INTERCONNECTION AND
PARALLEL OPERATION OF DISTRIBUTED GENERATION

Company shall interconnect distributed generation pursuant to Public Utility Commission of Texas Substantive Rules 25.211 and 25.212.

A customer seeking interconnection and parallel operation of distributed generation with Company must complete and submit the Application for Interconnection and Parallel Operation of Distributed Generation with the Utility System.

Prescribed Form for the Application for Interconnection and Parallel Operation of Distributed Generation

Customers seeking to interconnect distributed generation with the utility system will complete and file with the company the following Application for Parallel Operation:
APPLICATION FOR INTERCONNECTION AND PARALLEL OPERATION OF DISTRIBUTED GENERATION

Return Completed Application to: [Utility name] ____________________

Attention: [applicable name and/or job title]

[Address] ____________________

Customer’s Name: _______________________________________________________

Address:_______________________________________________________________

Contact Person: __________________________________________________________

Email Address: ___________________________________________________________

Telephone Number: _______________________________________________________
The following information shall be supplied by the Customer or Customer’s designated representative. All applicable items must be accurately completed in order that the Customer’s generating facilities may be effectively evaluated by the ______________________(Company) for interconnection with the utility system.

**GENERATOR**

Number of Units: ________________________________

Manufacturer: ________________________________

Type (Synchronous, Induction, or Inverter): ________________________________

Fuel Source Type (Solar, Natural Gas, Wind, etc.): ________________________________

(Note: No change to this figure adopted in 2014 in P 41325)
