Public Service Company of Colorado ("PSCo" or "the Company") posts this 60-Day Notice to notify stakeholders that Energy Feedback – Business will continue as a pilot during 2016.

The Company had planned to transition the pilot to a product on January 1, as stated on page 87 of the 2015/16 DSM Plan, presuming the pilot’s “successful completion.” However, the pilot yielded inconsistent results in the measurement of energy savings during 2015. Both the third-party implementer and evaluator agree that the last energy savings measurement reported in August 2015, for the time period of December 1, 2014-July 31, 2015, was not statistically significant.

The Company will continue with the planned expansion of participation in the pilot to a more targeted segment of customers in 2016, as described in the DSM Plan.

In compliance with Decision No. C14-0731 at Paragraph 82 and Decision No. C14-0997 at Paragraph 21, the Company will not claim any energy savings from the pilot during the 2015 and 2016 plan-years. However, the Company will continue to measure and track energy savings throughout 2016, with verification by the third-party evaluator.

If the energy savings results of the pilot stabilize to the point that the Company is confident in the long-term viability as a product, it will consider transitioning the pilot to a product in the future.
