

# Online Energy Assessment

## QUICKLY UNCOVER POTENTIAL ENERGY SAVINGS FOR YOUR FACILITY WITH AN ONLINE ENERGY ASSESSMENT

Designed for your business, this half-hour do-it-yourself analysis helps you discover potential ways to save up to thousands of dollars on annual energy bills.

### Easy, free and customized for your building

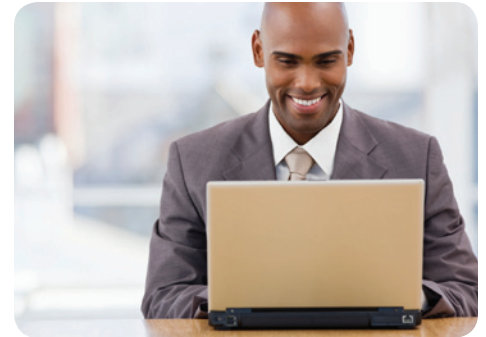

Our online analysis recognizes that every business uses energy differently and allows you to customize your online analysis for your industry, location, energy use history and building specifics. The more you know about your facility, the more accurate your results will be. However, you can get ideas for your energy-saving potential with just a few building details.

### Building Type

Our online energy assessment offers customized information for:

- Stand-alone retail buildings
- Enclosed malls or strip malls
- Grocery stores
- Hotels and motels
- Elementary, middle and high schools
- Extended care facilities
- High- and low-rise office buildings

Enter your facility's specific information, or use the industry averages that are based on similar facilities in your area.

### START YOUR ONLINE ENERGY ASSESSMENT NOW!

- For best results, gather 12 months' bills for electricity, natural gas and other fuels for your facility.
- Visit [xcelenergy.com/OnlineAssessment](https://www.xcelenergy.com/OnlineAssessment) to begin using this new tool.
- Follow the instructions on the screen to complete your online energy assessment.
- It's free, easy and could save you up to thousands of dollars on annual energy bills.

## Savings recommendations

Get specific energy-saving recommendations based on your building's equipment, age and energy usage. Find your greatest savings potential from recommendations covering:

- Building shell – weather stripping, caulking, insulation, roofing and windows
- HVAC – heat recovery units, high efficiency furnaces and air conditioning
- Lighting – retrofits
- Fans and motors – adjustable speed drives
- Building-control systems – heating, cooling, ventilation and lighting
- Operation and maintenance – preventative and routine maintenance
- Low- and no-cost tips for operating more efficiently

## Multiple facilities? No time to finish?

You can create multiple facilities under a single user name and password, and save them for comparison or future use. We make it easy (and confidential) to analyze your energy use and your energy-savings potential. Log in time after time to tweak and review your building details and results.

## Turn ideas into savings

Your online energy assessment report will give you an idea of how much you could save and will give you a list of applicable rebates and programs from Xcel Energy. Contact your Xcel Energy account manager or our Business Solutions Center if you need help getting started or more information about implementing your recommendations.
