

Windsor[®] 2020 Historical and 2021 Prospective Product Content Label- Colorado ^[1]

The product is sold in blocks of 100 kilowatt-hours (kWh); with the option to choose 100% renewable energy. The product will be made up of the following new renewable resources averaged annually:

Green-e Energy Certified New Renewables ^[2]

Resource	Historical 2020 Amount	Prospective 2021 Amount	Generation Location
Wind	100%	100%	Colorado
Total	100%	100%	

Notes:

- Prospective 2021 figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. Historical 2020 figures reflect the power delivered to Windsor CO customers in 2020.
- New Renewables come from generation facilities that first began commercial operation within the past 15 years.
- For comparison, the current average mix of resources supplying Public Service Company of Colorado includes: coal (26%), natural gas (37%), wind (31%), solar (5%) and other carbon free (1%). [Source: Xcel Energy, 2021]
- The average home in the United States uses 917 kWh per month. [Source: U.S. EIA, 2019]
- For specific information about this electricity product, please contact Xcel Energy at 1-800-895-4999, windsor@xcelenergy.com or visit xcelenergy.com/windsor.
