

SAVE MONEY AND BOOST THE PERFORMANCE OF YOUR KITCHEN

We're ready to help bring
energy and money savings
to your restaurant.

SERVE UP ENERGY SAVINGS

Restaurants are extremely energy intensive, using about 5 to 7 times more energy per square foot than other commercial buildings.¹

We have energy saving assessments with customized recommendations and valuable rebates on qualified high-efficiency equipment to help your restaurant save money and energy. Our gas and electric rebates help you save by offsetting the initial cost of qualifying equipment upgrades, providing energy savings, and lower operating costs over the long term with new high-efficiency equipment.

See some of the money-saving rebates your business could take advantage of below.

Equipment	Available Rebates ³	Fuel Types
LED lighting and lighting control rebates	Variety of rebates for LED lighting and controls	
Commercial dishwashers	\$125 – \$250 per unit	 
Steam cooker 3 – 6+ pan	\$350 – \$500 per unit	
Convection oven	\$500 per unit	
Pasta cooker	\$200 per unit	
Demand controlled kitchen ventilation	\$150 – \$500 depending on fan hp and electric or natural gas use.	 
Electronically commutated motor fan motors for walk-in freezers or coolers	\$70 per motor	
Charbroiler (infrared)	\$300 per unit	
Combi-oven	\$1,000 per unit	
Rotating rack oven	\$500 per unit	

1. ENERGY STAR® Guide for Cafes, Restaurants and Institutional Kitchens
