

YOU'RE INVITED: XCEL ENERGY OPEN HOUSE

Valmont Station Coal Ash Recycling & Groundwater Action Plan

Protecting the environment and the health and safety of our customers are priorities for Xcel Energy, and that's why we're working with Charah Solutions to remove and recycle coal ash currently stored in a regulated landfill on our Valmont Station property in Boulder. We're also developing an action plan to address groundwater impacted by ash at and near Valmont Station and are seeking public input on our proposed plan. Join us at our upcoming public open house to learn more:

Date: Tuesday, May 23, 2023

Time: Stop by anytime between 4-6:30 p.m.

Location: Via Mobility Services, 2855 63rd St, Boulder, CO 80301

Project staff will answer questions and share information about the project. Representatives from Boulder County Public Health and the United States Environmental Protection Agency are invited and may be available to answer questions on behalf of their own organizations.

This public open house is intended to meet the public meeting notice requirements of the Environmental Protection Agency's Coal Combustion Residuals (CCR) Rule under 40 CFR 257.96 (Assessment of Corrective Measures). Information will also be provided on the corresponding state program Assessment of Corrective Measures report under the Colorado Department of Public Health and Environment's Solid Waste Rules (6 Coal Combustion Residuals 1007-2 Part 1: Regulations Pertaining to Solid Waste Sites and Facilities).

For more information or to view the Coal Combustion Residuals Assessment of Corrective Measures report, visit [xcelenergy.com/ProjectsNearYou](https://www.xcelenergy.com/ProjectsNearYou) and select Valmont Station.
