

➤ **Summary of 60-Day Notice: Lighting Efficiency**

Public Service Company of Colorado (“the Company”) posts this 60-Day Notice to make changes to the Lighting Efficiency product in response to the 2019 Impact Evaluation.

The evaluation provided key findings in the areas of estimated net-to-gross (“NTG”), found 90% of rebated installations replaced fully-functional equipment, and explored the availability of full category C&I lighting sales data. The Company will implement the following recommendations in 2020:

- Update the NTG ratio for prescriptive and customer measures within the product to 73%;
- Explore efforts to assess product attribution and continue to evaluate changes in volume of LEDs sold with and without the product;
- Continue to carefully consider which types of lighting equipment will provide the greatest benefit to the product and set rebate levels to encourage installation of those equipment types; and
- Continue to monitor the lighting market and ensure that products frequently installed as maintenance measures are included in the midstream product.

Table 1: Summary of Forecasted Notice Impacts: *Lighting Efficiency*

	2020	
	<i>As Filed</i>	<i>Revised per Evaluation</i>
Electric Savings (kWh)	181,557,873	180,521,019
Electric Demand Reduction (kW)	25,262	25,119
Budget*	\$16,869,991	\$16,869,991
MTRC Test Ratio	1.56	1.56

*Rebates only. While the anticipated expenditure impacts are forecasted, the Company acknowledges that this Notice does not change the filed budget.

Detailed responses to each of the Comprehensive Evaluation recommendations can be found in the matrix included with the report.

Included with this Notice are the following documents:

- Revised Lighting Efficiency Deemed Savings Technical Assumptions; and
- Revised Lighting Efficiency Electric Forecast Summary.
