

SAVE TIME AND REDUCE COSTS WITH ENERGY INTELLIGENCE SOFTWARE AS A SERVICE

InfoWise from Xcel Energy makes energy management easy by delivering powerful reporting and monitoring solutions for your organization.

Businesses and institutions often lack the tools and capabilities to manage energy usage and costs. Many have limited resources or time to conduct reporting or gain budget insights due to barriers in obtaining usage data and analytics. Plus, even the most efficient equipment can create needlessly high energy expenses without anyone noticing if programming and controls are not fully optimized.

Commercial real estate, manufacturing, cities, and schools alike use InfoWise to save energy expense and boost staff productivity. Enrollment is easy and can be done with little to no upfront expense.

Is InfoWise right for you?

InfoWise enables businesses and institutional customers to complete four primary tasks:

1. Complete Energy Reporting
2. Gain Budget Insights
3. Reduce Usage and Costs*
4. Manage Peak / Demand Response

"I can see how much energy we're using at any given point. Using that information, I can adjust my system to help avoid costly demand charges."
— Energy manager, manufacturing

"This is a great tool to help engage school personnel on energy usage and ways to save on costs. It's very easy to understand."
— Energy manager, school district

Monitor usage to identify cost savings

Easily see long term trends in energy usage and peak demand

Select the service that's right for you

BENEFITS	MONTHLY	DAILY	REAL TIME
Complete Energy Reporting <ul style="list-style-type: none"> Easily access historical usage data at 15-minute intervals Pinpoint usage changes as a result of efficiency project implementation 	✓	✓	✓
Gain Budget Insights <ul style="list-style-type: none"> Compare usage patterns to prior periods Determine the 15-minute interval when peak usage occurred 	✓	✓	✓
