# **Facility information**

Lighting New Construction rebate application

In order to accurately model the usage characteristics of your building, please provide a breakdown of building spaces by type. In the section below, please define the various building area types that are being affected by this project and assign the proper square footage to each area ID. If your building area type is not listed, please add information to the comment section below and choose the closest building area type possible.

Area ID	Building Area Type	Area type square footage
1		
2		
3		
4		
5		

Will the space be air conditioned where the energy-efficient lighting will be installed?

Air conditioned Heat only No air conditioning or heat

### How to apply

#### 1. Rebate application

Complete the rebate application. All information needs to be supplied before a rebate check can be issued.

# 2. Itemized invoice

Include detailed installation invoice that includes:

- Invoice number and date
- Customer premises number or installation address
- Manufacturer names and model numbers for installed equipment
- Equipment quantities
- Equipment cost per unit
- Labor cost listed seperately from equipment costs. If equipment was selfinstalled, please include a labor cost based on the install time and rate of pay of the installer.

Please submit forms to your account manager (if applicable). If you do not have an Xcel Energy account manager, please email your forms to: xcelnm@Clearesult.com. MAIL: Xcel Energy, Lighting Efficiency program, 5822 Cromo Dr., Suite 201, El Paso, Texas 79912.

# **Rules and requirements**

- All equipment must be new; used or rebuilt equipment is not eligible for a rebate.
- Equipment must meet specification requirements and be purchased and installed.
- Rebates cannot exceed 60 percent of the project cost (including equipment and labor). The minimum rebate is \$5.
- Rebate is up to \$400/kW and based on the Lighting Power Density for the space type.
- Rebate will be paid upon project completion and verification of installation and operation. The rebate amount will be adjusted to reflect deviations in actual installations and efficiencies as compared to project defined at the time of preapproval. Energy savings calculations are estimates and may vary from actual results.
- Once completed paperwork is submitted, rebate payments are usually made in six to eight weeks. Xcel Energy will issue rebates in the form of checks, not utility bill credits.

- This program's rules, requirements and offers are subject to changes at any time. Xcel Energy's prescriptive rebate programs continue for an indefinite period, but are subject to 60 days notice of cancellation. Changes or notifications will be posted on xcelenergy.com/Rebates. The customer and trade partner are responsible for visiting the website or contacting an energy efficiency specialist to determine whether the program is still in effect and to verify program parameters. Call 855.839.8862 or email xcelnm@Clearesult.com.
- Xcel Energy reserves the right to refuse payment and participation if the customer or contractor violates program rules and procedures, or local, state or federal regulations. Xcel Energy is not liable for rebates promised to customers as a result of a contractor/trade partner misrepresenting the program.
- The customer agrees to provide reasonable access to inspect the installation. This may include the access to records related to the project in order to verify equipment characteristics, quantities and performance. This verification process may include the installation of monitoring equipment for temporary data collection.

### **Eligibility requirements**

This program applies to facilities located within the Xcel Energy New Mexico service territory. Equipment must be installed on the active electric account listed on this application. Projects are eligible for the Lighting Efficiency New Construction program incentives if specific equipment and systems exceed minimum criteria based primarily on the ASHRAE 90.1-2004 Energy Standard. Projects require savings derived from at least two building systems. Buildings should be enrolled in the program as early as possible in the design process.

#### Warranty information

Xcel Energy does not endorse any particular manufacturer, product or system design by offering these rebates; will not be responsible for any tax liability imposed on the customer as a result of the payment of rebates; does not expressly or implicitly warrant the performance of installed equipment (contact your contractor for detailed equipment warranties); is not responsible for the proper disposal/recycling of any waste generated as a result of this project; is not liable for any damage caused by the operation or malfunction of the installed equipment; and does not guarantee that a specific level of energy or cost savings will result from the implementation of energy conservation measures or the use of products funded under this program.
