Addendum 1 – Interconnection Proxy Cost Price Adjustment

This addendum to the NSPM 2020 Solar RFP replaces section 4 of Form 11 of Appendix C – Bidder Forms.

Instead of submitting estimated interconnection costs, bidders are requested to include a proxy interconnection cost amount of $350,000 in their Energy Payment Rate provided in Forms 4-7 of Appendix C – Bidder Forms (“Interconnection Proxy Price”).

Bidders are furthermore requested to provide for a true-up to the proposed Energy Payment Rate for the actual interconnection costs associated with providing firm delivery to the NSPM’s native load. This should be a symmetric adjustment to the Energy Payment Rate for each $100,000 increase or decrease in actual costs in comparison to the proxy interconnection cost of $350,000 provided (“Interconnection Proxy Price Adjustment”). Bidders should provide the level of this adjustment in section 4 on Form 11 under Interconnection Cost Price Adjustment.
