Advanced power strip measure

Advanced power strips align with the objective of the Home Energy Squad product to provide moderate-impact, low-cost measures for customers. The measure will provide a new option and additional value for customers who participate in the program. The product currently offers an electronics timer device; however, this measure has received very low acceptance historically. An advanced power strip offers additional features and an improved customer experience, and therefore will be a more effective option for customers and for the product. The total product budget will not change due to the addition of this measure.

Additionally, this 60-Day Notice aligns lighting measures offered through Home Energy Squad with the changes being made within the Home Lighting & Recycling product through a concurrently issued 60-Day Notice adding a CFL replacement option and updating lifetimes of screw-in LEDs.

Table 1: Summary of Forecasted Impacts: Home Energy Squad

	2020	
	<i>As Filed</i>	<i>Revised per 60-day</i>
Electric Savings (kWh)	2,448,239	2,444,671
Electric Demand Reduction (kW)	613	613
Budget*	\$168,076	\$168,076
MTRC Test Ratio	1.15	1.50
Gas Savings (Dth)	15,731	15,731
Budget*	\$33,789	\$33,789
MTRC Test Ratio	2.50	2.50

*Rebates only. While the anticipated expenditure impacts are forecasted, the Company acknowledges that this Notice does not change the filed budget.
