

ALWAYS *delivering.*

Your heating and cooling contractor will be able to assist you with making the best decision for your needs. Remember to take into account more than just price when deciding on a long term investment in your home. There are several other factors to consider when making your decision:

- **Comfort**
Today's equipment has a range of options that can increase the comfort of your home.
- **Operating costs**
Units that have a higher efficiency rating may cost more upfront, but the ongoing cost to operate them is lower, and rebates will help reduce the initial cost.
- **Service after the sale**
Choose a contractor that you are comfortable with and who will be able to provide you service after the sale.

Contact info

Heating and cooling costs the average homeowner about \$875 a year—nearly half the home's utility bill.

Upgrading to more energy-efficient heating and cooling equipment can save money on your energy bills and you can receive cash rebates.

It pays to save energy

By choosing the most energy-efficient heating, cooling and water heating equipment you may be able to reduce your energy use and enjoy the comfort associated with higher-efficiency equipment. You'll receive additional savings when your installation qualifies for rebates listed here.

	Rebate area	Qualifiers	Rebate		More information
Key	Cooling				
	Evaporative coolers	Standard (window unit)	First-time install Replacement	\$300 \$200	Rebate can't be more than total cost Rebate for first-time install only available if additional equipment is listed on invoice such as pipes, valves
		Premium unit	First-time install Replacement	\$700 \$600	
		Whole house system ¹	All	\$1,200	
	Standard efficiency AC/ASHP with Quality Installation (QI)	Under 15 SEER and 12.5 EER		\$300	The rebate is paid according to the lesser value of the SEER/EER. Example: A system with 16 SEER and 12 EER will receive a \$300 rebate. New, matched indoor and outdoor components, a TXV, and an AHRI certificate are required.
	High efficiency AC/ASHP with Quality Installation (QI)	15+ SEER and 12.5+ EER		\$600	The rebate is paid according to the lesser value of the SEER/EER. Example: A system with 16 SEER and 12 EER will receive a \$300 rebate. New, matched indoor and outdoor components, a TXV, and an AHRI certificate are required. SEER = Seasonal Energy Efficiency Ratio EER = Energy Efficiency Ratio AC = Air Conditioner ASHP = Air Source Heat Pump
	Ductless mini-split heat pumps	15+ SEER, 11+ EER, 9+ HSPF	Maximum rebate	\$300	HSPF = Heating Seasonal Performance Factor
Key	Heating				
	Furnaces	95% AFUE		\$300	Only new furnaces located on ahridirectory.org qualifies for a rebate. Customers must have electric service to qualify for the ECM rebate, and gas service to qualify for the furnace rebate. Qualifying customers may receive both a furnace and an ECM rebate
	Electronically commutated motors (ECM)	ECM in new or existing furnace		\$100	
Key	Water heating				
	Standard tank (medium draw)	0.64 UEF		\$70	Only new equipment located on energystar.gov or ahridirectory.org qualifies for a rebate. UEF = Uniform Energy Factor
	Standard tank (high draw)	0.68 UEF		\$70	
	Tankless	0.87 UEF		\$100	
	Electric heat pump			\$450	

 **Natural gas:** This symbol indicates a program available to our natural gas customers.

 **Electric:** This symbol indicates a program available to our electric customers.

 **Participating contractor:** This symbol indicates a program that requires customers to use an Xcel Energy participating contractor to install the equipment or make the improvement. Our list of registered contractors can be found at xcelenergy.com/COTrades.

¹Premium unit with three ducts or more
²Available for existing homes only
