset on which they pay no return. That reduces annual pension expense by an
12 equal amount.

1 **Q. Does the prepaid pension asset benefit customers in any other way?**

2 A. Yes. The contributions that helped create the prepaid pension asset allow the
3 Company to avoid incurring Pension Benefit Guaranty Corporation (“PBGC”)
4 premiums that would otherwise be included within the annual pension cost
5 charged to customers.

6 **Q. Please explain what the PBGC is.**

7 A. The PBGC is a federal agency established by Congress as part of ERISA to insure
8 pension benefits under private sector defined benefit pension plans. If a pension
9 plan is terminated without sufficient money to pay all benefits, PBGC’s insurance
10 program will pay employees the benefits promised under the pension plan, up to
11 the limits set by law. The funding for the PBGC comes partly from premiums
12 charged to pension sponsors and partly from returns on assets held by the PBGC.

13 **Q. What types of premiums does the PBGC charge?**

14 A. The PBGC charges two types of premiums: (1) a per capita premium that is
15 charged to all single-employer defined-benefit plans, and (2) a variable premium
16 charged to underfunded plans. The amounts of the premiums are set by Congress
17 and must be paid by sponsors of defined-benefit plans, such as Public Service.

18 **Q. What are the variable-rate premiums applicable to underfunded plans?**

19 A. For 2018, the PBGC variable-rate premium for a single-employer plan such as
20 that of SPS was \$38 per \$1,000 of unfunded vested benefit.

21 **Q. Do SPS and its customers avoid the payment of PBGC premiums because of
22 the contributions that helped create the prepaid pension asset?**

23 A. Yes. Texas customers received the benefit of reduced PBGC premiums in the
24 Test Year, and SPS projects that it will have additional PBGC savings in the

1 future. The PBGC premiums would have been \$1.6 million higher in 2018 in the
 2 absence of the prepaid pension asset. This additional cost would be passed on to
 3 customers as increased qualified pension expense.

4 **Q. Can you demonstrate mathematically that SPS’s customers are better off as**
 5 **a result of the prepaid pension asset?**

6 A. Yes. Multiplying the SPS prepaid pension asset of \$153,633,570 by the 7.68%
 7 percent WACC requested by SPS results in a return to SPS of \$11,799,058 on the
 8 prepaid pension asset. Table RRS-RR-7, however, shows that Texas customers
 9 receive \$11,617,907 of benefit as a result of the return on the prepaid pension
 10 assets (which includes the XES Plan portion of the prepaid asset), and they avoid
 11 paying \$1,568,032 in PBGC premiums as a result of the prepaid pension asset.
 12 Thus, even with the SPS prepaid pension asset included in rate base and earning a
 13 return at the WACC, SPS’s customers realize a net benefit of \$1.4 million as a
 14 result of the prepaid pension asset.

15 **Table RRS-RR-7**

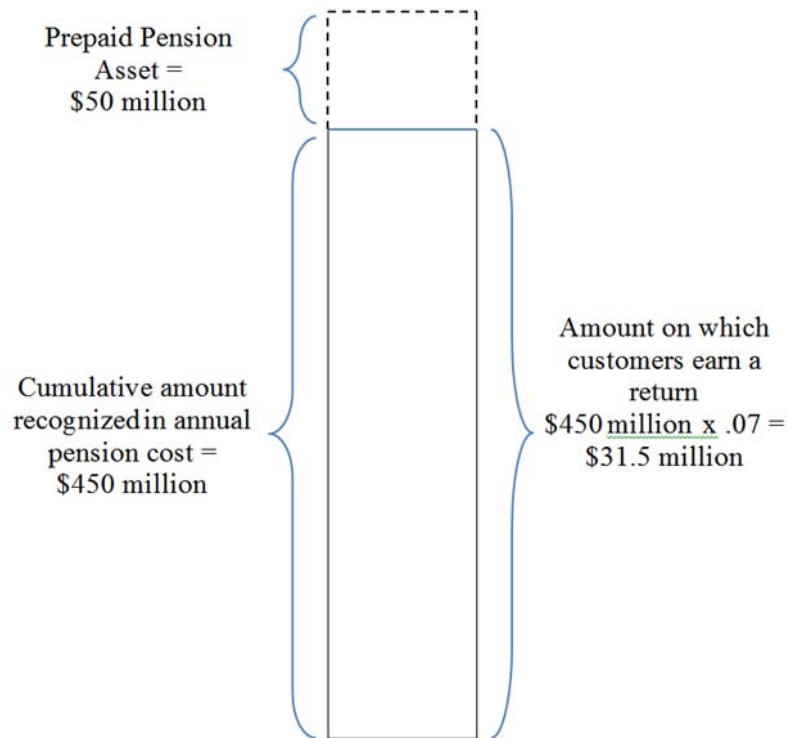

SPS Prepaid pension asset balance (excluding the XES prepaid pension asset)		\$153,633,570
Weighted average EROA for SPS Bargaining and NCE Non-Bargaining plans	x	6.776%
Initial return benefit to customers	=	\$10,410,771
Balance of XES prepaid pension asset		\$17,001,917
EROA for XES prepaid pension asset	x	7.10%
Return on XES prepaid pension asset	=	\$1,207,136
Avoided PBGC Premiums		\$1,568,032
Total Pension Benefit		\$13,185,939
<u>Return on prepaid pension asset at WACC</u>	-	<u>\$11,799,058</u>
Net benefit to SPS customers from prepaid pension asset	=	\$1,386,881

1 **Q. Thus far you have been discussing the justification of including the SPS**
2 **prepaid pension asset in rate base. Is including the SPS prepaid pension**
3 **asset in rate base the only way of dealing with the prepaid pension asset**
4 **issue?**

5 A. No. Another solution would be to exclude the earnings on the assets represented
6 by the SPS prepaid pension asset from the calculation of annual pension cost for
7 regulatory purposes. The basic point is that customers should not be earning a
8 return on the prepaid pension assets without providing a corresponding return. It
9 would be inequitable to deny SPS a return on the SPS prepaid pension asset while
10 providing to customers all the benefits arising from the existence of these assets.
11 The entire prepaid pension asset produces investment income to offset pension
12 expenses, regardless of when the amounts were contributed or realized. Thus, if
13 the SPS prepaid pension asset is excluded from rate base, the earnings on the
14 prepaid pension assets should be excluded from the calculation of annual pension
15 cost, as depicted on Figure RRS-RR-5 (on the next page):¹¹

¹¹ The ADIT, FAS 106, and FAS 112 balances would have to be adjusted as well.

Figure RRS-RR-5¹²

1 Q. Do you recommend that the Commission exclude the return on the SPS
2 prepaid pension asset from rate base and from the calculation of annual
3 pension cost?

4 A. No. As I explained earlier, SPS's customers are actually better off as a result of
5 the prepaid pension asset because they receive a return on the Texas retail portion
6 of the XES prepaid pension asset but do not pay a return on it because that
7 prepaid pension asset is not included in the amount requested in rates. In
8 addition, the customers receive a benefit from the avoidance of incremental
9 PBGC premiums as a result of the prepaid pension asset. When all of those

¹² Again, these numbers are merely illustrative, but they demonstrate that customers are worse off if the prepaid pension asset is excluded from the calculation of annual pension cost. In the example in Figure RRS-RR-5, customers get credit for \$35 million in earnings, whereas without the \$50 million prepaid pension asset, they get credit for only \$31.5 million in earnings.

1 factors are considered, SPS's customers are better off if the prepaid pension asset
2 is included in both rate base and the calculation of annual pension cost, even after
3 the return on the prepaid pension asset is grossed up for taxes.

4 **Q. How would it affect SPS's annual pension cost if the earnings on the pension
5 trust assets were excluded from the cost of service?**

6 A. SPS's annual pension cost would increase by more than \$10.4 million if the
7 earnings on the SPS pension trust assets were excluded from the cost of service.
8 Because pension costs are passed through to customers on a dollar-for-dollar
9 basis, SPS's revenue requirement would increase by the same amount.

10 **Q. Does this conclude your pre-filed direct testimony?**

11 A. Yes.

2018 VALUATION RESULTS AND 2019-2023 CONTRIBUTION AND COST ESTIMATES

Dear Rick:

This letter summarizes the results of the 2018 plan year IRS funding valuations for Xcel Energy's qualified pension plans. Also included are final 2018 costs and updated 2019-2023 cost estimates for the Long-Term Disability (LTD) and Workers' Compensation plans. The results for these plans have been updated from the February 9, 2018, results to reflect 2018 census data for both plans. The 2020-2023 cost estimates for the PSCo Bargaining Plan have been updated to reflect the 5% cash balance plan for new hires, and the savings are projected to begin in 2020 when the new hires become participants in the plan. Costs for all other plans are unchanged from February 9, 2018.

Attached to this letter are updated PBGC variable rate premium and PBO funded status forecasts followed by benefit cost exhibits. Also included is an exhibit that provides plan specific details of the cost reconciliations for the qualified pension plans.

PENSION PLAN FUNDING

Summary of Key Results

The key results for each plan are provided in the following table:

(\$ in Millions)	Xcel Energy Pension Plan	NCE Nonbargaining Plan	SPS Bargaining Plan	PSCo Bargaining Plan
Effective Interest Rate	5.52%	5.44%	5.68%	5.65%
Contributions for the 2018 Plan Year (as of January 1, 2018)				
Minimum Required Contribution Before Funding Balance	\$ 67.6	\$ 12.8	\$ 10.8	\$ 18.6
Minimum Required Contribution After Funding Balance	\$ 0.0	\$ 1.4	\$ 0.0	\$ 0.0
PBGC Premiums				
PBGC Variable Rate Premiums	\$ 0.0	\$ 0.9	\$ 0.0	\$ 3.5

Page 1 of 11

Funded Status

A plan's funded status is measured by comparing the present value of plan benefits to the value of plan assets. The following table summarizes the 2018 plan year funded percentages:

Minimum Funding and Benefit Restrictions - 2018				
(\$ in Thousands)	Xcel Energy Pension Plan	NCE Nonbargaining Plan	SPS Bargaining Plan	PSCo Bargaining Plan
1. Effective Interest Rate	5.52%	5.44%	5.68%	5.65%
2. Target Liability as of January 1	\$1,552,878	\$247,394	\$310,436	\$887,694
3. Actuarial Value of Assets as of January 1	\$1,595,413	\$242,395	\$346,874	\$891,871
4. Funding Balance as of January 1	\$191,657	\$11,435	\$60,204	\$101,952
5. Funded Percentage before funding balance reduction from plan assets [(3) / (2)]	102.7%	98.0%	111.7%	100.5%
6. Funded Percentage with funding balance reduction from plan assets (FTAP) [((3) - (4)) / (2)]	90.4%	93.4%	92.3%	89.0%
7. Preliminary Adjusted Funding Target Attainment Percentage (AFTAP) ¹	102.7%	93.4%	111.7%	100.5%

¹ If Actuarial Value of Assets/Target Liability >= 100%, the AFTAP matches line 5; otherwise it matches line 6.

Benefit Restrictions

Based on the 2018 funding results, benefit restrictions are not expected to apply for the 2018 plan year since the preliminary AFTAP for each plan exceeds 80.0%. We will provide our certification of the funded status for the plans prior to the September 30, 2018 deadline.

Funding Balances

The following summarizes the funding balance activity for the Xcel Energy pension plans.

(\$ in Millions)	Xcel Energy Pension Plan	NCE Nonbargaining Plan	SPS Bargaining Plan	PSCo Bargaining Plan
Funding Balances at January 1, 2017	\$ 148.5	\$ 12.5	\$ 57.4	\$ 93.2
Funding Balances used for the 2017 plan year	(65.3)	(8.6)	(4.8)	(12.0)
Excess contributions elected to be added to funding balance	95.5	7.0	0.0	7.8
Investment experience adjustments	13.0	0.5	7.6	13.0
Amount of funding balance forfeited for AFTAP purposes	0.0	0.0	0.0	0.0
Funding Balances at January 1, 2018	\$ 191.7	\$ 11.4	\$ 60.2	\$ 102.0

PBGC Premiums

The PBGC variable rate premium amounts are based on the Standard Premium Funding Target for the PSCo Bargaining Plan and the NCE Nonbargaining Plan. The Alternative Premium Funding Target is used for the Xcel Energy Pension Plan and the SPS Bargaining Plan. The PSCo Bargaining Plan and the NCE Nonbargaining Plan are above the per-participant cap and the variable rate premium is limited to \$523 per

Mr. Richard R. Schrubbe
May 18, 2018

participant. The Xcel Energy Pension Plan and the SPS Bargaining Plan do not have an unfunded vested liability; therefore the variable rate premium is \$0 for these plans.

The NCE Nonbargaining Plan and PSCo Bargaining Plan can eliminate variable rate premiums with September 15, 2018 contributions of \$24.0 million and \$129.1 million, respectively.

ERISA 4010 Funded Status

An ERISA 4010 filing is required if any 4010 Funding Target Attainment Percentage (4010 FTAP) for a plan within the controlled group of the plan sponsor is less than 80%. For this purpose, the target liability is calculated using interest rates that ignore the MAP-21/HATFA/BBA interest rate corridors and plan assets are reduced by the amount of the prefunding balance and funding standard carryover balance. This determination is done as of the valuation date for the plan year ending within the information year ending December 31, 2018 (i.e., the 2018 plan year). The valuation date for the 2018 plan year is January 1, 2018. The January 1, 2018 4010 FTAPs for all Xcel Energy pension plans are as follows:

4010 FTAP – 2018 (\$ in Thousands)	Xcel Energy Pension Plan	NCE Nonbargaining Plan	SPS Bargaining Plan	PSCo Bargaining Plan
1. Effective Interest Rate	3.84%	3.73%	4.02%	3.99%
2. Target Liability as of January 1	\$1,768,124	\$278,408	\$372,530	\$1,056,005
3. Actuarial Value of Assets as of January 1	\$1,595,413	\$242,395	\$346,874	\$891,871
4. Funding Balance as of January 1	\$191,657	\$11,435	\$60,204	\$101,952
5. Funded Percentage with funding balance reduction from plan assets (4010 FTAP) [((3) – (4)) / (2)]	79.4%	83.0%	77.0%	74.8%

Based on the results above, a filing will be required for the 2018 information (fiscal) year unless additional contributions for the 2017 plan year are made on or before September 15, 2018. Alternatively, funding balances may be forfeited such that the 4010 FTAP for each plan is above 80%. More specifically, Xcel Energy can avoid an ERISA 4010 filing with contributions and/or funding balance forfeitures by September 15, 2018 of \$11.2 million, \$11.8 million, and \$57.2 million to the Xcel Energy Pension Plan, SPS Bargaining Plan, and PSCo Bargaining Plan respectively. If no action is taken and a 4010 filing is required for the 2018 information year, the submission deadline will be April 15, 2019.

LONG-TERM DISABILITY AND WORKERS' COMPENSATION RESULTS

The combined 2018 cost/(income) for the Workers' Compensation plan and the Long-Term Disability plan is \$0.6 million, a \$0.6 million decrease from our February estimate of \$1.2 million. The final discount rate used for these plans is 3.51%, which is the same as the estimated rate used for the February results.

The actual 2018 cost/(income) for the Long-Term Disability plan is \$(0.2) million, which is a decrease of \$0.6 million compared to the 2018 estimated cost/(income) for the plan provided in February. The cost for the plan decreased due to census data changes, which included fewer participants receiving payments from the plan than expected. The actual 2018 cost/(income) for the Workers' Compensation plan is \$0.8 million, which is the same as the estimated 2018 cost/(income) for the plan provided in February.

Mr. Richard R. Schrubbe
May 18, 2018

RESULTS EXHIBITS

Pension contribution and PBGC variable rate premium forecasts are attached to the end of this letter. The planned funding schedule provided by Xcel Energy is assumed to sufficiently cover all minimum required contributions. Contribution and PBGC premium forecasts include estimates of the new IRS prescribed mortality tables starting in 2019. Benefit cost forecasts for all plans except the PSCo Bargaining Plan and LTD and Workers' Compensation plans have not been updated from the forecasts provided on February 9, 2018. Estimates of 2019-2023 benefit costs summarized by legal entity are also presented in the attached exhibits as follows:

- Exhibit I: Benefit Cost Estimates – Qualified Pension Plans
- Exhibit II: Benefit Cost Estimates – Nonqualified Pension Plans
- Exhibit III: Benefit Cost Estimates – Retiree Medical and Life Insurance Plan
- Exhibit IV: Liabilities – LTD and Workers' Compensation
- Exhibit V: Claims and Expenses – LTD and Workers' Compensation
- Exhibit VI: Benefit Cost Estimates – LTD and Workers' Compensation
- Exhibit VII: Benefit Cost Reconciliation Details – Qualified Pension Plans

Mr. Richard R. Schrubbe
May 18, 2018

Plans Valued

The attached exhibits include estimates for the following employee benefit plans maintained by Xcel Energy Inc. (Xcel Energy):

- Xcel Energy Pension Plan
- Xcel Energy Inc. Nonbargaining Pension Plan (South) [NCE Nonbargaining Plan]
- New Century Energies Inc. Retirement Plan for SPS Bargaining Unit Employees and Former Nonbargaining Unit Employees [SPS Bargaining Plan]
- New Century Energies Inc. Retirement Plan for PSCo Bargaining Unit Employees and Former Nonbargaining Unit Employees [PSCo Bargaining Plan]
- Xcel Energy Nonqualified Defined Benefit Plan
- Xcel Energy SERP
- SPS SERP
- Employment Agreements
- Fort St. Vrain Nuclear Operations Personnel Plan
- NMC SERP Part A
- Xcel Energy Retiree Medical and Life Insurance Plan (including Executive Life Insurance)
- Xcel Energy Workers' Compensation
- Xcel Energy Long-Term Disability (LTD) Income

Mr. Richard R. Schrubbe
May 18, 2018

FORECAST RESULTS

Forecast results are based on the information summarized below.

The following provides a reconciliation of actual 2018 costs to 2019 estimated costs, prior to regulatory effects and potential settlement charges:

Reconciliation of Benefit Costs (prior to regulatory effects and potential settlement charges)

(\$ in Millions)	Qualified Pension ¹	Nonqualified Pension	Retiree Medical	Workers' Compensation	Long Term Disability	Total
Final 2018	\$116.3	\$4.3	(\$5.0)	\$0.8	(\$0.2)	\$116.2
Historical asset performance	1.1	0.0	0.0	0.0	0.0	1.1
Expected liability, asset, and loss amortization changes	(14.4)	0.0	(0.2)	(0.4)	0.5	(14.5)
Initial 2019 Estimate	\$103.0	\$4.3	(\$5.2)	\$0.4	\$0.3	\$102.8

¹ Qualified Pension Plan costs reflect the assumption that NSP-MN and Xcel Energy Nuclear costs are determined under the Aggregate Cost Compensation Method. No additional regulatory deferrals have been reflected. See Exhibit VII for additional details.

DATA, ASSUMPTIONS, METHODS AND PLAN PROVISIONS

The 2018 benefit costs, 2018 funding results and estimated 2019-2023 costs reflect the following data, assumptions, methods and plan provisions:

Data

For the qualified and nonqualified pension plans and the retiree medical plan, the 2018 benefit cost results and results for 2019-2023 are based on participant data as of January 1, 2017, projected to the end of the year based on status, compensation and benefit changes through November 30, 2017, and known retirements for December 2017. Actual new entrants through November 30, 2017, and expected new entrants through December 31, 2017, are included. See our February 9, 2018, letter for more details. For the Workers' Compensation and Long-Term Disability plans, the 2018 benefit cost results and estimated costs for 2019-2023 are based on participant data as of January 1, 2018. The 2018 pension funding results are based on data as of January 1, 2018.

Mr. Richard R. Schrubbe
May 18, 2018

Economic Assumptions

The key assumptions used to determine the actual 2018 and estimated 2019 - 2023 benefit cost results are provided below. The assumptions used to calculate the cost under the aggregate cost method are the same as used to prepare the ASC 715 results, except as noted. Actual asset returns net of administrative expenses are assumed to equal the expected return on assets assumptions throughout the forecast period.

	May 18, 2018 results
Benefit Cost	
Discount Rate – ASC 715:	
■ Xcel Energy Pension Plan	3.60%
■ NCE Nonbargaining Pension Plan	3.52%
■ SPS Bargaining Pension Plan	3.71%
■ PSCo Bargaining Pension Plan	3.68%
■ Nonqualified Pension Plan	3.49%
■ Retiree Medical and Life Insurance Plan	3.62%
■ Workers' Compensation and LTD	3.51%
Expected Return on Assets Assumption – Pension:	
■ Xcel Energy Pension Plan	7.10%
■ NCE Nonbargaining Pension Plan	6.90%
■ SPS Bargaining Pension Plan	6.75%
■ PSCo Bargaining Pension Plan	6.50%
■ Weighted Average Expected Return	6.87%
Expected Return on Assets Assumption – VEBA (Bargaining/Nonbargaining)	5.80%
Discount Rate – Aggregate Cost	7.10%
Salary Scale ¹	3.75%
Initial Medical Trend:	
■ Pre-Medicare	7.00%
■ Post-Medicare	5.50%
Ultimate Medical Trend	4.50%
Year Ultimate Trend is Reached	2023

¹ Career average of age-graded table (nonbargaining) and service-graded table (bargaining)

- The interest rate for converting lump sums to annuities and annuities to lump sums was updated from 4.00% to 3.50% in all years. The pre-PPA lump sum conversion interest rate was updated from 3.00% to 3.75%.
- The interest crediting rate for the 5% cash balance formula was updated from 3.00% to 2.75%. The interest crediting rate for the Retirement Spending Account was updated from 1.75% to 2.50%.
- The HRA trend assumption remains at 2.0%.
- The medical trend assumption was updated to an initial rate of 7.0% in 2018 for pre-65 claims costs and an initial rate of 5.5% in 2018 for post-65 claims costs, with both pre-65 and post-65 claims costs grading to an ultimate rate of 4.5% in 2023. The previous medical trend assumption was an initial rate of 5.0% in 2018 grading to an ultimate rate of 4.5% in 2019, for both pre-65 and post-65 claims costs.

Mr. Richard R. Schrubbe
May 18, 2018

We have assumed Xcel Energy continues to use the 24-month average of the three-segment interest rates as of September in the year prior to the valuation date with applicable interest rate stabilization corridors. The underlying three-segment rates from early May 2018 were assumed to remain constant throughout the forecast period. This methodology produces the following effective interest rates:

	Year					
	2018	2019	2020	2021	2022	2023
Xcel Energy Pension Plan	5.52%	5.36%	5.22%	4.83%	4.45%	4.20%
NCE Nonbargaining Plan	5.44%	5.27%	5.14%	4.74%	4.36%	4.11%
SPS Bargaining Plan	5.68%	5.51%	5.38%	4.97%	4.58%	4.31%
PSCo Bargaining Plan	5.65%	5.49%	5.35%	4.95%	4.56%	4.30%

Demographic Assumptions

- Active participant counts are assumed to remain level throughout the forecast period.
- For the accounting benefit cost valuations, the mortality assumption is the RP-2014 tables (blue collar for bargaining participants and white collar for nonbargaining participants, as adjusted for 2014 Xcel Energy mortality study) projected with generational mortality improvements using an adjusted SOA MP-2016 methodology.
- For the accounting benefit cost valuations, the mortality assumption for converting lump sums to annuities or annuities to lump sums is the 2018 IRS mortality tables projected to the commencement date using the SOA MP-2017 methodology.
- Per guidance from Xcel Energy, adoption of the new 2018 IRS prescribed mortality tables has been delayed until 2019 for IRS funding and PBGC premium valuations.

Pension Contributions

The forecasts reflect actual 2018 contributions of \$150 million made on January 2, 2018, and planned contributions provided by Xcel Energy for 2019 through 2023. The table below summarizes the amounts assigned to each plan over the forecast period:

	Year					
	2018	2019	2020	2021	2022	2023
Xcel Energy Pension Plan	\$ 120.0	\$ 95.0	\$ 95.0	\$ 80.0	\$ 45.0	\$ 65.0
NCE Nonbargaining Plan	10.0	20.0	20.0	15.0	15.0	10.0
SPS Bargaining Plan	5.0	15.0	10.0	10.0	7.0	9.0
PSCo Bargaining Plan	15.0	20.0	25.0	45.0	83.0	66.0
Total Contribution	\$ 150.0	\$ 150.0	\$ 150.0	\$ 150.0	\$ 150.0	\$ 150.0

- Contributions in 2019 and beyond are assumed to be paid on January 15 and assigned to the prior plan year.

PBGC Premiums

- The PBGC Variable Rate Premium estimates reflect the increase in premium rates under The Bipartisan Budget Act of 2015, actual January 1, 2018, asset values, and demographic experience.
- The estimates assumes the NCE Nonbargaining Plan and PSCo Bargaining Plan use the Standard Premium Funding Target. The Xcel Energy Pension Plan and SPS Bargaining Plan are assumed to use the Alternative Premium Funding Target.
- The PSCo Bargaining Plan is at the per-participant variable rate premium cap in 2018 and is expected to remain at the cap for 2019. The NCE Nonbargaining Plan is at the per-participant variable rate premium cap in 2018.

Retiree Medical and Life Insurance Plan – Effects of Health Care Reform

- The effective date of the legislative excise tax (“Cadillac Tax”) has been delayed from 2020 to 2022.
- Otherwise, our estimates continue to assume the same effects as noted in our 2018 ASC 715 cost report dated April 30, 2018.

Plan Changes

- Effective January 1, 2018 for non-bargaining participants, annual \$1,400 Retirement Contributions to the Retirement Savings Account will cease; interest will continue to accrue on the balance as of December 31, 2017.
- Effective December 31, 2022, non-bargaining participants who have not met the plans' Early Retirement definition or Normal Retirement definition will no longer be eligible for the Social Security Supplement.
- Certain nonbargaining participants received a one-time addition to their qualified basic pension benefit as of December 31, 2017.
- Effective February 22, 2018, employees hired into the PSCo Bargaining Plan are assumed to receive a 5% Cash Balance benefit. Due to the one year participation requirement, results are not impacted until 2020.

ACTUARIAL CERTIFICATION

As requested by Xcel Energy Inc., this report provides results of the actuarial valuations of the Xcel Energy Inc. employee benefit plans indicated above. This report should not be used for other purposes, distributed to others outside Xcel Energy Inc. or relied upon by any other person without prior written consent from Willis Towers Watson. Except where we expressly agree in writing, this report should not be disclosed or provided to any third party, other than as provided below. In the absence of such consent and an express assumption of responsibility, no responsibility whatsoever is accepted by us for any consequences arising from any third party relying on this report or any advice relating to its contents.

Xcel Energy Inc. may make a copy of this report available to auditors or appropriate governmental agencies of the plan or the plan sponsor, but we make no representation as to the suitability of this report for any purpose other than that for which it was originally provided and accept no responsibility or liability to the auditors in this regard. Xcel Energy Inc. should draw the provisions of this paragraph to the attention of the auditors or appropriate governmental agencies when providing this report to them.

In preparing this valuation, we have relied upon information and data provided to us by Xcel Energy Inc. and other persons or organizations designated by Xcel Energy Inc. An audit of the financial and participant data provided was not performed, but we have checked the data for reasonableness as appropriate based on the

Mr. Richard R. Schrubbe
May 18, 2018

purpose of the valuation. The results presented in this report are directly dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data, assets, plan provisions or other information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by Xcel Energy Inc., may produce materially different results that could require that a revised report be issued.

This valuation reflects our understanding of the relevant provisions of the Pension Protection Act of 2006. The IRS has yet to issue final guidance with respect to certain aspects of this law. It is possible that such guidance may conflict with our understanding of the law and could therefore affect results shown in this report.

The results summarized in this report involve actuarial calculations that require assumptions about future events. We believe the assumptions and methods used in this report are reasonable and appropriate for the purposes for which they have been used. In our opinion, all methods, assumptions and calculations are in accordance with requirements of the Internal Revenue Code and ERISA, and the applicable financial accounting standards, including ASC 712 and 715 and the procedures followed and presentation of results are in conformity with generally accepted actuarial principles and practices.

Assumptions for determining benefit cost results were selected by Xcel Energy Inc. Xcel Energy Inc. uses the standards set out in ASC 715 to calculate pension cost for each plan in total; pension cost for the subsidiaries is calculated based on plan assets allocated to each subsidiary in proportion to the PBO for each subsidiary. Beginning in fiscal 2010, Discontinued Operations is allocated assets in proportion to its PBO, similar to nondiscontinued operations. The gain/(loss) amortization is allocated to each subsidiary in proportion to the gain/(loss) balance for each subsidiary (excluding deferred asset gains and losses). This methodology is consistent with former NSP's methodology since 1998 and has been applied to the former NCE pension plans since January 1, 2001. A similar methodology is used for the ASC 715 costs for the Retiree Medical and Life Plan, except separate asset accounts are used for each subsidiary.

Except as otherwise provided herein, the results presented are based on the data, assumptions, methods and plan provisions outlined in the actuarial valuation reports to determine accounting requirements for the plan for the plan year beginning January 1, 2018 dated April 30, 2018. Therefore, the descriptions of the data, assumptions, methods, plan provisions and limitations of the valuation and its use should be considered part of this letter report.

The undersigned consultants with actuarial credentials meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. Our objectivity is not impaired by any relationship between the Xcel Energy Inc. and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC.

Subject: 2019 Benefit Costs and 2020–2024 Benefit Cost Estimates

Dear Rick:

Attached are 2019 costs and 2020-2024 budget estimates based on the final year-end 2018 asset values and disclosure assumptions described in our January 25, 2019 letter. Workers Compensation and Long-Term Disability results are preliminary and will be finalized in May.

SUMMARY OF KEY RESULTS

The key changes from our forecast originally provided on May 18, 2018 are as follows:

- Benefit Costs reflect final 2019 assumptions:
 - Discount rates increased approximately 0.70%, on average, from the 3.63% average assumption used in the May 18, 2018 estimates to 4.32% at December 31, 2018.
- Actual 2018 pension asset returns were (4.67%) compared to an expected return of 6.87% and actual retiree medical asset returns were (2.77%) compared to an expected return of 5.80%.
- Participant data has been updated to reflect known status and pay changes through November 30, 2018 and expected December 2018 retirements.

Benefit Cost Results (prior to regulatory deferrals)

Cost/(Income) (\$ in Millions)	2018 Actual	2019 Cost May 18, 2018 Estimate	2019 Cost February 8, 2019 ¹
Qualified Pension Plans ²	\$116.3	\$103.0	\$107.0
Nonqualified Pension Plans	4.3	4.3	3.6
Retiree Medical & Life Insurance Plan	(5.0)	(5.2)	(2.0)
Workers' Compensation	0.8	0.4	(0.4)
Long-Term Disability	(0.2)	0.3	(0.1)
Total	\$116.2	\$102.8	\$108.1
XEPP and NCE Settlement Charges³	\$90.7	\$0.0	\$0.0
<i>Discount Rate</i>	<i>3.49%-3.71%</i>	<i>3.49%-3.71%</i>	<i>4.25%-4.37%</i>

¹ Workers Compensation and Long-Term Disability costs are preliminary, final results will be provided in May.

² Qualified Pension Plan costs reflect the assumption that NSP-MN and Xcel Energy Nuclear costs are determined under the Aggregate Cost Compensation Method. No additional regulatory deferrals have been reflected. See Exhibit VII for additional details.

³ Results for the Xcel Energy Pension Plan reflect a 2018 settlement charge of \$82,853,000 and results for the NCE Non-Bargaining Pension Plan reflect a 2018 settlement charge of \$7,852,000. Please see 2018 Settlement Charge exhibit dated January 22, 2019 for additional information. Settlement accounting may be required in 2019 if lump sum benefit payments exceed the sum of service cost and interest cost. No settlements have been estimated for 2019 or beyond at this time.

Mr. Richard R. Schrubbe
February 8, 2019

The following provides a reconciliation of cost (prior to regulatory deferrals) between the estimated 2019 cost provided in our May 18, 2018 letter, the 2019 budget estimates provided in our December 19, 2018 PTAC presentation and the 2019 costs provided in this letter (\$ in millions):

	Qualified Pension ¹	Non-qualified Pension	Retiree Medical	Workers' Compensation	Long Term Disability	Total
Initial 2019 Estimate (May 18, 2018)	\$103.0	\$4.3	(\$5.2)	\$0.4	\$0.3	\$102.8
Estimated demographic experience ²	6.3	(0.7)	(1.4)	0.0	0.0	4.2
Updated demographic assumptions ³	1.1	0.1	0.1	(0.1)	0.0	1.2
Updated retiree claims and participant contributions ⁴	0.0	0.0	(1.6)	0.0	0.0	(1.6)
Discount rates ⁵	(11.6)	(0.2)	(0.9)	(0.6)	(0.7)	(14.0)
2018 asset performance ⁶	9.7	0.0	4.5	0.0	0.0	14.2
Expected rate of return assumption update ⁷	0.0	0.0	2.0	0.0	0.0	2.0
Reduced loss amortization from 2018 settlement charge	(2.9)	0.0	0.0	0.0	0.0	(2.9)
Updated 2019 Estimate (December 19, 2018)	\$105.6	\$3.5	(\$2.5)	(\$0.3)	(\$0.4)	\$105.9
Reflect final 2018 settlement charges	0.2	0.0	0.0	0.0	0.0	0.2
Final demographic experience ⁸	(1.1)	0.0	(0.2)	(0.2)	0.1	(1.4)
Final discount rates	2.3	0.1	0.2	0.1	0.2	2.9
Final 2018 asset returns ⁹	0.0	0.0	0.5	0.0	0.0	0.5
2019 Costs (February 8, 2019)	\$107.0	\$3.6	(\$2.0)	(\$0.4)	(\$0.1)	\$108.1

¹ Qualified Pension results reflect the assumption that NSP-MN costs and Xcel Energy Nuclear costs are determined under the Aggregate Cost Compensation Method. No additional regulatory deferrals have been reflected.

² Estimated impact of updated participant status and compensation data through September 30, 2018 with additional adjustments for expected retirements and lump sum payments through December 2018. Primary drivers of cost include more retirements than expected, larger than expected lump sum payments, fewer deaths than expected and compensation rates approximately 0.4% larger than expected.

³ Update retirement rates to reflect recent plan changes and benefits offered to new hires and change to middle-of-year decrements.

⁴ Per capita claims cost increased 1.9% (0.3% pre-65, 2.2% post-65) versus expected increase (7.0% pre-65, 5.5% post-65). Expected Medicare Part D reimbursement for eligible retirees decreased 3.0% versus expected increase of 5.5%.

⁵ December 31, 2018 discount rates assumed to be equal to the discount rates from Willis Towers Watson BOND:Link model results as of October 31, 2018. Bond model excludes collateralized bonds.

⁶ Estimate assumes year-end asset values are equal to October 31, 2018 values with adjustments for two months of estimated disbursements (estimated 2018 return of -4.2% for pension and -1.6% for VEBA).

⁷ Decrease VEBA expected return on assets assumption from 5.80% to 5.30%.

⁸ Impact of updated participant status and compensation data through November 30, 2018 and benefit payment experience.

⁹ Reflects true-up of December 28, 2018 lump sums payments from XEPP and NCE.

Results Exhibits

Benefit cost results are summarized by legal entity and presented in the attached exhibits as follows:

- Exhibit I: Benefit Cost Estimates – Qualified Pension Plans
- Exhibit II: Benefit Cost Estimates – Nonqualified Pension Plans
- Exhibit III: Benefit Cost Estimates – Retiree Medical and Life Insurance Plan
- Exhibit IV: Liabilities – LTD and Workers Compensation
- Exhibit V: Claims and Expenses – LTD and Workers Compensation
- Exhibit VI: Benefit Cost Estimates – LTD and Workers Compensation
- Exhibit VII: Benefit Cost Reconciliation Details – Qualified Pension Plans

Plans Valued

The attached exhibits include results for the following employee benefit plans maintained by Xcel Energy Inc. (Xcel Energy):

- Xcel Energy Pension Plan
- Xcel Energy Inc. Nonbargaining Pension Plan (South) [NCE Nonbargaining Plan]
- New Century Energies Inc. Retirement Plan for SPS Bargaining Unit Employees and Former Nonbargaining Unit Employees [SPS Bargaining Plan]
- New Century Energies Inc. Retirement Plan for PSCo Bargaining Unit Employees and Former Nonbargaining Unit Employees [PSCo Bargaining Plan]
- Xcel Energy Nonqualified Defined Benefit Plan, including:
 - Xcel Energy SERP
 - SPS SERP
 - Employment Agreements
 - Fort St. Vrain Nuclear Operations Personnel Plan
 - NMC SERP Part A
- Xcel Energy Retiree Medical and Life Insurance Plan (including Executive Life Insurance)
- Xcel Energy Workers' Compensation
- Xcel Energy Long-Term Disability (LTD) Income

DATA, ASSUMPTIONS, METHODS AND PLAN PROVISIONS

The fiscal 2019 costs and estimated 2020-2024 costs reflect the following data, assumptions, methods and plan provisions:

Data

Results for 2019-2024 are based on participant data as of January 1, 2018 projected to the end of the year based on status, compensation and benefit changes through November 30, 2018 and known retirements for December 2018. Actual new entrants through November 30, 2018 and expected new entrants through December 31, 2018 are included.

Mr. Richard R. Schrubbe
February 8, 2019

Economic Assumptions

The key assumptions used to determine the actual 2019 and estimated 2020 - 2024 benefit cost results are provided below. The assumptions used to calculate the cost under the aggregate funding method are the same as used to prepare the ASC 715 results, except as noted. Actual asset returns are assumed to equal the expected return on assets assumptions throughout the forecast period. The following primary economic assumptions were used to prepare the results:

	2018 Cost and 2019 Estimate (May 18, 2018)	2019 Estimate (December 19, 2018)	2019 Cost
Benefit Cost			
Discount Rate – ASC 715			
– Xcel Energy Pension Plan	3.60%	4.52%	4.31%
– NCE Nonbargaining Pension Plan	3.52%	4.46%	4.25%
– SPS Bargaining Pension Plan	3.71%	4.58%	4.37%
– PSCo Bargaining Pension Plan	3.68%	4.56%	4.36%
– Nonqualified Pension Plan	3.49%	4.47%	4.26%
– Retiree Medical and Life Insurance Plan	3.62%	4.53%	4.32%
– Workers Compensation and LTD	3.51%	4.45%	4.23%
Expected Return on Assets Assumption – Pension			
– Xcel Energy Pension Plan	7.10%	7.10%	7.10%
– NCE Nonbargaining Pension Plan	6.90%	6.90%	6.90%
– SPS Bargaining Pension Plan	6.75%	6.75%	6.75%
– PSCo Bargaining Pension Plan	6.50%	6.50%	6.50%
– <i>Weighted Average Expected Return</i>	6.87%	6.87%	6.87%
Expected Return on Assets Assumption – VEBA	5.80%	5.30%	5.30%
Discount Rate – Aggregate Cost	7.10%	7.10%	7.10%
Salary Scale ¹	3.75%	3.75%	3.75%
Initial Medical Trend			
- Pre-Medicare	7.00%	6.50%	6.50%
- Post-Medicare	5.50%	5.30%	5.30%
Ultimate Medical Trend	4.50%	4.50%	4.50%
Year Ultimate Trend is Reached	2023	2023	2023

¹ Career average of age-graded table (nonbargaining) and service-graded table (bargaining)

- The interest rate for converting lump sums to annuities and annuities to lump sums was updated from 3.50% to 4.10% in all years. The pre-PPA lump sum conversion interest rate was updated from 2.75% to 3.10%.
- The interest crediting rate for the 5% cash balance formula was updated from 2.75% to 3.10%. The interest crediting rate for the Retirement Spending Account was updated from 2.50% to 3.60%.
- The HRA trend assumption remains at 2.0%.
- For additional assumption details, see our December 31, 2018 disclosure results provided January 25, 2019.

Mr. Richard R. Schrubbe
February 8, 2019

Pension Contributions

The forecasts reflect actual 2019 contributions of \$150 million made on January 2, 2019. At this time, the contribution forecasts have not been updated and reflect the planned contributions provided by Xcel Energy for 2020 through 2024. Contribution forecasts will be updated in the spring when final 2019 funding results and census data are available. The table below summarizes the amounts assigned to each plan over the forecast period:

	Year					
	2019	2020	2021	2022	2023	2024
Xcel Energy Pension Plan	\$ 90.0	\$ 85.0	\$ 68.0	\$ 48.0	\$ 45.0	\$ 60.0
NCE Nonbargaining Plan	5.0	15.0	12.0	12.0	10.0	5.0
SPS Bargaining Plan	15.0	10.0	10.0	5.0	10.0	0.0
PSCo Bargaining Plan	40.0	40.0	35.0	35.0	35.0	35.0
Total Contribution	\$ 150.0	\$ 150.0	\$ 125.0	\$ 100.0	\$ 100.0	\$ 100.0

- Contributions in 2020 and beyond are assumed to be paid on January 15th and assigned to the prior plan year.

Demographic Assumptions

- Participant counts from January 1, 2018 were adjusted for actual new entrant counts through November 30, 2018, expected new entrants through December 31, 2018 and terminations/retirements as described above under Data. No additional changes in headcount levels are assumed.

Retiree Medical and Life Insurance Plan – Effects of Health Care Reform

- Our estimates continue to assume the same effects as noted in our 2018 ASC 715 cost report dated April 30, 2018.

Plan Changes

Effective February 22, 2018, employees hired or rehired into the PSCo Bargaining Plan receive a 5% Cash Balance benefit. Due to the one year participation requirement, new hires are not included until 2020. Rehired employees and transfers participate immediately. All other plan provisions remain the same as provided in our 2018 benefit cost reports dated April 30, 2018.

Mr. Richard R. Schrubbe
February 8, 2019

ACTUARIAL CERTIFICATION

As requested by Xcel Energy Inc., this report provides results of the actuarial valuations of the Xcel Energy Inc. employee benefit plans indicated above. This report should not be used for other purposes, distributed to others outside Xcel Energy Inc. or relied upon by any other person without prior written consent from Willis Towers Watson US LLC. Except where we expressly agree in writing, this report should not be disclosed or provided to any third party, other than as provided below. In the absence of such consent and an express assumption of responsibility, no responsibility whatsoever is accepted by us for any consequences arising from any third party relying on this report or any advice relating to its contents.

Xcel Energy Inc. may make a copy of this report available to auditors or appropriate governmental agencies of the plan or the plan sponsor, but we make no representation as to the suitability of this report for any purpose other than that for which it was originally provided and accept no responsibility or liability to the auditors in this regard. Xcel Energy Inc. should draw the provisions of this paragraph to the attention of the auditors or appropriate governmental agencies when providing this report to them.

In preparing this valuation, we have relied upon information and data provided to us by Xcel Energy Inc. and other persons or organizations designated by Xcel Energy Inc. An audit of the financial and participant data provided was not performed, but we have checked the data for reasonableness as appropriate based on the purpose of the valuation. The results presented in this report are directly dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data, assets, plan provisions or other information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by Xcel Energy Inc., may produce materially different results that could require that a revised report be issued.

This valuation reflects our understanding of the relevant provisions of the Pension Protection Act of 2006. The IRS has yet to issue final guidance with respect to certain aspects of this law. It is possible that such guidance may conflict with our understanding of the law and could therefore affect results shown in this report.

The results summarized in this report involve actuarial calculations that require assumptions about future events. We believe the assumptions and methods used in this report are reasonable and appropriate for the purposes for which they have been used. In our opinion, all methods, assumptions and calculations are in accordance with requirements of the Internal Revenue Code and ERISA, and the applicable financial accounting standards, including ASC 712 and 715 and the procedures followed and presentation of results are in conformity with generally accepted actuarial principles and practices.

Assumptions for determining benefit cost results were selected by Xcel Energy Inc. Xcel Energy Inc. uses the standards set out in ASC 715 to calculate pension cost for each plan in total; pension cost for the subsidiaries is calculated based on plan assets allocated to each subsidiary in proportion to the PBO for each subsidiary. Beginning in fiscal 2010, Discontinued Operations is allocated assets in proportion to its PBO, similar to nondiscontinued operations. The gain/(loss) amortization is allocated to each subsidiary in proportion to the gain/(loss) balance for each subsidiary (excluding deferred asset gains and losses). This methodology is consistent with former NSP's methodology since 1998 and has been applied to the former NCE pension plans since January 1, 2001. A similar methodology is used for the ASC 715 costs for the Retiree Medical and Life Plan, except separate asset accounts are used for each subsidiary.

Except as otherwise provided herein, the results presented are based on the data, assumptions, methods and plan provisions outlined in the actuarial valuation reports to determine accounting requirements for the plan for the plan year ending December 31, 2018 and beginning January 1, 2019 to be delivered in the next few weeks. Therefore, the descriptions of the data, assumptions, methods, plan provisions and limitations of the valuation and its use should be considered part of this letter report.

Mr. Richard R. Schrubbe
February 8, 2019

The undersigned consultants with actuarial credentials meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. Our objectivity is not impaired by any relationship between the Xcel Energy Inc. and our employer, Willis Towers Watson US LLC.
