

**NOTICE OF REVISION TO THE TRANSPORTATION ELECTRIFICATION PROGRAMS ADJUSTMENT (“TEPA”) OF PUBLIC SERVICE COMPANY OF COLORADO  
1800 LARIMER STREET, DENVER, COLORADO 80202-5533**

You are hereby notified that Public Service Company of Colorado (“Company”) has filed with the Colorado Public Utilities Commission (“Commission”) in compliance with the Public Utilities Law, Advice No. 1891- Electric to revise its Transportation Electrification Programs Adjustment (“TEPA”) in its Colorado P.U.C. No. 8 – Electric tariff to become effective on September 1, 2022, if approved by the Commission.

The principal proposed change is to decrease the TEPA applicable to most electric base rate schedules (excluding Transmission Voltage and Street Lighting) in the Company’s P.U.C No. 8 – Electric Tariff, to become effective September 1, 2022. This revision is made pursuant to the terms and conditions described on Sheet Nos. 146B through 146C of the Company’s TEPA tariff in P.U.C. No. 8 – Electric tariff, as approved by the Commission in Decision No. C21-0017, mailed on January 11, 2021, in Proceeding No. 20A-0204E. The Company proposes to revise the TEPA, effective September 1, 2022, to suspend the collection of the TEPA for the remainder of 2022.

The purpose of the revision in the TEPA is to reflect a decrease in TEPA rates based on an over collection of revenue requirement, as reflected in the annual TEP budgets approved by the Commission. The Company is proposing the suspension of TEPA collections for the remainder of 2022. The Company’s TEP programs are new and continue to make incremental progress and see increasing participation. However, the program spending has not reached the anticipated rate in 2022 and therefore the Company has already collected enough revenue to fund programs for 2022 and all remaining collections would ultimately be refunded to customers absent this discontinuance of the rate for the remainder of the year. Based on this unique situation, the Company is suspending the rate for the remainder of 2022 to discontinue the over collection and provide relief to customers for the remainder of the year.

The revenue effect of this filing is a net decrease in the Company’s annual revenue by an estimated \$3,964,597 compared to the rates currently in effect. The effect of this filing on the Company’s average residential electric bill is a decrease of \$0.45 per month to \$79.94, or 0.6 percent. The effect of this filing on the Company’s average typical small commercial electric bill is a decrease of \$0.52 per month to \$113.29, or 0.5 percent. The effect of this filing on the Company’s typical Secondary General and Primary General electric bills is a decrease of \$11.69 per month to \$2,352.01, or 0.5 percent and \$168.85 per month to \$46,791.90, or 0.4 percent respectively.

Table 1 shows the current and proposed TEPA rates and Table 2 shows the current and proposed total monthly bill impact for each of the major rate schedules, assuming average usage and average demand.
