

DRIVE DOWN ENERGY COSTS WITH A CUSTOMIZED ENERGY ASSESSMENT

INFORMATION SHEET
MINNESOTA | COLORADO

INTRODUCING THE RIGHTSIZED BUSINESS ENERGY ASSESSMENT SOLUTION TO SUPPORT YOUR ENERGY-MANAGEMENT GOALS

Reducing energy costs is an essential practice for businesses and communities to meet operational and sustainability goals. One first step to targeting the most effective path to energy savings is through project identification. Our Business Energy Assessments offer energy insights to help you take your energy planning to the next level.

Our approach, your advantage

One size does not fit all when it comes to energy planning. We will first match the assessment to your energy-efficiency needs and facility size. Then, through our phased approach to planning, together we'll define a path to achieving your goals.

Discover possibilities for improvements throughout your whole building

- Lighting systems
- HVAC systems
- Efficiency controls
- Food service equipment
- Building envelope
- Demand Management opportunities

1. Discovery call or meeting to determine assessment focus and implementation needs.
2. Whole-building on-site assessment based on your goals and objectives*.
3. Collaboratively develop a customized Energy Roadmap.
4. On-site low- or no-cost improvements such as equipment recalibration.
5. Project implementation support you choose from a suite of options.
6. Assistance with earning prescriptive and custom rebates for energy improvements made.

*During pandemic times, we will accommodate your in-person meeting guidelines.

Start your match

Complete the assessment match form by visiting xcelenergy.com/EnergyAssessments.

Let your Energy Roadmap plan lead the way

After your assessment walk-through and discussions, we'll meet with you to discuss implementation of improvement strategies identified in your Energy Roadmap. And, we'll be with you every step of the way.
