Date _____

Please submit your application one of three ways:

- 1) Online:** Complete our online application by signing into Xcel Energy MyAccount and completing the application. (If you do not have an account, click on Register.)
- 2) Email:** Click on "Submit signed form" in the top left of page one, or email your application to EVRebates@xcelenergy.com and include "EV Charger and Wiring Application" in the subject line.
- 3) Mail:** Complete the PDF and mail your completed application to: Xcel Energy Rebate Operations, P.O. Box 829, Minneapolis, MN 55440-0829

Help with forms: You can call 800-895-4999 for questions and status of your application.

Terms and conditions

Rebate details

Public Service Company of Colorado's ("Xcel Energy") Electric Vehicle ("EV") Home Wiring Rebate program ("Home Wiring Rebate Program") is available to qualifying Xcel Energy electric customers who (1) enroll in Xcel Energy's Optimize Your Charge Program and either purchase a new Level 2 EV charger that draws 50 amps or less (an "Eligible EV Charger") or are enrolled in Xcel Energy's EV Accelerate At Home Program to have Xcel Energy provide, install, and maintain an Xcel Energy-owned Eligible EV Charger, and/or (2) have a licensed electrician install Premises Wiring necessary to connect and use the Eligible EV Charger at the customer's home.

Under the Home Wiring Rebate Program, qualifying customers may apply to receive a maximum rebate of up to \$500 ("Standard Rebate") to offset the applicant's costs of installing the Premises Wiring needed to supply electricity to the Eligible EV Charger at the applicant's home and the cost to purchase an Eligible EV Charger for customers who purchase an Eligible EV Charger. Customers who enroll in Xcel Energy's EV Accelerate At Home Program will receive the Standard Rebate only to offset the applicant's cost of installing the Premises Wiring and not toward the monthly charges associated with participating in Xcel Energy's EV Accelerate At Home Program.

Income-Qualified customers may apply to receive a flat enhanced rebate of \$1,300 ("Enhanced Rebate") to offset all or a portion of the customer's costs of installing the Premises Wiring needed to supply electricity to an Eligible EV Charger at the applicant's home, and/or the cost to purchase an Eligible EV Charger for customers who purchase an Eligible EV Charger. Income-Qualified customers participating in Xcel Energy's EV Accelerate At Home Program may still receive the Enhanced Rebate even if the cost of installing the Premises Wiring is less than the amount of the Enhanced Rebate.

The Standard Rebate and Enhanced Rebate may be referred to in these Home Wiring Rebate Terms and Conditions as "Rebates" or the "Rebate."

Rebates are not guaranteed until Xcel Energy has reviewed and approved the Home Wiring Rebate Program application.

"Premises Wiring" means a dedicated 240V AC circuit that supplies electricity directly to the installed Eligible EV Charger that draws 50 amps or less. This includes the protective breaker at the supply panel, wiring, final junction box, receptacle and all attachments and connections. The applicant is wholly responsible for the Premises Wiring, including that it meets all workmanship standards and applicable requirements in the National Electric Code, Colorado law, and local municipal codes.

The Home Wiring Rebate Program is subject to the terms and conditions contained in this application. Rebate amounts and Home Wiring Rebate Program terms are subject to change at any time. Funding for the Home Wiring Rebate Program is limited and available to qualifying Xcel Energy customers on a first-come, first-served basis and is effective until funding is expended or the Home Wiring Rebate Program is discontinued.

Additional EV Home Wiring Rebate Program details, rules and requirements can be found on Xcel Energy's website.

Qualifying Customers

Rebates are available to residential Xcel Energy customers who:

- (1) who own or rent a single-family home or a townhome;
- (2) own or lease an EV;
- (3) have an active Xcel Energy account that receives electric service from Xcel Energy;
- (4) enroll and participate in Xcel Energy's Optimize Your Charge Program, as required by these terms (visit our website for more information regarding the Optimize Your Charge Program);

(5) install Premises Wiring at applicant's home which will be connected to the Eligible EV Charger and/or purchase an Eligible EV Charger which will be connected to Premises Wiring; and,

(6) meet all the Home Wiring Rebate Program Rules and Requirements set forth in these application terms.

Income-Qualified Eligibility

"Income-Qualified" means the applicant meets income requirements by demonstrating that applicant is currently enrolled in any ONE of the following programs:

- State of Colorado Low-Income-Energy Assistance Program (LEAP),
- Energy Outreach Colorado's Colorado Affordable Residential Energy Program (CARE),
- Colorado's Weather Assistance Program (WAP),
- Xcel Energy income-qualified demand side management program,
- Xcel Energy's income-qualified Community Solar Gardens program,
- Supplemental Nutrition Assistance Program (SNAP),
- Temporary Assistance for Needy Families program (TANF);

OR, has a household income below::

- 60% of the state of Colorado's median income,
- 200% of the relevant federal poverty level, or
- 80% of area median income.

How to Apply for Rebates

If you are using your own Eligible EV Charger and are not enrolling in EV Accelerate At Home:

1. Purchase an Eligible EV Charger.
2. Ensure you have been accepted in Xcel Energy's Optimize Your Charge program.
3. Fill out the Home Wiring Rebate Program one of three ways:
 - 1) Complete our online application by signing into Xcel Energy MyAccount and completing the application. (If you do not have an account, click on Register.)
 - 2) Click on "Submit signed form" in the top left of page one, or email your application to EVRebates@xcelenergy.com and include "EV Charger and Wiring Application" in the subject line.
 - 3) Complete the PDF and mail your completed application to: Xcel Energy Rebate Operations, P.O. Box 829, Minneapolis, MN 55440-0829.
4. Submit the application along with: (a) your paid invoices or receipts covering the installation of Premises Wiring and/or the Eligible EV Charger (for applicants who are not enrolling in Xcel Energy's EV Accelerate At Home Program, the Standard Rebate can help offset cost of the Eligible EV Charger), (b) proof that a licensed electrician performed the work to install the Premises Wiring, if applicable, and (c) if applicant rents the home where the Premises Wiring will be installed, evidence showing a written permission from the homeowner or landlord for the applicant to install Premises Wiring.
5. If applicant is Income-Qualified and is requesting the Enhanced Rebate of \$1,300, following submission of the application, the applicant will be required to work with Xcel Energy's income verification partner to demonstrate and verify the applicant's income eligibility for the Enhanced Rebate.
6. Once the completed application is submitted and the applicant has been verified as Income-Qualified, if applicable, Rebate payments are usually made within 6 to 8 weeks after the application has been processed and approved by Xcel Energy.

If you are enrolling in EV Accelerate At Home and Xcel Energy is providing your Eligible EV Charger:

1. Enroll in EV Accelerate At Home through Xcel Energy's website (you will be asked to select an Eligible EV Charger and provide information about your property and current electrical wiring).
2. Ensure you have been accepted into Xcel Energy's Optimize Your Charge program.
3. If you are participating in the EV Accelerate At Home Program, there are two ways you can receive the Rebate. You can either:
 - a. Hire a licensed electrician to install the Premises Wiring and then apply directly to Xcel Energy for the Rebate. Fill out the Home Wiring Rebate Program application and submit the application along with: (a) your paid invoices or receipts covering the installation of Premises Wiring, (b) proof that a licensed electrician performed the work, and (c) if you rent the home where the Premises Wiring will be installed, evidence showing a written permission from the homeowner or landlord for you to install Premises Wiring; or
 - b. Hire the Xcel Energy EV Accelerate At Home electrician to install the Premises Wiring at the same time the electrician installs the Eligible EV Charger as part of the EV Accelerate At Home Program, and have the electrician reduce the costs of the Premises Wiring installation (up to the amount of the Rebate) so that you will pay less out-of-pocket at the time the Premises Wiring work is performed. If you elect to receive all or a portion of your Rebate directly from the Xcel Energy EV Accelerate At Home electrician at the time of installation, ensure you have indicated your acceptance of this option by checking the relevant box on the application form that states that you are assigning your right to receive all or a portion of the Rebate to the Xcel Energy EV Accelerate At Home Program electrician in exchange for a reduction in your Premises Wiring installation cost. At the time of installation, make sure that you provide the rebate application to the electrician when the electrician is on site to install the Eligible EV Charger. The Xcel Energy EV Accelerate At Home Program electrician will submit the documentation required to support the Home Wiring Rebate application to Xcel Energy, and the electrician will deduct the amount of the Rebate from the Premises Wiring installation costs, providing you with an instant rebate.
4. Income-Qualified customers who are applying for an Enhanced Rebate should allow up to 12 business days after Xcel Energy receives the application and all necessary documentation for Xcel Energy's income verification partner to process the Income-Qualified portion of the application. Xcel Energy's income verification partner will contact you directly about the information required to determine your income eligibility for the Enhanced Rebate. You will be notified via email, phone, and/or other method about your Income-Qualified status. If you wish to receive all or a portion your Rebate directly from the Xcel Energy EV Accelerate At Home electrician as described above, and you have applied for the Enhanced Rebate, please wait to schedule your EV Accelerate At Home Eligible Charger installation until you have been verified as Income-Qualified.
5. If you will receive all or a portion of your Rebate directly from the Xcel Energy EV Accelerate At Home electrician as described above, you will receive a portion of your Rebate instantly at the time of installation of the Premises Wiring as a reduction to your installation cost, and any remaining Rebate amount above the cost of the Premises Wiring will be provided to you within 6 to 8 weeks after installation is complete. If you elect to hire your own electrician to install the Premises Wiring and then receive the Rebate after installation, your Rebate will be provided to you within 6 to 8 weeks after your application is received, approved and processed by Xcel Energy.

Incomplete applications submitted via mail will be rejected and returned. Complete applications must be submitted or postmarked no later than September 30th of the year following the later of: (1) the completed installation of the Premises Wiring; or (2) the purchase date of the Eligible EV Charger.

You must submit a complete application and all required documents listed to be eligible for the Rebates.

Be sure to submit your application one of three ways:

- 1) Complete our online application by signing into Xcel Energy MyAccount and completing the application. (If you do not have an account, click on Register.)
- 2) Click on "Submit signed form" in the top left of page one, or email your application to EVRebates@xcelenergy.com and include "EV Charger and Wiring Application" in the subject line.
- 3) Complete the PDF and mail your completed application to:
Xcel Energy Rebate Operations, P.O. Box 829, Minneapolis, MN 55440-0829.

Please avoid submitting duplicate applications.

EV Rebate Program Rules and Requirements

A licensed master electrician must install Premises Wiring at the applicant's home within Xcel Energy's electric service territory to support the installation and use of an Eligible EV Charger that relies on the Premises Wiring. All invoices for labor and materials to install the Premises Wiring, and, if applicant has purchased an Eligible EV Charger, the receipt for the Eligible EV Charger, must be dated on or after August 5, 2021.

Applicants must enroll in the Xcel Energy Optimize Your Charge Program at the time of application submission. Applicants must participate in the Xcel Energy Optimize Your Charge Program for a minimum of 12 consecutive months from the date the Rebate is issued by Xcel Energy. Income-Qualified applicants may unenroll from Xcel Energy Optimize Your Charge Program at any time after they have received their Rebate without having to return any portion of the Rebate as described below.

If Customer elects to enroll in Optimize Your Charge Program, customer must meet and adhere to all Optimize Your Charge Program requirements, including the use of a charging location that has access to Wi-Fi (provided by applicant) if the applicant's Optimize Your Charge Program requires use of a networked Eligible EV Charger for participation.

If applicant chooses to end the applicant's participation in or if the applicant is removed by Xcel Energy from the Optimize Your Charge Program within 12 consecutive months from the date that the Rebate is issued by Xcel Energy, the applicant will be required to return a prorated share of the Rebate calculated in accordance with this paragraph ("Early Withdrawal Fee"). At the time of unenrollment from the Optimize Your Charge Program, Xcel Energy will notify the applicant via email of the amount of the Early Withdrawal Fee. The Early Withdrawal Fee will be added to the applicant's subsequent electric bill or bills, as determined by Xcel Energy, and the applicant will be required to pay the additional amounts billed. The date of the email from Xcel Energy which conveys the amount of the Early Withdrawal Fee to the applicant shall be the "Withdrawal Date." The Early Withdrawal Fee will be calculated as follows: $(1 - (\# \text{ of days enrolled in Optimize Your Charge Program (assessed from the date of the Rebate was issued by Xcel Energy to the Withdrawal Date)} / 365 \text{ days})) \text{ times the Rebate amount.}$

The Early Withdrawal Fee will not be assessed to Income-Qualified customers who decide to opt out of the Optimize Your Charge Program.

Applicant is responsible for obtaining all required permits required for the Premises Wiring and paying for the fees related to such permits.

Applications for Rebates must be completed and signed by the applicant and received by Xcel Energy with all required information as stated in this application.

The applicant acknowledges that Xcel Energy or its income verification partner may request additional information from the applicant to validate eligibility for the Rebate, confirm the accuracy of the information provided, or as may be needed to process the Rebate (including but not limited to social security number, taxpayer ID, or a completed IRS Form W-9) and Xcel Energy's obligation to pay any EV Rebate is subject to applicant providing such additional information.

The applicant is responsible for all tax liability imposed as a result of the Rebate, if any. Xcel Energy is not responsible for any taxes imposed on the applicant as a result of the Rebate, if any.

If applicant rents the home where the Premises Wiring will be installed, or resides in a condominium, the applicant must have separately metered electric service at the home.

Applicant understands and agrees that Xcel Energy may inspect the installed Eligible EV Charger and the Premises Wiring before the Rebate is issued.

Xcel Energy may perform a site visit or request additional information, including but not limited to photographs of the installation.

By submitting the application, the applicant certifies that the information provided in the application is true and correct, and the applicant understands that if any of the information provided is discovered to be false, applicant agrees to pay back any Rebate paid by Xcel Energy (fee would be assessed on electricity bill), and he or she understands that they may be subject to other penalties, as permitted by law.

Additional Home Wiring Rebate Terms and Limitations

Home Wiring Rebate Program terms and rebate amounts are subject to change or cancellation any time.

Xcel Energy reserves the right to refuse payment and participation if the applicant violates the Home Wiring Rebate Program rules, requirements and procedures, including these Terms and Conditions.

Any information provided in this application may be used internally by Xcel Energy for purposes other than processing the application and may be made available to the Colorado Public Utilities Commission ("Commission"). All personal information will be handled in accordance with applicable laws, Commission rules and regulations, and Xcel Energy's then current privacy policies.

The applicant authorizes Xcel Energy to call or send written or email messages to the applicant regarding this application. The applicant: (i) acknowledges that he/she is the authorized user of the email address provided in the application; and (ii) grants Xcel Energy express permission to send emails related to the application to that email address until such permission is expressly revoked by the applicant.

The applicant is responsible for adhering to all laws, rules, and regulations related to the applicant's installation of the Premises Wiring and the purchase and use of the Eligible EV Charger. Prior to installation, the applicant is responsible for meeting all Home Wiring Rebate Program requirements and for checking with state, county or city governments and homeowner's associations (if any) regarding any applicable codes, conditions, ordinances, restrictions, rules and regulations.

Applicant is responsible for paying all fees related to the installation, purchase and use of the Premises Wiring, as well as any charging equipment owned by the applicant.

Xcel Energy does not warrant, endorse or assume liability for the quality, performance or safety of the applicant-selected contractor and/or retailer or wholesaler. Performance of any product or services and acceptance of labor and materials used is solely the applicant's responsibility.

The applicant acknowledges that Xcel Energy, nor any of its affiliates and their respective employees, consultants, contractors, or agents, (a) are responsible for assuring that the installation of Premises Wiring complies with any particular laws, codes, or industry standards, or (b) have made any representations of any kind regarding (i) the results to be achieved by the Home Wiring Rebate or (ii) the electrician or any labor provided by the electrician, including, but not limited to, the qualifications, performance, fitness for use, or safety. Xcel Energy does not endorse any particular installer or electrician by offering these rebates.

Xcel Energy does not expressly or implicitly warrant the performance or quality of the installation services or any charging equipment purchased by the applicant. Xcel Energy is not liable for any damage caused by the operation or malfunction of the Premises Wiring or any charging equipment purchased by the applicant.

Any decisions regarding the selection, design, purchase, use and operation of any charging equipment, EV, electrician, or installer shall be at the sole discretion and are the sole responsibility of the customer.

Applicant agrees to release and hold harmless Xcel Energy, its affiliates and their officers, directors, shareholders, employees and contractors from and against any and all causes of action, damages, losses, claims, expenses, demands, costs (including attorneys' fees and expenses and all court, arbitration or other dispute resolution costs), or any of them, resulting from, arising out of, or in any way directly connected with this Home Wiring Rebate Program, applicant's receipt of the Rebate, failure to receive the Rebate, or any taxes associated therewith. Xcel Energy makes no representations or warranties regarding whether applicant will or will not qualify to receive the Rebate.
