

Time of Use Pricing

You pay differing prices depending on the amount of energy you use during different times of the day. Charge overnight and save.

- On-Peak prices are 14 cents per kWh (winter), 18 cents per kWh (summer)
- Shoulder prices are 10 cents per kWh (winter), 13 cents per kWh (summer)
- Off-Peak prices are 8 cents per kWh (both seasons)

\$2.80

Average cost of a gallon of gasoline in Colorado

**Summer months:
June–September**

**Winter months:
October–May.**

Note: Savings will vary depending on customer's ability to make changes to electrical use. Prices are subject to resource and/or fuel adjustments, city fees and taxes where applicable. Prices may change upon approval. Peak hours are not applicable on weekends and holidays, when 2–6 p.m. is instead billed at the shoulder price.
