

DRIVE A SUSTAINABLE FUTURE THROUGH ELECTRIC SCHOOL BUS REBATES

ELECTRIC SCHOOL BUS REBATE CAN OFFSET THE COSTS FOR YOUR ELECTRIC BUS FLEET

School districts play an important role to help its community to find sustainability solutions to meet environmental goals, making student transportation a priority. Powering buses with clean electricity versus diesel can significantly cut greenhouse gas emissions while helping school districts save money and time on fuel costs and maintenance.

Through our Electric School Bus Rebate, school districts can earn a rebate to offset the costs for procuring qualifying electric school buses, and costs to install the EV infrastructure for charging the school bus fleet.

To learn how you can earn up to \$275,000 to offset the costs for your approved school bus electrification project, **email us at** ElectricVehicles@xcelenergy.com.

Eligibility to participate

- Your school district is a K-12 public school district and a non-residential electric customer within Xcel Energy’s Colorado service territory.
- Your school district intends to charge the school bus more than 50% of the charging time at a valid address within Xcel Energy’s electric service territory.
- You can maintain ownership and regular use of the school bus for a minimum of two years from the date of rebate payment (unless the school bus is deemed nonoperational).
- If eligible for the rebate, customer will enroll in Xcel Energy’s free Fleet Electrification Advisory Program.
- You are a provider hired by such public school district to provide School Bus transportation services to the public school district in Xcel Energy’s electric service territory.

STEPS TO REBATE IMPLEMENTATION

Application Period	Application Review	Assessment + Advisory	Procurement + Documentation	Reimbursement Payment	Ongoing Reporting
Eligible districts will be guided through our application process. Include complete application plus all required documentation.	Awarded pilot participant districts will be notified and a signed service agreement established.	School districts will enroll and participate in our Fleet Electrification Advisory Program.	Participants will procure eligible electric bus equipment* and EV infrastructure technology.	Participants will submit purchase agreements, paid-in-full itemized invoices and photographs of charging infrastructure technology.	Xcel Energy may conduct site visits and audits of projects.

*See bus equipment eligibility requirements on page 2

School bus eligibility requirements

To be eligible for the Electric School Bus Rebate, the school bus procured meets the following criteria:

- The electric school bus has not been previously owned
- The school bus is procured directly from the manufacturer
- The bus has not been modified from the original manufacturer's drivetrain specifications
- The equipment has a 100% electric drivetrain and meets the minimum standard governing school transportation vehicles as outlined by the Colorado Department of Education

Ready to get started?

Be one of the selected school districts for this rebate program by contacting us immediately with your indication of interest. Email us at ElectricVehicles@xcelenergy.com or visit xcelenergy.com/CommercialEVs and fill out the "Connect with an Advisor" for more information.
