

Small Generator Interconnection Agreement

This SMALL GENERATOR INTERCONNECTION AGREEMENT ("Agreement") is entered into by and between Public Service Company of Colorado, d/b/a Xcel Energy, a Colorado corporation, having a mailing address of P.O. Box 840, Denver, Colorado, 80201, hereinafter referred to as "Public Service," and {!Developer_Name c} ("Developer"), having a mailing address of {!Developer_Address c}, {!Developer_City c}, {!Developer_State c} {!Developer_Zip c}, and {!Customer_Name c} ("Customer"), whose address is {!Premise_Address c}, {!Premise_City c}, {!Premise_State c} {!Premise_Zip c}, each of which may be referred to herein as a "Party" or collectively as the "Parties."

WHEREAS, Customer receives retail electric service from Public Service in Colorado at {!Premise_Address c}, {!Premise_City c}, {!Premise_State c} {!Premise_Zip c} ("Premises") and is the record beneficial electric service customer owning, leasing, residing at or otherwise conducting business on the Premises; and

WHEREAS, Developer owns, operates or otherwise controls the Generation System located on the Premises for the benefit of Customer.

In consideration of the premises and of the mutual covenants and agreements hereinafter set forth, the Parties agree as follows:

I. SCOPE AND PURPOSE

- A. Establishment of Point of Common Coupling. This Agreement is intended to provide for Developer to interconnect and operate a Generation System in parallel with the Public Service electric distribution system at the Premises, as more specifically identified in Exhibit C and shown in the Exhibit A one-line diagram.
- B. This Agreement contains the terms and conditions under which Developer may interconnect and operate in parallel the Generation System with the Public Service electric distribution system and the facilities required by Developer for such interconnection.
- C. This Agreement does not authorize either Developer or Customer to export power or constitute an agreement to purchase or wheel the power produced by the Generation System. Other services that Developer or Customer may require from Public Service, or others, may be covered under separate agreements or the Public Service Electric Tariffs, or both.
- D. This Agreement does not cover FERC jurisdictional generating system installations.
- E. The Technical Requirements for interconnection are set forth in a separate Technical Requirements document, entitled "Safety, Interference and Interconnection Guidelines for Cogenerators, Small Power Producers, and Customer-Owned Generation," dated March 26, 2010, a copy of which has been made available to Developer and Customer and the receipt of which Developer and Customer hereby acknowledges. The Technical Requirements, as may be modified from time to time, are hereby incorporated and made part of this Agreement by this reference.

II. DEFINITIONS

- A. "Agreement" – Small Generator Interconnection Agreement.
- B. "Area EPS" - an electric power system (EPS) that serves Local EPSs. Note: Typically, an Area EPS has primary access to public rights-of-way, priority crossing of property boundaries, etc.
- C. "Commission" - the Public Utilities Commission of the State of Colorado.
- D. "Customer" - the party receiving retail electric service from Public Service at the Premises pursuant to Public Service's Electric Tariffs.
- E. "Dedicated Facilities" - the equipment that is installed due to the interconnection of the Generation System and not required to serve other Public Service customers, as more specifically described on Exhibit B attached hereto and made a part hereof.
- F. "Developer"- the party or parties that will own/operate the Generation System and that shall be responsible for meeting the requirements of this Agreement.
- G. "Electric Tariffs" - Public Service's electric tariffs as in effect and on file with the Commission from time to time.
- H. "EPS" (Electric Power System) - facilities that deliver electric power to a load. Note: This may include generation units.
- I. "Extended Parallel" - the Generation System is designed to remain connected with Public Service for an extended period, see the Technical Requirements document for specific time thresholds.

J. "Generation" - any device producing electrical energy, i.e., rotating generators driven by wind, steam turbines, internal combustion engines, hydraulic turbines, solar, fuel cells, etc.; or any other electric producing device, including energy storage technologies.

K. "Generation Interconnection Coordinator" - the person or persons designated by Public Service to provide a single point of coordination with the Applicant for the generation interconnection process.

L. "Generation System" - the interconnected generator(s), controls, relays, switches, breakers, transformers, inverters, and associated wiring and cables, up to the Point of Common Coupling.

M. "Local EPS" - an electric power system (EPS) contained entirely within a single premise or group of premises.

N. "Nameplate Capacity" - the total AC nameplate capacity rating of all the Generation included in the Generation System. For this definition, the "standby" and/or maximum rated kW capacity on the nameplate shall be used.

O. "Point of Common Coupling" - the point where the Local EPS is connected to Public Service, as shown on Exhibit A hereto.

P. "Point of Delivery" - the point where the energy changes possession from one party to the other. Typically this will be where the metering is installed but it is not required that the Point of Delivery is the same as where the energy is metered.

Q. "Public Service Operator" - the distribution dispatch personnel or group that operates the Public Service Area EPS.

R. "Technical Requirements" - standards and requirements set forth in the document entitled "Safety, Interference and Interconnection Guidelines for Cogenerators, Small Power Producers, and Customer-Owned Generation" (March 26, 2010), as may be modified from time to time.

III. DESCRIPTION OF GENERATION SYSTEM

A. A description of the Generation System, including a single-line diagram showing the general arrangement of how Generation System is interconnected with Public Service's electric distribution system, is attached to and made part of this Agreement as Exhibit A, unless Developer is installing a package system that is pre-certified to IEEE 1547.1 and UL 1741 standards. Packaged Systems pre-certified under IEEE Standard 1547.1 and UL Standard 1741 will not require a relaying and metering one-line diagram. The single-line diagram, if applicable, shall show the following:

1. Point of Delivery
2. Point of Common Coupling
3. Location of Meter(s)
4. Ownership of the equipment
5. Generation System total Nameplate Capacity
6. Scheduled operational (on-line) date for the Generation System

IV. RESPONSIBILITIES OF THE PARTIES

A. The Parties shall perform all of their respective obligations under this Agreement in accordance with all applicable laws and regulations, operating requirements, and good utility practices.

B. Developer shall construct, operate, and maintain the Generation System in accordance with the applicable manufacturer's recommended maintenance schedule, the Technical Requirements, and in accordance with this Agreement.

C. Public Service shall carry out the construction of the Dedicated Facilities in a good and workmanlike manner, in accordance with standard design and engineering practices.

D. Customer acknowledges Developer's responsibilities with respect to the construction, operation, and maintenance of the Generation System hereunder and consents to such activities on the Premises by Developer and Public Service as required or contemplated by this Agreement.

V. CONSTRUCTION

A. Developer and Public Service agree to cause their facilities or systems to be constructed in accordance with the laws of the State of Colorado and to meet or exceed applicable codes and standards provided by the NESC (National Electrical Safety Code), ANSI (American National Standards Institute), IEEE (Institute of Electrical and Electronic Engineers), NEC (National Electrical Code), UL (Underwriter's Laboratory), Technical Requirements, applicable local building codes, and other applicable ordinances in effect at the time of the installation of the Generation System.

B. Charges and Payments

Developer is responsible for the actual costs to interconnect the Generation System with the Public Service electric distribution system at the Point of Common Coupling, including, but not limited to any Dedicated Facilities attributable to the addition of the Generation System, Public Service labor for installation coordination, commissioning, installation testing and engineering review of the Generation System, and interconnection design that are consistent with the applicable rules of the Commission. Estimates of these costs to be incurred by Public Service are set forth in Exhibit B. The estimated costs set forth in Exhibit B have been developed for budgeting purposes and may be greater or less than the actual costs required to be reimbursed by the Developer hereunder. All costs for which the Developer is responsible shall be reasonable under the circumstances of the particular design and construction of the interconnection.

1. Payments. Developer shall pay Public Service for the cost of the Dedicated Facilities as follows.
 - a. All of the estimated costs, as set forth in Exhibit B, shall be due prior to initial energization of the Generation System with Public Service.
 - b. The remainder of actual costs, incurred by the Public Service, excluding the ongoing costs of telemetry, shall be due within thirty (30) days from the date the bill is mailed by Public Service after project completion. If Developer does not make payment in full within that time, the unpaid balance shall bear interest at the rate of one and one half percent (1.5%) per month. In the event the actual costs are less than the estimated costs paid by Developer, Public Service shall refund the difference to Developer within sixty (60) days of project completion.
2. Dedicated Facilities
 - a. During the term of this Agreement, Public Service shall design, construct, and install the Dedicated Facilities outlined in Exhibit B.
 - b. Once installed, the Dedicated Facilities shall be owned and operated by Public Service and all costs associated with operating and maintaining the Dedicated Facilities shall be the responsibility of Public Service, unless otherwise agreed.
 - c. Upon execution of this Agreement, Public Service shall be authorized to begin construction and to procure the necessary facilities and equipment to complete the installation of the Dedicated Facilities, as described in Exhibit B. Notwithstanding any other provision of this Agreement to the contrary, if for any reason, the Generation System project is canceled or modified, or this Agreement is terminated by Developer or by reason of Developer's failure to diligently pursue the interconnection, such that any or all of the Dedicated Facilities are not required, the Developer shall nevertheless reimburse Public Service for actual costs incurred by Public Service in pursuing the installation of the Dedicated Facilities, including, but not limited to, any additional costs to remove and/or to complete the installation of the Dedicated Facilities. Developer may, for any reason, cancel the Generation System project, so that any or all of the Dedicated Facilities are not required to be installed. Developer shall provide written notice to Public Service of cancellation. Upon receipt of a cancellation notice, Public Service shall take reasonable steps to minimize additional costs to Developer, where reasonably possible. This provision shall survive the termination of this Agreement.
3. Customer acknowledges Developer's obligations under this Agreement to construct, operate and maintain the Generation System on the Premises in accordance with the Technical Requirements, and Public Service's right to inspect the Generation System prior to its interconnection and to verify compliance with the Technical Requirements. Customer hereby grants consent for Developer and Public Service to enter on the Premises as necessary to perform their obligations hereunder. Customer further agrees not to take any action that would interfere with the continued operation of the Generation System in accordance with the Technical Requirements.

VI. DOCUMENTS INCLUDED WITH THIS AGREEMENT

A. This Agreement includes the following Exhibits, which are specifically incorporated herein and made part of this Agreement by this reference:

1. Exhibit A – Description of Generation System and single-line diagram. This diagram shows all major equipment, including, visual isolation equipment, Point of Common Coupling, Point of Delivery for Generation Systems that intentionally export, ownership of equipment, and the location of metering.
2. Exhibit B – Estimated engineering, installation, equipment removal, commissioning and testing costs payable by Developer. Included in this listing shall be the description and estimated costs for the required Dedicated Facilities being installed by Public Service for the interconnection of the Generation System and a description and estimate for the final acceptance testing work to be done by Public Service.
3. Exhibit C – Engineering Data Submittal. A standard form application, and related charts, drawings and inventory lists that provide the engineering and operating information about the Generation System relied on by Public Service in establishing the interconnection.

VII. TERMS AND TERMINATION

A. This Agreement shall become effective as of the date when Developer, Customer and Public Service have executed this Agreement. The Agreement shall continue in full force and effect until the earliest date that one of the following events occurs:

1. The Parties agree in writing to terminate the Agreement; or
2. Developer may terminate this Agreement at any time, by written notice to Public Service, prior to witnessing the completion of the final acceptance testing of the Generation System by Public Service. Upon such termination, Developer shall continue to be responsible for costs incurred by Public Service as provided for in Section V.B. above. Upon receipt of a termination notice, Public Service shall take reasonable steps to minimize additional costs to Developer, where reasonably possible.
3. Once the Generation System is operational, Developer may terminate this Agreement after thirty (30) days written notice to Public Service; or
4. Public Service may terminate this Agreement after thirty (30) days written notice to the Developer if:
 - a. The Developer fails to interconnect and operate the Generation System in accordance with the terms of this Agreement;
 - b. The Developer fails to take all corrective actions specified in Public Service's written notice that the Generation System is out of compliance with the terms of this Agreement, within the time frame set forth in such notice; or
 - c. The Developer fails to complete Public Service's final acceptance testing of the Generation System within 24 months of the date proposed under section III.A.6.
5. This Agreement shall automatically terminate upon the removal of the Generation System or the permanent cessation of generation operations by Developer behind the Point of Common Coupling.

B. Upon termination of this Agreement, the Generation System shall be disconnected from Public Service's electric distribution system. The termination of this Agreement shall not relieve either Party of its liabilities and obligations, owed or continuing, at the time of the termination.

VIII. OPERATIONAL ISSUES

A. Each Party will, at its own cost and expense, operate, maintain, repair, and inspect, and shall be fully responsible for, the facilities that it now or hereafter may own, unless otherwise specified.

1. Technical Standards: The Generation System shall be installed and operated by Developer consistent with the requirements of this Agreement; the Technical Requirements; the applicable requirements located in the National Electrical Code (NEC); the applicable standards published by the American National Standards Institute (ANSI) and the Institute of Electrical and Electronic Engineers (IEEE); applicable local building codes, and other applicable ordinances in effect during the installation and operation of the Generation System and related facilities.
2. Right of Access: At all times, Public Service's personnel shall have access to the disconnect switch of the Generation System for any reasonable purpose in connection with the performance of the obligations imposed on it by this Agreement, to meet its obligation to operate Public Service's system safely, and to provide service to its customers. As necessary for Public Service to operate, maintain, inspect, test, repair or replace its facilities for the purposes of this Agreement, Developer and Customer shall allow Public Service access to Public Service's equipment and facilities located on the Premises.
3. Electric Service: This Agreement does not govern the provision of electric service by Public Service to supply the electrical requirements of the Local EPS. Any such electric service to be supplied to the Customer's Local EPS by Public Service shall be exclusively in accordance with the Electric Tariffs and rate schedules applicable to the Customer's class of service there under, as in effect from time to time.
4. Operation and Maintenance: The Generation System shall be operated by the Customer in accordance with the Technical Standards and any additional requirements that may be agreed to in writing from time to time.
5. Cooperation and Coordination: Both Public Service and Developer shall communicate and coordinate their operations, so that the normal operation of Public Service's system does not unduly effect or interfere with the normal operation of the Generation System and the Generation System does not unduly effect or interfere with the normal operation of Public Service's system. Under abnormal operations of either the Generation System or the Public Service system, the responsible Party shall provide reasonably timely communication to the other Party to allow mitigation of any potentially negative effects of the abnormal operation of their system.

6. Disconnection of Unit: Public Service may disconnect the Generation System as reasonably necessary in the event of termination of this Agreement, non-compliance by Developer with the terms of this Agreement, system emergency, imminent danger to the public or Public Service personnel, and routine maintenance, repairs, and modifications to the Public Service system. When reasonably possible, Public Service shall provide prior notice to both Developer and Customer explaining the reason for the disconnection. If prior notice is not reasonably possible, Public Service shall, after the fact, provide information to both Developer and Customer as to why the disconnection was required. Public Service shall have no liability for any loss of sales or other damages, including any consequential damages for the loss of business opportunity, profits, or other losses, regardless of whether such damages were foreseeable, for the disconnection of the Generation System in accordance with this Agreement. Public Service shall expend reasonable effort to reconnect the Generation System in a timely manner and to work towards mitigating damages and losses to both Developer and Customer where reasonably possible.

7. Modifications to the Generation System – Developer shall notify the Public Service Operator, in writing, of plans for any modifications to the Generation System interconnection equipment, including all information needed by Public Service, as part of the review described in this paragraph, at least twenty (20) business days prior to undertaking such modification(s). Modifications to any of the interconnection equipment, including all interconnection required protective systems, the generation control systems, the transfer switches/breakers, interconnection protection VT's & CT's, and Generation System capacity, shall be included in the notification to Public Service. The Developer agrees not to commence installation of any modifications to the Generating System until Public Service has approved the modification, in writing, which approval shall not be unreasonably withheld. Public Service shall have a minimum of five (5) business days to review and respond to the planned modification. Public Service shall not take longer than a maximum of ten (10) business days to review and respond to the modification after the receipt of the information required to review the modifications. A major upgrade or expansion of the Generation System does not qualify for this provision. Such changes shall be reviewed through a formal interconnection application.

8. Permits and Approvals: Developer shall obtain all applicable environmental and other applicable permits from governmental authorities as required by law prior to the construction of the Generation System. Developer shall maintain all such applicable permits, as necessary, and comply with these permits during the term of this Agreement.

IX. LIMITATION OF LIABILITY

A. Each Party shall at all times indemnify, defend, and save the other Party harmless from any and all damages, losses, claims, including claims and actions relating to injury or death of any person or damage to property, costs and expenses, reasonable attorneys' fees and court costs, arising out of or resulting from the Party's performance of its obligations under this agreement, except to the extent that such damages, losses or claims were caused by the negligence or intentional acts of the other Party.

B. Any liability of either Party to the other for failure to perform its obligations under this Agreement shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any punitive, incidental, indirect, special, or consequential damages of any kind whatsoever, including for loss of business opportunity or profits, regardless of whether such damages were foreseen.

C. Notwithstanding any other provision in this Agreement, with respect to Public Service's provision of electric service to any customer including the Customer, Public Service's liability to such customer shall be limited as set forth in Public Service's tariffs and terms and conditions for electric service, and shall not be modified or in any manner affected by the terms of this Agreement.

X. DISPUTE RESOLUTION

A. Each Party agrees to attempt to resolve all disputes arising hereunder promptly, equitably, and in a good faith manner.

B. In the event a dispute arises under this Agreement, and if the Parties cannot resolve it within five (5) days after written notice of the dispute to the other Party, the Parties may mutually agree to submit the dispute to mediation by a mutually acceptable mediator or dispute resolution service, in a mutually convenient location in the State of Colorado. Each Party will be responsible for one-half of the cost paid to neutral third-parties.

C. The Parties agree to participate in good faith in the mediation or resolution process. If the Parties are not successful in resolving their dispute through mediation or the dispute resolution process, then the Parties may refer the dispute for resolution to the Commission, which shall maintain continuing jurisdiction over this Agreement.

XI. INSURANCE

A. At a minimum, in connection with the Developer's performance of its duties and obligations under this Agreement, Developer shall maintain, during the term of the Agreement, general liability insurance with a combined single limit of not less than

1. Two million dollars (\$2,000,000) or greater, as mutually agreed to by the Parties, for each occurrence if the Gross AC Nameplate Rating of the Generation System is greater than 2 MW.

2. Two million dollars (\$2,000,000) for each occurrence if the Gross AC Nameplate Rating of the Generation System is greater than 500 kW up to and including 2 MW.
3. One million dollars (\$1,000,000) for each occurrence if the Gross AC Nameplate Rating of the Generation System is greater than 10 kW up to and including 500 kW.
4. Three hundred thousand dollars (\$300,000) for each occurrence if the Gross AC Nameplate Rating of the Generation System is 10 kW or less.
5. Such general liability insurance shall include coverage against claims for damages resulting from (i) bodily injury, including wrongful death; and (ii) property damage arising out of Developer's ownership and/or operating of the Generation System under this Agreement.

B. The general liability insurance required by Section XI.A shall, by endorsement to the policy or policies: (a) include Public Service as an additional insured; (b) provide that Public Service shall not by reason of its inclusion as an additional insured incur liability to the insurance carrier for the payment of premium for such insurance; and (c) provide for thirty (30) calendar days' written notice to Public Service prior to cancellation, termination, alteration, or material change of such insurance.

C. Evidence of the insurance required in Section XI.A shall state that coverage provided is primary and is not excess to or contributing with any insurance or self-insurance maintained by Public Service.

D. If Developer is self-insured with an established record of self-insurance, Developer may comply with the following in lieu of Section XI.A – C:

1. Developer shall provide to Public Service, at least thirty (30) days prior to the date of initial operation, evidence of an acceptable plan to self-insure to a level of coverage equivalent to that required under section XI.A.
2. If Developer ceases to self-insure to the level required hereunder, or if the Customer is unable to provide continuing evidence of its ability to self-insure, the Customer agrees to immediately obtain the coverage required under Section XI.A.

E. Developer shall provide Public Service a certificate of insurance evidencing the requisite coverage and provisions prior to the interconnection of the Generation System. After interconnection, Public Service may periodically request proof of current insurance coverage in order to verify compliance with the requirements of this Section XI. Upon receipt of any such request, Developer shall provide a certificate of insurance evidencing the requisite coverage and provisions. Failure of Developer to provide timely evidence of proper insurance may result in disconnection of the Generation System pursuant to Section VIII.F.

F. Failure of Developer or Public Service to enforce the minimum levels of insurance does not relieve Developer from maintaining such levels of insurance or relieve the Customer of any liability.

G. All insurance certificates, statements of self-insurance, endorsements, cancellations, terminations, alterations, and material changes of such insurance shall be issued and submitted to the following:
Public Service, Manager Area Engineering, 1123 W. 3rd Avenue, Denver, CO 80223

XII. MISCELLANEOUS

A. FORCE MAJEURE

1. An event of Force Majeure means any act of God, act of the public enemy, war, insurrection, riot, fire, storm or flood, explosion, breakage or accident to machinery or equipment, any curtailment, order, regulation, or restriction imposed by governmental, military or lawfully established civilian authorities, or any other cause beyond a Party's control. An event of Force Majeure does not include an act of negligence or intentional wrongdoing.
2. Neither Party will be considered in default of any obligation hereunder if such Party is prevented from fulfilling the obligation due to an event of Force Majeure. However, a Party whose performance under this Agreement is hindered by an event of Force Majeure shall make all reasonable efforts to perform its obligations hereunder.

B. NOTICES

1. Any written notice, demand, or request required or authorized in connection with this Agreement ("Notice") shall be deemed properly given if delivered in person or sent by first class mail, postage prepaid, to the person specified below:

a. If to Public Service:
Public Service, Manager Area Engineering, 1123 W. 3rd Avenue, Denver, CO 80223

b. If to Developer:
{!Developer_Address c}, {!Developer_City c}, {!Developer_State c} {!Developer_Zip c}

c. If to Customer:

{!Pay_to_Address_Line_1 c} {!Pay_to_City c}, {!Pay_to_State c} {!Pay_to_Postal_Code c}

2. A Party may change its address for notices at any time by providing the other Party written notice of the change, in accordance with this Section.

3. The Parties may also designate operating representatives to conduct the daily communications that may be necessary or convenient for the administration of this Agreement. Such designations, including names, addresses, and phone numbers may be communicated or revised by one Party's notice to the other Party.

C. ASSIGNMENT

1. All of the terms, covenants, representations, warranties, and conditions of this Agreement shall be binding upon, and inure to the benefit of and be enforceable by, the Parties hereto and their respective successors, but neither this Agreement nor the rights and obligations of the Developer or Customer may be assigned except as provided for in this Section XII.C.

2. Developer shall have the right at any time to assign its rights, obligations and responsibilities under this Agreement to Customer, and upon such assumption, Customer shall automatically assume all rights, obligations and responsibilities of Developer under this Agreement. Developer and Customer shall provide written notice to Public Service of any such assignment and assumption including the effective date thereof and the name of Customer's designated operating representative pursuant to Section XII.B.3). Such notice may be provided either individually or jointly by Developer and Customer, but such notice shall not be deemed received by Public Service until all parties have provided the requisite notice.

3. In the event the Developer or Customer sells, conveys or otherwise transfers ownership or operational control of the Generation System to any other entity ("New Owner"), this Agreement may be transferred to such New Owner upon receipt by Public Service of a written document, in a form satisfactory to Public Service, indicating the New Owner's agreement to comply with all of the terms of this Agreement. Developer or Customer shall not otherwise assign its rights nor delegate its duties under this Agreement without Public Service's written consent, which shall not be unreasonably withheld. Any assignment or delegation Developer or Customer makes without Public Service's written consent shall not be valid.

D. NON-WAIVER

1. None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

E. GOVERNING LAW AND INCLUSION OF PUBLIC SERVICE'S TARIFFS AND RULES

1. This Agreement shall be interpreted, governed, and construed under the laws of the State of Colorado as if executed and to be performed wholly within the State of Colorado without giving effect to choice of law provisions that might apply to the law of a different jurisdiction.

2. The provisions of this Agreement shall at all times be subject to the applicable terms and conditions set forth in the Electric Tariffs pertaining to the electric service provided by Public Service, which are hereby incorporated into this Agreement by this reference.

3. Notwithstanding any other provisions of this Agreement, Public Service shall have the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, tariff, or rule or any agreement relating thereto.

F. AMENDMENT AND MODIFICATION

1. This Agreement will not be amended, modified or supplemented except by a written instrument signed by an authorized representative of each of the Parties hereto.

G. ENTIRE AGREEMENT

1. This Agreement, including all attachments, exhibits, and appendices, constitutes the entire Agreement between the Parties with regard to the interconnection of the Generation System of the Parties at the Point(s) of Common Coupling expressly provided for in this Agreement and supersedes all prior agreements or understandings, whether verbal or written. It is expressly acknowledged that the Parties may have other agreements covering other services not expressly provided for herein, which agreements are unaffected by this Agreement. Each Party also represents that in entering into this Agreement, it has not relied on the promise, inducement, representation, warranty, agreement, or other statement not set forth in this Agreement or in the incorporated attachments, exhibits, and appendices.

2. This Agreement may be executed in two or more counterparts, each of which is deemed original but all constitute one and the same instrument. The Parties agree that a facsimile copy of a signature will be deemed original and binding.

H. CONFIDENTIAL INFORMATION

1. Confidential information shall mean any confidential and/or proprietary information provided by one Party to the other Party that is clearly marked or otherwise designated "Confidential." All design, operating specifications, and metering data provided by the Interconnection Customer shall be deemed confidential information regardless of whether it is clearly marked or otherwise designated as such.

2. Confidential Information does not include information previously in the public domain, required to be publicly submitted or divulged by Governmental Authorities (after notice to the other Party and after exhausting any opportunity to oppose such publication or release), or necessary to be divulged in an action to enforce an agreement between the Parties. Each Party receiving Confidential Information shall hold such information in confidence and shall not disclose it to any third party nor to the public without the prior written authorization from the Party providing that information, except to fulfill obligations under agreements between the Parties, or to fulfill legal or regulatory requirements.

a. Each Party shall employ at least the same standard of care to protect Confidential Information obtained from the other Party as it employs to protect its own Confidential Information.

b. Each Party is entitled to equitable relief, by injunction or otherwise, to enforce its rights under this provision to prevent the release of Confidential Information without bond or proof of damages, and may seek other remedies available at law or in equity for breach of this provision.

3. Notwithstanding anything in this article to the contrary, if the Commission, during the course of an investigation or otherwise, requests information from one of the Parties that is otherwise required to be maintained in confidence, the Party shall provide the requested information to the Commission, within the time provided for in the request for information. In providing the information to the Commission, the Party may request that the information be treated as confidential and non-public by the Commission and that the information be withheld from public disclosure. Parties are prohibited from notifying the other Party prior to the release of the Confidential Information to the Commission. The Party shall notify the other Party when it is notified by the Commission that a request to release Confidential Information has been received by the Commission, at which time either of the Parties may respond before such information would be made public.

I. NO WARRANTIES

1. By undertaking the performance of any of its responsibilities under the terms of this Agreement, including, without limitation, any inspection, acceptance or non-rejection, Public Service does not give and hereby disclaims any warranty, expressed or implied, as to the adequacy, safety, or other characteristics of any structures, equipment, wires, appliances, or devices owned, installed, or maintained by Developer or leased by Developer from third parties, including without limitation the Generation System and any structures, equipment, wires, appliances, or devices appurtenant thereto.

J. NO PARTNERSHIP

1. This Agreement shall not be interpreted or construed to create an association, joint venture, agency relationship, or partnership between the Parties or to impose any partnership obligation or partnership liability upon either Party. Neither Party shall have any right, power, or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as or be an agent or representative of, or to otherwise bind, the other Party.

IN WITNESS WHEREOF, the Parties hereto have caused three originals of this Agreement to be executed by their duly authorized representatives. This Agreement is effective as of the last date set forth below.
