Audits alone don’t save energy or increase comfort. A Home Energy Audit is just the first step towards saving energy and money. After your audit is complete, our Energy Advisor Service is here to help you choose next steps for improvements in your home. Energy Advisors can:

- Review your audit and provide unbiased advice and guidance on necessary energy improvements.
- Provide information on applicable rebates and financing options available.
- Provide you with a list of qualified contractors who implement these energy improvements.

Call 303.446.7910 to speak with an Energy Advisor today to see what steps are right for your home.

Before making necessary energy-efficient improvements, choose the program that fits your needs:

**Several energy-efficiency improvements are needed:**

Choose the Home Performance with ENERGY STAR® program. Completing more improvements at once can result in higher rebates, and more energy savings.

To learn more about the program, and see if you qualify, visit xcelenergy.com/HomePerformance.

**One or two energy-efficiency improvements are needed:**

Choose from our selection of energy efficiency rebate programs that fit your home best. Program offerings include insulation, furnace, water heater upgrades, and more.

To find all of our program offerings, visit xcelenergy.com/HomeRebates.

Visit xcelenergy.com/HomeEnergyAudit to learn more, choose a qualified contractor, and get started.
What is a Home Energy Audit?

A Home Energy Audit is the quickest, simplest way to assess your home’s energy efficiency and set you on the right path to lower energy bills and a more comfortable, efficient home. Starting with an audit can help you determine which improvements are needed in your home. Getting started:

- Visit our website and choose from the list of qualified Home Energy Audit contractors.
- Choose the type of audit that fits your home best. Choose from a Standard Audit, Standard Audit with Blower Door, or an Infrared Audit.
- You will pay the auditing company the total cost of the audit up front, and we will provide a rebate valued at 60%, up to $200, of the audit price.

You can receive up to $200, from Xcel Energy, for your audit.

### Types of audits

#### Standard Audit
**60% up to $100**

A Standard Audit includes:

- A thorough inspection of your home’s exterior, including windows and doors
- Analysis of the insulation levels throughout the home
- Examination of the age, efficiency and general condition of your mechanical systems
- A carbon monoxide test
- A basic analysis of your utility bills

#### Standard Audit with Blower Door
**60% up to $160**

The Standard Audit with Blower Door includes:

- Everything from the Standard Audit, plus;
- The blower door diagnostic tool to determine how much air your home loses, each hour, through the various air leaks
- Combustion Appliance Zone testing (if atmospherically vented appliances are present)

#### Infrared Audit
**60% up to $200**

The Infrared Audit includes:

- Everything from the Standard Audit with Blower Door, plus;
- Infrared images to view behind drywall and other areas
- Thermo images of the walls and ceilings
- View of temperature differences to examine insulation coverage and effectiveness
- Tailored solutions to address air leaks, elimination of ice dams, and reduction of overall conditioned air loss and energy consumption

Visit xcelenergy.com/HomeEnergyAudit to see what you qualify for.
