Subject: Comanche Groundwater Notification of Concentration Exceedance

Hi Linda, we have received the results of the July sampling event for Comanche and HDR has completed their data validation. This email serves as our notification under Par. 95(d)(i) of the Consent Agreement, that concentrations of cadmium and cobalt exceeded standards in the July sample results, as summarized below. There was no sample from W-6B due to the previously reported well damage, but the well has been re-installed and is being sampled in the August event. The analytical results for the July will be included in the Monthly Progress Report, unless requested by EPA to be delivered more quickly.

Comanche Station CCR Impoundment July 14-15, 2022 Groundwater Sampling Event Wells with Concentrations over Groundwater Protection Standards		
Appendix IV Parameters with Concentration Exceedances	Cadmium (mg/L)	Cobalt (mg/L)
GPS (Based on Well W-2A)	0.00588	0.0102
Monitoring Wells with GPS Concentration Exceedances		
W-3B	0.017	0.11
W-6B	No Sample	No Sample
W-14	--	0.011
W-16	--	0.013
