Subject: Comanche Groundwater Notification of Concentration Exceedances January 2023 sample event

Hi Linda,

We have received the results of the Comanche sampling event completed January 9-20, 2023 and HDR has completed their data validation. This sample event was to collect background samples on the following wells: W-10B, W-14, W-15 (dry), W-16, and W-18. This email serves as our notification under Par. 95(d)(i) of the Consent Agreement, that the concentration of cobalt exceeded the standard in the January 2023 sample results as summarized in the table below. The analytical results for this event will be included in the February Monthly Progress Report, unless requested by EPA to be delivered more quickly.

Comanche Station CCR Impoundment January 9-20, 2023 Groundwater Sampling Events Wells with Concentrations over Groundwater Protection Standards Laboratory Report Nos. 171192-1, 171574-1, 171588-1, 171192-2, 171574-2, 171588-2	
Appendix IV Parameters with Concentration Exceedances	Cobalt (mg/L)
GPS (Updated Based on Well W-2C)	0.0092
W-14	0.011
W-16	0.019
